		Male	120	120	120	120	120	-	China and Vietnam
		Female	75	88	75 & 88	88	75	-	China and Vietnam

Remarks/Market Observations:

The following observations were gathered from market personnel:

- Sufficient volumes of fresh marine commodities were still observed this week at Navotas Fish Port (wholesale), despite the bad weather condition brought about by the Low Pressure Area (LPA) and Intertropical Convergence Zone (ITCZ) affecting the Visayas, Mindanao, and Southern Luzon. Meanwhile, adequate supply of medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*) was observed this week sourced from Northern Palawan.
- On the other hand, there continues to have sufficient unloadings of imported-frozen galunggong at Navotas Fish Port (wholesale) this week with a recorded prevailing wholesale price of Php120.00/kg for medium-sized galunggong lalaki (*Decapterus macrosoma*) and Php75.00 & Php88.00/kg for medium-sized imported-galunggong babae (*Decapterus russelli*) both were sourced from China and Vietnam.
- Meanwhile, availability of medium-sized alumahan (*Rastrillegger kanagurta*) was also observed this week at an actual price of Php200.00/kg sourced from Masbate.
- Steady supply for aquaculture commodities (i.e., bangus and tilapia) were still observed this week at the fish port. However, large size bangus remain the majority of the supply noted this week sourced from Pangasinan, Bulacan, and Batangas.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan, Bulacan
 - Tilapia - Batangas
 - Local Galunggong- Northern Palawan
 - Alumahan- Masbate
 - Imported galunggong - China and Vietnam
- Precautionary measures (e.g., wearing of face mask and face shields as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection) were continuously implemented by the Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex to safeguard vendors and buyers against COVID-19.

Note: Wholesale price data is as of April 01 & 04, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
