		Female	80	80	80	83	80	-	China and Vietnam

Remarks/Market Observations:

The following observations were gathered from market personnel:

- Abundant unloading of fresh marine commodities were noted at Navotas Fish Port (wholesale) this week. Among the fishery commodities observed were matambaka, dalangang bukid, balsa, burot, tulingan, hiwas, pusit, tamban, and others. More specifically, for medium-sized local fresh galunggong lalaki (*Decapterus macrosoma*) adequate supply was noted this week sourced from Quezon Province, Cuyo Pass, Northern and Southern Palawan.
- On the other hand, there remains to have sufficient unloading of medium-sized imported-frozen galunggong lalaki (*Decapterus macrosoma*) and galunggong babae (*Decapterus russelli*) observed at the fish port this week with a prevailing wholesale price of Php110.00 & 140.00/kg and Php80.00/kg, respectively.
- Still, no unloadings of medium-sized alumahan (*Rastrilleger kanagurta*) was observed at the wholesale level throughout the week.
- Meanwhile, ample supply of bangus was still noted at the fish port this week. However, large-sized of the commodity was observed to be the majority of the supply sourced from Pangasinan and Bulacan.
- For tilapia steady prevailing wholesale price was recorded this week as the supply for the said commodity continued to be sufficient.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan, Bulacan
 - Tilapia - Batangas
 - Local Galunggong- Palawan
 - Alumahan- NA
 - Imported galunggong - China and Vietnam
- Precautionary measures (e.g., wearing of face mask and face shields as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection) were continuously implemented by the Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex to safeguard vendors and buyers against COVID-19.

Note: Wholesale price data is as of May 15 & 22, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
