Remarks/Market Observations:	<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>Ample volume of supplies of fresh marine commodities were still apparent among the monitored retail markets this week. As a result, ample displays of medium-sized local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>) were noted this week with a prevailing retail price of Php240.00/kg chiefly sourced from Navotas Fish Port and Quezon Province. There are other local galunggong variant like "balsa" (<i>Decapterus macarellus</i>), "burot" (<i>Decapterus kurroides</i>) and "babae" (<i>Decapterus russelli</i>). Evidently, abundant supplies of galunggong "Balsa" were recorded at the retail markets this week.</li> <li>Due to the abundant (dagsa) supply of local-fresh galunggong at the retail markets this week, only few retail markets were observed to have available supply of imported-frozen galunggong. Only Trabajo, Quinta, and Balintawak Retail Markets were recorded to have supply of imported-frozen galunggong sourced from Navotas Fish Port this week. Most of the supply recorded were still large-sized.</li> <li>Sufficient supply of alumahan sourced mostly from Quezon Province were still observed at the monitored retail markets this week.</li> <li>No changes were recorded at the prevailing retail prices of bangus and tilapia this week. This may be attributed to the sufficient supply and stable demand at the monitored retail markets. In Trabajo and Kamuning Markets, most of the available bangus were large size. Vendors prefer selling larger sizes due to higher demand. For tilapia, there is still Php20-30/kg difference between live and dead tilapia.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan</li> <li>Tilapia - Batangas</li> <li>Local Galunggong - Quezon Province, Navotas &amp; Malabon Fish Port</li> <li>Alumahan - Quezon Province</li> </ol> </li> <li>Low influx of buyers was continuously observed among the monitored retail markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.</li> <li>Nevertheless, market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</li> </ol> <p><b>General Observations:</b></p> <p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Thunnus albacares</i> or Tambakol - Head (Php110.00-300.00/kg) - lowest prevailing price of Php110.00/kg were recorded at Caloocan Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php300.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.</li> <li><i>Lutjanus sp.</i> or Maya - (Php400.00-500.00/kg) - lowest prevailing price of Php400.00/kg was recorded in Mandaluyong &amp; Pasig Markets where the available supplies were medium in size which resulted to lower price. Highest prevailing price of Php500.00/kg was noted at Munoz &amp; Kamuning Market where available supplies were mostly large-sized sourced from Lucena, which resulted to a higher price.</li> <li><i>Venerupis sp.</i> or Halaan - (Php100.00-240.00/kg) - lowest prevailing price of Php110.00/kg were recorded at Commonwealth Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php240.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.</li> </ol>																								
	<p>(- ) - Price and Volume not available during price monitoring  (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  NA - Source Area not available during price monitoring</p>
