REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-January 31-February 4, 2022 - WEEK 4 February 21-25, 2022

Overall, stable prices of fishery commodities were recorded at the monitored markets this month.

Low demand for fishery commodities were still apparently observed throughout the month, as a result, vendors are selling their products thru online (by collecting order) and deliver to the customers.

Continuous implementation of health protocols (ex. no facemask and faceshield, no entry) in major wet markets.

R1

WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022

Supplies of fishery commodities were sufficient at the monitored markets.

More specifically, imported-frozen galunggong continuously observed in San Fernando City Public Market at Php150.00-240.00/kg while in other wet markets, local galunggong was available.

R3

WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022

Minimal but sufficient volumes of fresh marine commodities were observed at the monitored markets.

Difference in prices may have been attributed to the quality (in terms of freshness and sizes) as well as weather condition.

R4A

WEEK 1 January 31-February 4, 2022

Prices of fishery commodities were stable.

Supplies of small-sized imported-frozen galunggong was observed in Lemery public market.

WEEK 3 February 14-18, 2022

Prices of fishery commodities were steady.

Meanwhile, price of galunggong increased due to low supply brought about by the occurrence of full moon.

R4B

WEEK 1 January 31-February 4, 2022 - WEEK 2 February 7-11, 2022

Prices of fishery commodities were high due to low supply.

WEEK 3 February 14-18, 2022

Prices of fishery commodities were stable this week.

WEEK 4 February 21-25, 2022

No changes were recorded in the prices of fishery commodities.

R5																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
Minimal but sufficient supplies of fresh marine commodities were observed at the monitored markets. Price differences may have been attributed to the weather condition.																					
R6																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
No presence of dynamited fish, rare, threatened and endangered marine species during the conduct of monitoring and inspection. Fish that are being caught by the commercial fishing boats (right net) were from the municipality of San Jose, Antique. As observed, continuous implementation of social distancing and wearing of facemask in the markets.																					
R7																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
In general, minimal quantity of fresh marine commodities were observed this month. PFO's Bohol and Negros were not able to submit their report this week due to unavailability of internet connection.																					
R8																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
At the monitored markets, sufficient volumes of fishery commodities were noted this month. Alimango (<i>Scylla serrata</i>) in Guiauan public market was observed to be sold mixed (male and female) in most of the markets. Because, female alimago is believed to be more "ma aligue or mataba" as compared to male alimango. That is why, the vendors are selling the commodity in mixed. The price difference of the fishery commodities could have been due to the quality (in terms of sizes and freshness), source area as well as the weather condition.																					
R9																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
Sufficient supply of fishery commodities were observed throughout the month. Price differences depends on the quality (in terms of sizes and freshness) and weather condition. Low influx of buyers were apparently observed at the monitored markets.																					
R10																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
Price differences of the fishery commodities depends on the quality in terms of sizes as well as source area. Few buyers were noted at the monitored markets during the conduct of monitoring.																					
R11																					
WEEK 1 January 31-February 4, 2022																					
Prices of fishery commodities decreased this week especially big-eyed scad, round scad, and frigate tuna due to abundant supply. On the contrary, prices of tuna, bangus and shrimp increased due to lack of supply in the monitored markets.																					
WEEK 2 February 7-11, 2022																					
Low supply of fishery commodities were observed at the monitored markets. More specifically the prices of tuna, bangus, hipon and galunggong increased this week.																					
WEEK 3 February 14-18																					
High supply of bangus, tilapia, matambaka, and galunggong were observed in the monitored markets.																					
WEEK 4 February 21-25, 2022																					
Supply of fishery commodities could have been affected by the bad weather condition (heavy rain).																					
R13																					
WEEK 1 January 31-February 4, 2022 - WEEK 4 February 21-25, 2022																					
Low demand for fishery commodities continuously observed at the monitored markets this month.																					
NCR																					
The following observations were gathered from market vendors and administrators for the month of February:																					
1. In general, sufficient volumes of fresh marine commodities were observed at the monitored retail markets this month. In addition, more supplies were observed for local-fresh galunggong and alumahan due to the lifting of closed fishing season for local galunggong (<i>Decapterus</i> spp.) at Northeastern Palawan last Feb. 1 and for sardines, herrings & mackarels (<i>Ratrilliger</i> spp. & <i>Sardinella</i> spp.) at Visayan Sea last Feb. 15. There are also other available local galunggong variants like babae (<i>Decapterus russelli</i>), balsa (<i>Decapterus macarellus</i>) and burot (<i>Decapterus kurroides</i>) noted at the market. This resulted to a decreased in the prevailing retail prices of local galunggong and alumahan this month.																					
2. Despite the sufficient supply of local-fresh galunggong at the market, there are still market vendors who prefer selling imported-galunggong due to its cheaper price making it easier for them to sell. Also, most of the supplies for local galunggong this month are small to medium sizes unlike for imported galunggong which are mostly large-size. Other imported commodities observed at the markets were pampano, salmon mackarel, tulingan and chabeta.																					
3. The prevailing retail prices of bangus and tilapia remain the same from previous month due to the stable demand and sufficient supplies at the monitored markets. Most of the supply for bangus this month are large sizes (1-2pcs/kg).																					
4. Top fishery commodities in the sixteen (16) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas c. Local Galunggong - Malabon Fish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port																					
5. According to vendors, low demand among the buyers and consumer were consistently observed throughout the month. Relatively, display of fresh marine commodities were observed to be limited among the monitored retail markets, as vendors only sell limited volume and variety of fishery commodities to ensure that it will be sold out at the end of the day and avoid losses.																					
6. Physical price monitoring activity for the eleven (11) monitored retail markets were resumed last Feb 8 2022 (Tuesday).																					
7. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 2 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.																					
General Observation																					
Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.																					
1. <i>Penaeus monodon</i> or Supgo (Large to Jumbo) (Php 500.00&600.00 /kg) - lowest prevailing price of Php 500.00/kg was recorded in Region 4B, Region 8 and Region 10 wherein price of the said commodity was varied from sourced, sizes and quality. Highest prevailing price of Php 500.00/kg was recorded in Region 1, Region 6 and 8 wherein the said commodity are larger in size, hence, price is higher.																					
2. <i>Scomberomorus commerson</i> or Tangigue (Php 380.00&500.00 /kg) - lowest prevailing price of Php 380.00/kg was recorded in Region 6, Region 8 and Region 10 wherein the available supply of the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 500.00/kg was recorded in Region 4A, Region 7 and Region 10 also wherein available supplies was larger in size, hence, price is lower.																					
3. <i>Loligo</i> sp. or Pusi (Php 160.00&300.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 10 and Region 11 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price lower Php 300.00/kg was recorded in Region 5 and Region 8 wherein available supplies was lower in volume and larger in size.																					
4. <i>Loligo</i> sp. or Lumot (Php 300.00&400.00 /kg) - lowest prevailing price of Php 300.00/kg was recorded in Region 5, Region 6, Region 9 and Region 13 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price lower Php 400.00/kg was recorded in Region 8, Region 4A, Region 7 and NCR wherein available supplies was larger in size, hence, price is higher.																					
5. <i>Acanthurus</i> sp. or Labahita (Php 80.00-350.00 /kg) - lowest prevailing price of Php 80.00/kg was recorded in Region 4B it was noted with ample volume of supply of the commodity as it was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in Region 3 wherein available supplies was lower in volume and larger in size.																					
6. <i>Atule mate</i> or Salay-salay (Php 120.00-360.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 5 wherein the said commodity was source within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 360.00/kg was recorded in NCR wherein the available supply was sourced from another region and additional cost on logistic, hence, price is higher.																					
7. <i>Caesio caerulea</i> or Dalagang Bukid Bilog (Php 80.00 - 300.00 /kg) - lowest prevailing price of Php 80.00/kg was recorded in Region 4B due to ample supply of the commodity as it was sourced within the locality and smaller in size, hence, lower the price compared to Region 7.																					
8. <i>Carangoides armatus</i> or Talakitok (Php 220.00-460.00 /kg) - lowest prevailing price of Php 220.00/kg was recorded in Region 4B due to ample supply as it was sourced within the locality. Meanwhile, highest prevailing price of Php 460.00/kg was recorded in Region 4A wherein available supply was larger in size, hence, price is higher.																					
9. <i>Carangoides fulvoguttatus</i> or Talakitok (Php 200-350 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 4B wherein the said commodity was smaller in size, hence, lower the price compared to Region 8.																					
10. <i>Caranx ignobilis</i> or Talakitok (Php 280.00&400.00 /kg) - lowest prevailing price of Php 280.00/kg was recorded in Region 2 (Cagayan) wherein the said commodity was smaller in size, hence price is lower. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in Region 4A wherein supplies was reportedly larger in size, hence, price is higher.																					
11. <i>Caranx sepioides</i> or Talakitok (Php 250.00&350.00 /kg) - lowest prevailing price of Php 250.00/kg and highest prevailing price of Php 350.00/kg was recorded in Region 1 wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.																					
12. <i>Decapterus macrosoma</i> or Galunggong Imported (Php 100.00-200.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 5 due to ample volume of supply compared to NCR.																					
13. <i>Decapterus russelli</i> or Galunggong Babae (Php 140.00-240.00 /kg) - lowest prevailing price of Php 140.00/kg and highest prevailing price of Php 240.00/kg was recorded in NCR wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.																					
14. <i>Elogatis</i> sp. or Salmon (Php 130.00-340.00 /kg) - lowest prevailing price of Php 130.00/kg and highest prevailing price of Php 340.00/kg was recorded in NCR wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.																					
15. <i>Gazza achlamys</i> or Sapsap (Php 180.00&320.00 /kg) - lowest prevailing price of Php 180.00/kg and highest prevailing price of Php 320.00/kg was recorded in Region 3 wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.																					
16. <i>Gerres</i> sp. or Latab (Php 100.00-200.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 9 wherein the said commodity was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 200.00/kg was recorded in NCR wherein supplies was sourced from other region, hence, price is higher.																					
17. <i>Gobiopterus lacustris</i> or Dulong (Php 160.00-320.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 9 wherein the commodity was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php 320.00/kg was recorded in NCR wherein the available supply was sourced from other region and larger in size, hence, price is higher.																					
18. <i>Leiognathus splendens</i> or Sapsap (Php 160.00-450.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 4B wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower. Meanwhile highest prevailing price of Php 450.00/kg was recorded in NCR wherein available supply was larger in size and sourced from other region, hence, price is higher.																					
19. <i>Lethrinus lentjan</i> or Katambak (Php 200.00-350.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 350.00/kg was recorded in Region 8 wherein prices varies from it sizes and abundant of supply.																					
20. <i>Makaira mazara</i> or Malasugi (Php 240.00-560.00 /kg) - lowest prevailing price of Php 240.00/kg was recorded in Region 9 wherein the said commodity is smaller in sizes. Meanwhile, highest prevailing price of Php 560.00/kg was recorded in Region 13 wherein available supply was larger in size, hence, price is higher.																					
21. <i>Makaira nigricans</i> or Malasugi (Php 340.00-600.00 /kg) - lowest prevailing price of Php 340.00/kg was recorded in Region 8 wherein the said commodity is smaller in size, hence, price is lower compared to Region 10.																					
22. <i>Muaji cephalus</i> or Bolasi (Php 160.00-400.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 8 wherein the said commodity is smaller in size, hence, price is lower compared to Region 10.

23. *Nemipterus bathybius* or Bisugo (Php 140.00 - 380.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 4B wherein said commodity was smaller in size and sourced within the locality. Meanwhile, highest prevailing price of Php 380.00/kg was recorded in Region 4A wherein supplies was larger in size.
24. *Nemipterus hexodon* or Saguison (Php200.00-360.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile highest prevailing price of Php 360.00/kg was recorded in NCR wherein available supply was sourced from other region, hence, price is higher.
25. *Nemipterus* sp. or Bisugo (Php120- Php400/kg) - lowest prevailing price of Php120.00/kg was recorded in Region 4B wherein the said commodity was sourced within the locality, hence, price is lower compared to NCR wherein the available supply was sourced from other region and additional cost on logistic, hence, price is higher.
26. *Octopus vulgaris* or Kugita (Php 150.00 - 300.00 /kg) - lowest prevailing price of Php 150.00/kg was recorded in Region 9 wherein the said commodity was sourced within the locality and smaller in size compared to Region 11.
27. *Parupeneus* sp. or Saramulyete (Php 100.00/kg-400.00/kg)-lowest prevailing price of Php 100.00/kg was recorded in Region 4B wherein the available supply as smaller in size, hence price is lower compared to Region 11.
28. *Pinna bicolor* or Balako (Php 140.00-320.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 5 wherein the said commodity was sourced within the locality, hence, lower. Meanwhile highest prevailing price of Php 320.00/kg was recorded in NCR wherein available supplies was sourced from other region and additional cost in logistic, hence, price is higher.
29. *Plectorhinchus lineatus* or Lipit (Php 140-260 /kg)-lowest prevailing price of Php 140.00/kg was recorded in Region 4B due to ample supply of the said commodity as it was sourced within the locality. Meanwhile, highest prevailing price of Php 260.00/kg was recorded in Region 8 wherein the said commodity was larger in size.
30. *Piracanthus hamrur* or Bukawon (Php 180.00/kg-360.00/kg)-lowest prevailing price of Php 180.00/kg was recorded in Region 5 due to ample supply as it was sourced within the locality. Meanwhile highest prevailing price of Php 360.00/kg was recorded in NCR wherein available supplies was sourced from other region and additional cost in logistic, hence, price is higher.
31. *Pterocassis chrysozana* or Dalagang Bukid Bilog (Php 280.00-450.00 /kg) - lowest prevailing price of Php 280.00/kg was recorded in NCR wherein the available supply was smaller in size. Meanwhile highest prevailing price of Php 450.00/kg was recorded in Region 4A wherein available supplies was larger in size, hence, price is higher.
32. *Scarus* sp. or Mul-mol (Php200.00&300.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 8 and Region 9 wherein the sourced of the said commodity is within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 11 and Region 13 wherein the said commodity is larger in size, hence, price is higher.
33. *Scatophagus argus* or Kitang (Php250.00&350.00 /kg) - lowest prevailing price of Php 250.00/kg was recorded in Region 1 wherein the available supply was smaller in size, hence, price is lower compared to NCR wherein the available supply was sourced from other region and additional cost on logistic, hence, price is higher.
34. *Selaroides leptolepis* or Salay-salay (Php 140.00-350.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 8 wherein the said commodity was smaller in size. Meanwhile highest prevailing price of Php 350.00/kg was recorded in Region 4A wherein available supply was larger in size, hence, price is higher.
35. *Siganus guttatus* or Malaga (Php 200.00-350.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 4B, Region 9 and NCR wherein the available supply was smaller in size. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in Region 7, Region 8 and Region 10 wherein the supplies was larger in size, hence, price is higher.
36. *Siganus virgatus* or Daraghago (Php 200.00-350.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 350.00/kg was recorded in Region 8 wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.
37. *Siganus vermiculatus* or Malaga(Php120.00-320.00 /kg) - lowest prevailing price of Php120.00/kg was recorded in Region 4B due to ample supply of the said commodity as it was sourced within the locality. Meanwhile highest prevailing price of Php 320.00/kg was recorded in Region 2 wherein the said commodity was larger in size, hence, price is higher.
38. *Siganus* sp. or Bataway (Php180.00&400.00 /kg) - lowest prevailing price of Php180.00/kg was recorded in Region 4B and Region 5 wherein the available supply was smaller in size. Meanwhile highest prevailing price of Php 400.00/kg was recorded in Region 6 and Region 11 wherein the said commodity was larger in size, hence, price is higher.
39. *Sphyræna obtusata* or Torsilyo (Php 200.00-350.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 350.00/kg was recorded in Region 4A wherein prices varies from it sizes, quality of the said commodity in terms of freshness and abundant of supply.
40. *Stolephorus* sp. or Dilis (Php 80.00-240.00 /kg) - lowest prevailing price of Php80.00/kg was recorded in Region 9 wherein ample supply of the said commodity as it was sourced within the locality, hence price is lower compared to NCR.
41. *Teuthida* sp. or Pustit (Php 200.00&400.00 /kg) - lowest prevailing price of Php200.00/kg was recorded in Region 9 wherein ample supply of the said commodity as it was sourced within the locality, hence price is lower compared to NCR.
42. *Trichurus lepturus* or Espada (Php100.00&300.00 /kg) - lowest prevailing price of Php100.00/kg was recorded in Region 1 and Region 8 wherein the available supply was smaller in size. Meanwhile highest prevailing price of Php 300.00/kg was recorded in CAR and NCR wherein the said commodity was larger in size, hence, price is higher.
43. *Tylosurus crocodilus* or Bulo (Php100.00-300.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 4B due to ample supply as it was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 7 wherein the said commodity is larger in size, hence, price is higher.
44. *Upeneus sulphureus* or Ti-aw (Php 140.00- Php400.00/kg) - lowest prevailing price of Php140.00/kg was recorded in Region 8 where supplies are abundant and directly source from locality, hence, price is lower. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in Region 11 wherein the said commodity is larger in size.
45. *Xiphias gladius* or Marlin (Php400.00 - 540.00 /kg) - lowest prevailing price of Php 400.00/kg was recorded in Region 9 wherein the said commodity is smaller in size, hence price is lower. Meanwhile, highest prevailing price of Php 540.00/kg was recorded in Region 11 wherein the said commodity is larger in size.
