Remarks/Market Observations:

The following observations were gathered from market personnel and vendors this week:

- Sufficient volume of supplies were recorded for fresh marine commodities among the monitored retail markets this week. Moreover, more supplies of local-fresh galunggong were observed at the monitored retail markets. According to vendors, supplies for local-fresh galunggong unloaded at different fish ports are abundant or "Dagsa" following the lifting of closed fishing season last February 2022. There are other local galunggong variant like "balsa" (*Decapterus macarellus*), "burot" (*Decapterus kurroides*) and "babae" (*Decapterus russelli*).
- Lesser supply of imported-frozen galunggong were observed this week following the abundant (Dagsa) supply at the retail markets. Only Quinta, Balintawak, and Pasig Markets were recorded to have supply of imported-frozen galunggong sourced from Navotas Fish Port this week.
- Relatively, sufficient supply of alumahan were observed at the monitored retail markets. Most of the supply recorded are still large-sized (4-7pcs/kg).
- The prevailing retail prices of bangus and tilapia have remained stable due to the sufficient supply and stable demand at the monitored retail markets this week. Only large size bangus were available at Trabajo and Kamuning markets as vendors prefer selling larger sizes of the commodity due to higher demand at the said retail markets. For tilapia, all sizes were available. There is still Php20-30/kg difference between live and dead tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan
 - Tilapia - Batangas
 - Local Galunggong -Quezon Province, Navotas & Malabon Fish Port
 - Alumahan - Malabon Fish Port
- Low influx of buyers was continuously observed among the monitored retail markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
- Precautionary measures against COVID-19 (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented among monitored retail markets. precaution against COVID-19, safety measures (i.e., mandatory wearing of face masks and face shields, mandatory temperature checks, and regularly scheduled cleaning and disinfection) are continuously implemented among monitored markets.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

- Peneaus monodon* or Sugpo-small - (Php500.00/kg & Php700.00/kg) - both prevailing price were noted at Farmers Market, wherein the lowest prevailing of Php500.00/kg are reportedly smaller in size, as compared to the Php700.00/kg which are noted to have larger sizes, hence the higher price.
- Rastriliger kanagurta* or Alumahan - (Php300.00-400.00/kg) - both prevailing price were noted at Marikina Market, wherein the lowest prevailing of Php300.00/kg are reportedly smaller in size, as compared to the Php400.00/kg which are noted to have larger sizes, hence the higher price.
- Lethrinus sp.* or Kanuping - (Php150.00-400.00/kg) - lowest prevailing price of Php150.00/kg were recorded at primary type or "Bagsakan" Market (Malabon Retail Market) which usually offers at a lower price as it is directly sourcing to their nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php400.00/kg were noted from secondary Market (Guadalupe market) which is sourcing supplies only from its nearby primary markets (i.e., Farmers), resulting to offer commodity relatively higher.
- Venerupis sp.* or Halaan - (Php100.00-240.00/kg) - lowest prevailing price of Php100.00/kg were recorded at primary type or "Bagsakan" Market (Navotas Retail Market) which usually offers at a lower price as it is directly sourcing to their nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php240.00/kg were noted from secondary Market (Guadalupe market) which is sourcing supplies only from its nearby primary markets (i.e., Farmers), resulting to offer commodity relatively higher.

(-) - Price and Volume not available during price monitoring
 (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
 NA - Source Area not available during price monitoring
