		Female	75	72	72 & 75	75	72	-	China and Vietnam

**Remarks/Market Observations:**

The following observations were gathered from market personnel:

- At Navotas Fish Port (wholesale), sufficient volumes of fresh marine commodities were still apparently observed this week. Consequently, ample availability was recorded for medium-sized local-fresh galunggong laki (*Decapterus macrosoma*) this week sourced from Northern Palawan.
- Adequate supplies for medium-sized imported-frozen galunggong laki continued to be available at the fish port this week derived from China and Vietnam. Additionally, other imported fishery products were also recorded at wholesale level this week that includes hiwas (*Mene maculata*), tulingan (*Auxis rochei*), salmon or japayuki (*Scomber japonicus*) etc.
- For alumahan, the commodity was present this week at an actual wholesale prices of Php160.00/kg and Php220.00/kg sourced from Masbate.
- For medium-sized bangus and tilapia, steady supplies were still noted this week at the fish port. In addition, no significant changes were still noted in the supply of tilapia from Batangas despite the volcanic activity of Taal Volcano. On the other hand, majority of the supply of bangus are still large sizes due to better demand in the market.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
  - Bangus - Pangasinan, Bulacan
  - Tilapia - Batangas
  - Local Galunggong- Northern Palawan
  - Imported galunggong - China and Vietnam
- Precautionary measures (e.g., wearing of face mask and face shields as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection) were continuously implemented by the Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex to safeguard vendors and buyers against COVID-19.

Note: Wholesale price data is as of March 26 & 29, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(\*\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
