Remarks/Market Observations:

The following observations were gathered from market personnel:

- At Navotas Fish Port (wholesale), sufficient unloadings of fresh marine commodities were observed this week. Commodities recorded were bisugo, tambakol, tulingan, pusit, espada, dalagang bukid, betilya, and others. For medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*), the prevailing wholesale price of the commodity ranged from Php120.00/kg to Php163.00/kg sourced from Northern Palawan, Quezon Province. Additionally, more supply were observed due to the expected "dagsa" this month (April). The wholesale price difference may be attributed to the source area and freshness of the commodity. There are also other local galunggong variants available like balsa, babae, and burot.
- Despite the sufficient supply of local-fresh galunggong at the Fish Port, supply of Imported-frozen galunggong remained available at the said fish port. There are still demand for imported galunggong due to its cheaper price making it easier to sell.
- Steady supply and demand for bangus and tilapia were observed resulting to a stable prevailing wholesale prices of bangus and tilapia at the Fish Port this week.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan, Bulacan
 - Tilapia - Batangas
 - Local galunggong- Northern Palawan, Quezon Province
 - Imported galunggong - China, Vietnam
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

(-) - Price and Volume not available during price monitoring
