The following observations were gathered from market personnel and vendors this week:

- Sufficient supply of fresh marine commodities were still noted among the monitored retail markets this week. More specifically, ample display of chabeta/hiwas (*Mene maculata*) was recorded at Navotas Retail Markets (3, 4, & 5) on 15 March 2022 sourced from Palawan. Consequently, adequate availability of medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*) was observed the entire week. Additionally, supply of other galunggong variants such as burot (*Decapterus kurroides*), Balsa (*Decapterus macarellus*), and galunggong babae (*Decapterus russelli*) were noted among the monitored retail markets this week.
- Relatively, minimal availability of imported-frozen galunggong lalaki (*Decapterus macrosoma*) was observed among the monitored retail markets as vendors prefer selling local variants due to its premium quality having better demand in the market.
- Similarly, limited supply of medium-sized alumahan was still observed this week as the majority of the supply were still larged sizes (6-8 pcs/kg) sourced mainly from Malabon Fish Port and Lucena, Quezon. On the other hand, other imported-fishery commodities such as hiwas, tulingan and pampano were also recorded among the monitored retail markets.
- Adequate supply of bangus was still apparently observed at the monitored retail markets this week sourced from Pangasinan and Bulacan. More specifically, in Tandang Sora Market, large-sized (1-2pcs/kg) commodity was still noted this week, as vendors prefer selling larger sizes due to higher demand in the market.
- For tilapia, no changes were still recorded in the prevailing retail price of medium-sized tilapia this week. Meanwhile, there remains to have Php10.00 to Php20.00 difference from live and chilled tilapia in the monitored retail markets. In addition, price differences may have been attributed to the source area of the commodity, wherein the prevailing price of Php120.00/kg recorded from Batangas as compared to Php10.00/kg from Pampanga.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan
 - Tilapia - Batangas
 - Local Galunggong -Malabon and Navotas Fish Port
 - Alumahan - Malabon Fish Port and Lucena, Quezon
- Low influx of buyers continues to be apparent among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. On the other hand, other vendors, particularly those in Kamuning, Galas, Quinta, and Trabajo Markets, majority of the display were aquaculture commodities (i.e., Bangus and Tilapia) due to its relatively stable wholesale price and demand from consumers.
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

- Penaeus monodon* or Supgo (small) (Php*260.00-680.00/kg)-lowest recorded actual price of Php*260.00/kg in Muñoz market was noted to have smaller sizes and reportedly stocks from the previous market days as compared to the highest actual price of Php*680.00/kg observed in Farmers market wherein supply of the commodity was noted to be larger in size and has premium quality in terms of freshness source from Bulacan.
- Sardinella gibosa* or Tamban (Php100.00 & 200.00/kg)- lowest prevailing price of Php100.00/kg was recorded in Pasig market which noted to have smaller size as compared to the supply observed in Marikina market which have notice to be larger with a prevailing retail price of Php200.00/kg sourced from Lucena, Quezon.
- Lutjanus sp.* or Maya-maya - (Php300.00 & 500.00/kg)- lowest prevailing price of Php300.00/kg was noted in Mandaluyong and Pasig market wherein supplies are from the previous market days which are noted to have lower quality (in terms of freshness) as compared to the supply observed in Muñoz market wherein supply are noted to have large size and observed to have better quality.
- Gerres oyena* or Latab/Lamas-(Php220.00-350.00/kg)- lowest prevailing price of Php220.00/kg was noted in Malabon Central Market wherein supply are directly source from Malabon Fish Port wholesale market. Meanwhile, highest recorded actual price of Php350.00/kg was observed at Guadalupe market which supply are usually source from its nearby primary market (e.g., Farmers), hence the higher price.
- Leiognathus splendens* or Sap-sap (Php450.00- 550.00)-both prevailing prices were noted at Farmers market , wherein the lowest prevailing of Php450.00/kg are smaller sizes of the commodity, as compared to the Php550.00/kg which are noted to be in larger sizes, resulting to the higher price.
- Metapneustes ensis* or Suwaha (Php400.00-500.00)- Similarly, both prevailing price was noted in Malabon Central market wherein highest prevailing price of Php400.00/kg was noted to be in fresh chilled form of the commodity. Meanwhile, highest prevailing price of Php500.00/kg was noted live of the commodity, hence the higher price.

(-) - Price and Volume not available during price monitoring

(*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA - Source Area not available during price monitoring
