<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Overall, ample volume of supplies were observed for fresh marine commodities at the retail markets this week. Moreover, abundant supplies of local-fresh galunggong were recorded resulting to a decreased in the prevailing price this week. The abundant supply supply at the market may be attributed to the lifting of closed fishing season at Northeastern Palawan last Feb 1. The increased in supply are expected in the coming months until the lean fishing season on September. There are other local galunggong variant like "balsa" (Decapterus macarellus), "burot" (Decapterus kurroides) and "babae" (Decapterus russelli). The supply of Imported-frozen galunggong continues to be available in some of the monitored retail markets (Trabajo, Balintawak and Muñoz Markets). Despite the sufficient supply of its local variant, some of the vendors prefer selling imported galunggong due to its cheaper price making it easier to sell but most of the consumers still prefer local galunggong than imported galunggong. There are other imported commodities being sold like chub mackarel, chabeta, tulingan and pampano. Most of the supply available for Alumahan are still large-sized. Supplies began to increased after the lifting of closed fishing season at Visayan Sea, which is a major sourced are for the said commodity. No changes were observed at the prevailing retail prices of bangus and tilapia due to the stable demand and sufficient supply at the monitored retail markets. Most of the supply for bangus are still medium to large in sizes, while for tilapia, all sizes was available. There is still a Php20-30/kg price difference between live and dead tilapia. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan, Pangasinan Tilapia - Batangas Local Galunggong - Navotas & Malabon Fish Port, Lucena Imported Galunggong - Navotas Fish Port Alumahan - Malabon Fish Port, Lucena Low influx of buyers was continuously observed among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold at the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or only during market days (Friday-Sunday) where there are more people in the monitored markets. Also, some of the vendors open only from 6am to 2pm as low number of buyers where observed during afternoon. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others. <p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Scylla Serrata</i> or Alimango - Female (Php550/kg - Ph900/kg) - lowest prevailing price of Php550.00/kg was recorded in Malabon Market where the available supplies were directly sourced from Malabon Wholesale Market which resulted to lower price. Highest prevailing price of Php900.00/kg was noted at Farmers Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price. <i>Lethrinus sp.</i> or Bitilya (Php240 - Php450/kg) - lowest and highest prevailing prices were recorded in Guadalupe Market. The difference in the prices may be attributed to the size of the commodity. lowest and highest prevailing prices were recorded in Farmers Market. The difference in the prices may be attributed to the size of the commodity. <i>Salmo salar</i> or Salmon - Meat (Php700- Php950/kg) - lowest prevailing price of Php700.00/kg was recorded in Guadalupe Market where the available supplies were not in good quality which resulted to lower price. Highest prevailing price of Php950.00/kg was noted at Marikina Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price. 																																				
<p>(*) - Price and Volume were not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area was not available during price monitoring</p> <p>Markets 1-11 (Balintawak to Navotas Markets 3, 4, & 5) - Monitored by BFAR-FIDSSD (CO) Enumerators Markets 12-18 (Malabon Central to Ugonz Valenzuela) - Monitored by BFAR-NCR Enumerators</p> <table style="width:100%; border:none;"> <tr> <td style="width:50%; vertical-align:top;"> <p>MONITORED BY:</p> <table style="width:100%; border:none;"> <tr> <td style="text-align:center;"><i>SGD</i> <u>IONATHAN A.
