Remarks/Market Observations	<p>The following observations were gathered from market vendors and administrators for the month of March:</p> <ol style="list-style-type: none"> <li>Overall, adequate supplies of fresh marine commodities were observed among the monitored retail markets this month. Furthermore, the supplies for local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>) and alumahan (<i>Rastrillegger</i> sp.) remained stable throughout the whole month due to the lifting of closed fishing season. This resulted to a decreased in the prevailing prices of local-fresh galunggong and alumahan this month. There are also other available local galunggong variants like babae (<i>Decapterus russelli</i>), balsa (<i>Decapterus macarellus</i>) and burot (<i>Decapterus kurroides</i>) noted at the market.</li> <li>The supply of imported-frozen galunggong in some of the monitored markets (Munoz, Balintawak, Mega-Q, Trabajo, Quinta Markets) remained available despite the sufficient supply of local-fresh galunggong this month. Most of the vendors still prefer selling imported galunggong due to its cheaper price making it easier to sell. Most of the supply for imported galunggong were large-sized while for local-fresh galunggong were small to medium size. Additionally, other imported commodities were also observed at the markets like pampano, salmon mackarel, tulingan and chabeta.</li> <li>No changes were recorded in the prevailing retail prices of medium-sized bangus and tilapia this month. There is still a Php20-30/kg difference between the price of dead and live tilapia. In bangus, most of the supply recorded are large-sized.</li> <li>Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan, Pangasinan</li> <li>Tilapia - Batangas</li> <li>Local Galunggong - Malabon Fish Port</li> <li>Imported Galunggong - Navotas Fish Port</li> <li>Alumahan - Malabon Fish Port</li> </ol> </li> <li>The Closed Fishing Season for Sardines (<i>Sardinella</i> sp.) in Zamboanga has been lifted on March 1. This resulted to an increase in supply for the said commodity at the monitored retail markets this month.</li> <li>Fluctuations in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</li> </ol> <p>*<i>Acanthurus nigricauda</i> or Labahita (Php260-380/kg) - lowest prevailing price of Php260.00/kg was recorded from Commonwealth Market, whereas supply are source directly from the nearby wholesale markets. On the other hand, highest prevailing price of Php900.00/kg are recorded at Guadalupe Market, wherein supply are source usually from nearby primary markets, hence the variation of prices.</p> <p>*<i>Caesio</i> sp. or Dalagang Bukid (Php220-360/kg) - lowest prevailing price of Php220.00/kg was recorded at Munoz and Galas markets, wherein supply are noted to be smaller sizes resulting to offer the commodity in a lower price, however supply noted at Kamuning and Galas markets are observed to have larger sizes and are source only from its nearby primary market (i.e., Farmers), hence the higher price.</p> <p>*<i>Gerres oyena</i> or Latab (Php220-360/kg) -lowest prevailing price of Php200.00/kg was recorded at Malabon Central market, wherein supply are sourced directly to Malabon Wholesale Market resulting to a lower price, however supply noted at Guadalupe market are sourced from nearby primary market, hence the higher price.</p> <p>*<i>Hypoatherina temminckii</i> or Dilis (Php120-260/kg)- both lowest and highest prevailing prices were recorded at Kamuning Market. The difference in the price may be attributed to the quality of the commodity.</p> <p>*<i>Mene maculata</i> or Chabeta (Php140-300/kg) - lowest prevailing price of Php140.00/kg was recorded at Malabon Central market, wherein supply are sourced directly to Malabon Wholesale Market resulting to a lower price, however supply noted at Guadalupe market are sourced from nearby primary market, hence the higher price.</p> <p>*<i>Pterocaesio digramma</i> or Dalagang Bukid Bilog - (Php180-340/kg)- lowest prevailing price of Php160.00/kg was recorded at Navotas Retail market, wherein supply are sourced directly to Navotas Wholesale Market resulting to a lower price, however supply noted at Mandaluyong market are sourced from nearby primary market, hence the higher price.</p> <ol style="list-style-type: none"> <li>Low influx of buyers was continuously observed among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold at the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or only during market days (Friday-Sunday) where there are more people in the monitored markets. Also, some of the vendors open only from 6am to 2pm as low number of buyers where observed during afternoon.</li> <li>Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</li> </ol>
