REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-April 4-8, 2022

Limited displays of species were recorded at the monitored wet markets.

Meanwhile, steady prices of fishery commodities were observed this week.

The demand for fishery products were still low at the monitored markets, wherein buyers still find it difficult to go outside their homes.

Lastly, since CAR is a landlocked region, the provinces rely only on shipment coming from nearby coastal regions. As a result, fish commodities present and available in the three (3) major markets depends on delivery, hence, low volume of fishery commodities recorded in the monitored markets.

WEEK 2-April 11-15, 2022

Steady price of fishery commodities were observed among the monitored markets this week.

Nevertheless, low demand for fishery products in the wet markets where in buyers still find it difficult to go outside their homes.

That is why some fish vendors sold their products at their respective community/barangay. Others, unsold fish products in the public market were brought to their homes and sold it thru online (by collecting orders) and deliver it to consumers.

Since CAR is a landlocked Region, the provinces rely only on shipment coming from the nearby coastal regions. Therefore, fish commodities present and available in the 3 major markets depends on delivery. Probably we usually record low volume of fishery commodities in the markets.

WEEK 3-April 18-22, 2022

Stable prices of fishery commodities were noted in the retail markets.

Low influx of buyers were continuously observed among the monitored retail markets this week.

Additionally, CAR is a landlocked region, the provinces rely only on shipment coming from the nearby coastal regions. Therefore, fish commodities present and available in the 3 major markets depends on delivery. Probably we usually record low volume of fishery commodities in the markets.

WEEK 4-April 25-29, 2022

Prices of fishery commodities remained stable this week.

Low influx of buyers were continuously observed among the monitored markets this week.

Cordillera Administrative Region (CAR) is a landlocked region, wherein the provinces rely only on shipment coming from the nearby coastal regions. Thus, fish commodities present and available in the three (3) major markets depends on delivery. Probably we usually record low volume of fishery commodities in the markets.

R1																					
WEEK 1-April 4-8, 2022																					
Sufficient supply of fishery commodities were recorded at the monitored retail markets.																					
Fishery commodities available in the region were majorly sourced from Dagupan City, Pangasinan, Aringay, and San Fernando City, La Union.																					
WEEK 2-April 11-15, 2022																					
Sufficient supply of fishery commodities were observed at the monitored markets.																					
Additionally, fishery commodities in Vigan City Public Market were mostly sourced from Dagupan City, Pangasinan.																					
WEEK 3-April 18-22, 2022																					
Supply of fishery commodities in wet markets of Pangasinan is still sufficient and prices of most commodities were the same as the previous data reported during the monitoring.																					
Fishery commodities in Vigan City Public Market were mostly sourced from Dagupan City, Pangasinan.																					
No significant changes in price of fishery commodities in the provinces of La Union and Ilocos Norte.																					
WEEK 4-April 25-29, 2022																					
Due to the occurrence of red tide, no supplies of shellfish such as green mussel and oyster were recorded in Bolinao Public Market.																					
R2																					
WEEK 2-April 11-15, 2022																					
The supply of fishery commodities in the region were sufficient this week.																					
Price variation may have been attributed to the quality in terms of sizes.																					
R4A																					
WEEK 1-April 4-8, 2022																					
The fishery commodities available in the region were sufficient this week.																					
WEEK 2-April 11-15, 2022																					
Minimal supply of fresh marine commodities were observed week which might be due to the bad weather condition.																					
Despite the inclement weather condition, supply of fishery commodities in the region were stable.																					
WEEK 3-April 18-22, 2022																					
The supply of fishery commodities in the market were stable. In fact, low price of tamban was noted in Lucena Public Market and in Lemery Public Market due to over supply.																					
WEEK 4-April 25-29, 2022																					
Stable supplies of fishery commodities were observed among the monitored markets this week.																					
Moreover, low price for sardines was noted in Lemery Public Market, Angono Public Market (City Mall) and Lucena Public Market due to abundant supply.																					
R4B																					
WEEK 1-April 4-8, 2022																					
Minimal but sufficient supply of fishery commodities were recorded during the conduct of monitoring this week.																					
The supply of commodities in the region may have been affected by the oil price hike, wherein fishermen were not able to catch fish due to lack of funds for gasoline.																					
In addition, MIMAROPA is a unique region wherein it is divided into islands, thus, commodities were being transported using shipping vessels.																					
WEEK 2-April 11-15, 2022																					
Prices of fishery commodities were high due to low supply at the monitored markets.																					
WEEK 3-April 18-22, 2022																					
Prices of fishery commodities were high due to logistic expenses.																					
WEEK 4-April 25-29, 2022																					
Prices of fishery commodities were high due to logistic expenses.																					
R5																					
WEEK 1-April 4-8, 2022																					
Due to the inclement weather condition, some of the fishery commodities were not available.																					
R6																					
WEEK 1-April 4-8, 2022																					
1. The following are the market observation in the Province of Aklan:																					
- sufficient supply of fishery commodities were recorded in Kalibo Oublic Market;																					
- prices of fishery commodities slightly increase due to the strong waves brought by Low Pressure Area (LPA) causing municipal and commercial fishers not to engage in fishing activity; and																					
- few consumers were observed during the conduct of price monitoring.																					
2. On the other hand, in Antique, majority of the displayed products were from local captured fisheries (esp. tuna and scad) and aquaculture commodities (bangus, shrimp) from Capiz and Estancia Iloilo. Based on interview among fish vendors, effect of LPA and Intertropical convergence zone (ITCZ) become a limiting factors in the conduct of fishing operation for both municipal and commercial, reason to the slight increase of price in some commodities.																					
3. In the Province of Guimaras it was observed that there was a price increase on fishery commodities, the following are the reason:																					
- due to the high cost/ price of fuel/ gasoline;																					
- limited supply of fishery commodities in Guimaras due to the bad weather, and mostly of the supply came from Iloilo; and																					
- almost of the fishery commodity was fresh thats why, it is slightly costly.																					
4. During the conduct of Price monitoring in Iloilo Central Market, it was observed that there was a slightly increase on the fishery commodities due to the bad weather, and due to the upcoming observance of holy week.																					
5. Lastly, high price was observed during the conduct of Price Monitoring in Bacolod City, Negros Occidental which might be due to bad weather condition.																					
WEEK 2-April 11-15, 2022																					
For the Province of Aklan, It was observed that the supply of Fishery products in Kalibo Public Market was stable while the price slightly increased due to Low Pressure Area (LPA) affecting the province of Aklan and Holy Week; A lot consumers was observed during the conduct of price monitoring on (Good Friday).																					
In Antique no presence of dynamited fish, rare, threatened and endangered marine species during the conduct of monitoring and inspection. There is slight increase in the price of some of the fisheries commodities due to Low Pressure Area bought by Agaton.																					
It was observed that mainly of the fisheries commodities displayed were pelagic fishes.																					
Upon interviewed with the fish vendor, price per box of some of the fisheries commodities increases due to limited Commercial Fishing Vessel conduct its operation.																					
According to the fish vendors in Guimaras the price of Fishery commodities was stable because almost of the comercial fishing boat had an operation; it is expected that the price of fishery commodity will increase after the observance of holyweek; it was also observed that less fish was caught came from the city due to the tropical depression Agaton and Basyang.																					
In the Province of Guimaras it was observed that there was a price increase on fishery commodities, the following are the reason: 1. Due to the high cost/ price of fuel/ gasoline. 2. limited supply of fishery commodities in Guimaras due to the bad weather, and mostly of the supply came from Iloilo 3. almost of the fishery commodity was fresh thats why, it is slightly costly.																					
During the conduct of Price monitoring in Iloilo Central Market, it was observed that there was a slightly increase on the fishery commodities due to tropical depression agaton, and due to the upcoming observance of holy week. It was also observed that few consumer was observed during the conduct of price monitoring. according to fish vendors, it is expected that lot of customers will be coming in the market starting holy thursday - easter sunday.																					
High price was observed during the conduct of Price Monitoring in Bacolod City, Negros Occidental due to the observance of holyweek.																					
WEEK 3-April 18-22, 2022																					
For the Province of Aklan, It was observed that the supply of fishery products in Kalibo Public Market was stable while the price slightly increased due to Northeast Monsoon (Amihan) affecting the province of Aklan.																					
No presence of dynamited fish, rare, threatened and endangered marine species during the conduct of monitoring and inspection.																					
There is slight increase in the price of some of the fisheries commodities due to Low Pressure Area bought by Agaton.																					
It was observed that mainly of the fisheries commodities displayed were pelagic fishes.																					
Upon interviewed with the fish vendor, price per box of some of the fisheries commodities increases due to limited Commercial Fishing Vessel conduct its operation.																					
People going in the market observed social distancing and wearing of facemask.																					
According to the fish vendors in Guimaras the price of Fishery commodities was stable but due to observance of Lenten season small fish available for this week.																					
During the conduct of Price monitoring in Iloilo Central Market, it was observed that the price of fishery commodity were stable. According to fish vendor, the source of pompano came from China. Few customer was observe during the conduct of price monitoring.																					
Stable price of fishery commodity was observed during the conduct of Price Monitoring in Bacolod City, Negros Occidental due to the observance of holyweek.																					
WEEK 4-April 25-29, 2022																					
In the province of Aklan and Bacolod City, Negros Occidental supplies of fishery products were reportedly stable.																					
Lastly, according to the fish vendors in Guimaras, some of the prices of fishery commodity increase due to few fishes available which might be due to the observance of holyweek.

R7																					
WEEK 1-April 4-8, 2022																					
Due to unfavorable weather condition fishery commodities in the region were minimal and expensive.																					
WEEK 2-April 11-15, 2022																					
Due to tropical storm, fishery commodities in Region 7 were minimal and expensive.																					
WEEK 3-April 18-22, 2022																					
Due to the minimal supply of fishery commodities in Region 7, prices of fishery commodities were expensive.																					
WEEK 4-April 25-29, 2022																					
Prices of fishery commodities in the region depends on the quality (in terms of freshness and sizes).																					
R8																					
WEEK 1-April 4-8, 2022																					
Sufficient supply of fishery commodities were recorded in the monitored retail markets.																					
In fact, volume of tulingan and tamban in Ormoc Market were significantly high.																					
New supply of fish arrive every day, every evening (11pm) or early morning (around 2am-3am) in Tacloban market.																					
WEEK 2-April 11-15, 2022																					
Most of the commodities had increased in price due to bad weather condition brought about by the Tropical Storm Agaton that greatly affects the whole Region.																					
New supply of fishery commodities arrive every day, every evening (11pm) or early morning (around 2am-3am) in Tacloban market																					
Despite the inclement weather condition, supply of fishery commodities in the region remain sufficient.																					
WEEK 3-April 18-22, 2022																					
Most of the commodities had slightly increased in price due to the past bad weather conditions and the abrupt fuel price surge that greatly affects both small scale and commercial fishery industry i.e cultured and capture fishery.																					
Whole Katsuwonus pelamis in Guianan Public market is noted to be at lower price per kilo than in other PM monitored.																					
A sufficient supply of fish in markets monitored was remarked																					
WEEK 4-April 25-29, 2022																					
Sufficient supply of fishery commodities were noted in the monitored markets.																					
Most of the commodities had slightly increased in price due to the past bad weather conditions and the abrupt fuel price surge that greatly affects both small scale and commercial fishery industry i.e cultured and capture fishery.																					
R9																					
WEEK 1-April 4-8, 2022																					
Minimal displays of fishery commodities were observed at the monitored retail markets this week which might be due to the bad weather condition.																					
Prices of fishery commodities depends on its quality (sizes and freshness).																					
There were few fish stalls open during the conduct of monitoring in some province of Zamboanga.																					
WEEK 2-April 11-15, 2022																					
Less variety of fish, less volume of fish catch/traded in the market, prices of fishery commodities were high due to bad weather and strong current in fishing ground and full moon.																					
Prices of fish retailed depends on its quality and sizes.																					
There were few fish stall open in the wet market in some Province of Zamboanga.																					
WEEK 3-April 18-22, 2022																					
Less variety of fish, less volume of fish catch/traded in the market, prices of fish is moderate to high due to strong current in fishing ground.																					
Prices of fish retailed depends on its quality and size.																					
Few fish stalls were observed open in the wet market in some Province of Zamboanga.																					
WEEK 4-April 25-29, 2022																					
Less variety and volumes of fishery commodities were observed this week, which may have been attributed to the strong current in fishing ground.																					
Difference in retail prices of fishery commodities could have been due to the variation of sizes and freshness of the commodity.																					
As observed, few fish stalls were observed open in the wet market of the Province of Zamboanga.																					
R10																					
WEEK 1-April 4-8, 2022																					
The prices of primary commodities particularly tilapia, bangus and local galunggong were relatively high.																					
The difference in price may have been due to the varying sizes and source areas.																					
Low influx of buyers were observed in the market due to COVID-19 pandemic threat.																					
R11																					
WEEK 1-April 4-8, 2022																					
Minimal unloadings of fishery commodities were noted this week due to the occurrence of Low Pressure Area (LPA).																					
Consequently, prices of fishes increased which might have been attributed to the inclement weather condition.																					
WEEK 2-April 11-15, 2022																					
As observed, there is a price increase and limited supply due to the low-pressure area.																					
WEEK 3-April 18-22, 2022																					
As observed, fish supply is still limited because of the constant bad weather condition, hence increasing prices.																					
WEEK 4-April 25-29, 2022																					
Despite the inclement weather, supplies of fishery commodities were still abundant, particularly in Madang Public Market and Malita Public Market.																					
R13																					
WEEK 1-April 4-8, 2022																					
According to the vendors, the increased in prices of fishery commodities were due to the oil price hikes.																					
Some provinces were reportedly have lack of fish displays due to bad weather condition like Siargao Island.																					
WEEK 2-April 11-15, 2022																					
Last week reports of every provinces the demand of fish in the wet markets decreases and the price increased due to increased of gasoline price according to the market vendors and buyers.																					
That is why some fish commodities increased of price also. There are provinces lack of fish commodities due to weather condition and also lack of fish display in their market.																					
WEEK 3-April 18-22, 2022																					
Last week reports the demand of fish in the wet markets decreases and the price increased due to increased price of gasoline, labor and long distance catching the volume in the fish landing according to the market vendors and buyers. That is why some fish commodities increased of price also.																					
There were provinces lack of fish commodities due to inclement weather condition and also lack of fish displays in their markets.																					
WEEK 4-April 25-29, 2022																					
Some provinces specifically Siargao Islands and Tandag City have lack of fishery supplies due to the bad weather condition.																					
Price increment of fishery commodities might have been affected by the oil price hike.

NCR																													
<p>The following observations were gathered from market vendors and administrators for the month of April:</p> <p>1. Overall, sufficient supply of fresh marine commodities were noted among the monitored retail markets this month. However, lesser volume was observed on the second and third week of the month which might be attributed to the following reasons: * occurrence of full moon on 17 April 2022; * bad weather condition brought about by the Low Pressure Area affecting MIMAROPA, Bicol, Visayas & Mindanao Regions and Tropical Storm Agaton affecting the rest of the country, thus, hampering the fishing operations; and * observance of Lenten season;</p> <p>2. Meanwhile, more supplies of local-fresh galunggong lakaki (Decapterus macrosoma) were observed at the monitored retail markets throughout the month. According to vendors, supplies for local-fresh galunggong unloaded at different fish ports are abundant or "Dagsa" following the lifting of closed fishing season last February 2022. On the other hand, presence of other local galunggong variant like "balsa" (Decapterus macarellus), "burot" (Decapterus kurroides) and " galunggong babae" (Decapterus russelli) was also recorded this month.</p> <p>3. Relatively, lesser supply of imported-frozen galunggong were observed throughout the month following the abundant (Dagsa) supply of local variants among the monitored retail markets.</p> <p>4. Availability of alumahan (Rastrelliger kanagurta) was consistently observed among the monitored retail markets this month. However, there remains to be large-sized of the commodity was observed to be the majority of the supply usually sourced from Malabon Fish Port.</p> <p>5. The prevailing retail prices of bangus and tilapia remained stable due to the sufficient supply and steady demand at the monitored retail markets this month. However, only large size bangus were available at Trabajo and Tandang Sora markets as vendors prefer selling larger sizes of the commodity due to higher demand at the said retail markets. Meanwhile, for Tilapia, all sizes were remain available. Moreover, there is still Php20-30/kg difference between live and dead tilapia.</p> <p>6. Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas c. Local Galunggong - Malabon & NavotasFish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port</p> <p>7. Fluctuations in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p>																													
General Observation																													
<p>Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.</p> <p>1. <i>Penaeus monodon</i> or Sugpo (Large to Jumbo) (Php650.00&800.00 /kg) - lowest prevailing price of Php 650.00/kg was recorded in Region 3, Region 9 and Region 10 wherein the available supply was smaller in size compared to Region 1, Region 4A and NCR wherein the said commodity are larger in size, hence, price is higher.</p> <p>2. <i>Katsuwonus pelamis</i> or Gulyasan (Sliced) (Php160.00&300.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 8, Region 10 and Region 13 wherein the available supply was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 1, Region 7 and NCR wherein the available supply was larger in size, hence, price is higher.</p> <p>3. <i>Acanthurus olivaceus</i> or Uring (Php 150.00-350.00 /kg) - lowest prevailing price of Php150.00/kg was recorded in Region 8 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower compared to Region 1 wherein the available supply was larger, hence, price is higher.</p> <p>4. <i>Alepis djebaba</i> or Salay batang(Php 220.00-380.00 /kg) - lowest prevailing price of Php 220.00/kg and highest prevailing price of Php 380.00/kg was recorded in NCR wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.</p> <p>5. <i>Carangoides ferdau</i> or Talakitok (Php 220.00-380.00 /kg) - lowest prevailing price of Php 220.00/kg and highest prevailing price of Php 380.00/kg was recorded in Region 5 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.</p> <p>6. <i>Carangoides fuvoquuttatus</i> or <i>Talakitok</i> (Php 250.00-380.00 /kg) - lowest prevailing price of Php250.00/kg was recorded in Region 9 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower compared to Region 10 wherein the available supply was larger in size, hence, price is higher.</p> <p>7. <i>Caranx ignobilis</i> or Talakitok (Php 280.00&450.00 /kg) - lowest prevailing price of Php280.00/kg was recorded in Region 2 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower compared to Region 4A wherein the available supply was larger in size, hence, price is higher.</p> <p>8. <i>Caranx sexfasciatus</i> or Talakitok (Php 250.00&350.00 /kg) - lowest prevailing price of Php 250.00/kg and highest prevailing price of Php 350.00/kg was recorded in Region 1 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.</p> <p>9. <i>Elagatis</i> sp. or Salmon (Php 160.00-300.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in NCR wherein the available supply was smaller in size compared to Region 4B.</p> <p>10. <i>Lethrinus nebulosus</i> or Katambak (Php 170.00-300.00 /kg) - lowest prevailing price of Php 170.00/kg was recorded in Region 8 due to ample supply of the said commodity as it was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 9 wherein the said commodity was larger in size, hence, price is higher.</p> <p>11. <i>Lethrinus</i> sp. or Kanuping (Php 130.00-400.00 /kg) - lowest prevailing price of Php 130.00/kg was recorded in Region 4B due to ample supply of the said commodity as it was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in NCR wherein the said commodity was larger in size and sourced from other other region, hence, price is higher.</p> <p>12. <i>Naso Unicornis</i> or Surahan (Php 160.00-300.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 8 due to ample supply of the said commodity as it was sourced within the locality and smaller in size. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 11 wherein the sai commodity was larger in size, hence, price is higher.</p> <p>13. <i>Nemipterus bathybius</i> or Bisugo (Php 140.00 - 400.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 8 due to ample supply as it was sourced within the locality, hence, price is lower compared to NCR.</p> <p>14. <i>Nemipterus nematopus</i> or Bisugo (Php 140.00 - 400.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in Region 4B due to ample supply as it was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Pgp 400.00/kg was recorded in Region 4A wherein the said commodity was larger in size, hence, price is higher.</p> <p>15. <i>Parupeneus</i> sp. or Saramulyete (Php 120.00 - 380.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 9 due to ample supply as it was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Pgp 380.00/kg was recorded in Region 11 wherein the said commodity was larger in size, hence, price is higher.</p> <p>16. <i>Priacanthus hamrur</i> or Bukawon (Php100.00-360.00/kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 5 due to ample supply as it was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Pgp 360.00/kg was recorded in NCR wherein the available supply was sourced from other region and larger in size, hence, price is higher.</p> <p>17. <i>Priacanthus tayenus</i> or Siga (Php80.00-500.00/kg)- lowest prevailing price of Php 80.00/kg was recorded in Region 4B wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.</p> <p>18. <i>Pterocaesio tile</i> or Dalagang Bukid Bilog (Php 100.00 - 280.00 /kg) -lowest prevailing price of Php 100.00/kg and highest prevailing price of Php 280.00/kg was recorded in Region 4A wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.</p> <p>19. <i>Ranina ranina</i> or Curacha (Php 300.00&500.00 /kg) - lowest prevailing price of Php 300.00/kg was recorded in Region 11 wherein the said commodity was smaller in size compared to Region 9.</p> <p>20. <i>Rastrelliger</i> sp. or Hasa-hasa (Php120.00-380.00/kg)- lowest prevailing price of Php 120.00/kg was recorded in Region 9 due to ample supply as it was sourced within the locality , hence, price is lower. Meanwhile, highest prevailing price of Pgp 380.00/kg was recorded in NCR wherein the available supply was sourced from other region and larger in size, hence, price is higher.</p> <p>21. <i>Sepia</i> sp. or Bagulan (Php 180.00-500.00 /kg) - lowest prevailing price of Php 180.00/kg was recorded in Region 8 due to smaller size of the said commodity compared to Region 9.</p> <p>22. <i>Teuthida</i> sp. or Pusit (Php 200.00-450.00 /kg) - lowest prevailing price of Php200.00/kg was recorded in Region 9 wherein ample supply of the said commodity as it was sourced within the localitry , hence price is lower compared to NCR.</p> <p>23. <i>Thunnus obesus</i> or Barilis (Php 150.00-450.00 /kg) - lowest prevailing price of Php 150.00/kg was recorded in Region 9 wherein the said commodity was smaller in size comapred to Region 13.</p> <p>24. <i>Thunnus orientalis</i> or Tatampal Pula(Php 200.00&320.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in NCR wherein the said commodity was smaller in size comapred to Region 11.</p> <p>25. <i>Venerupis</i> sp. or Halaan (Php 100.00&240.00 /kg) - lowest prevailing price of Php 100.00/kg and highest prevailing price of Php 240.00/kg was recorded in NCR wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.</p> <p>26. <i>Xiphias gladius</i> or Marlin (Php 240.00-500.00 /kg) - lowest prevailing price of Php 240.00/kg was recorded in Region 11 wherein the said commodity was smaller in size comapred to Region 12.</p>
