REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-MAY 2-6, 2022

Prices of fishery commodities were stable.

Low influx of buyers were observed during the conduct of price monitoring.

Some fish vendors sold their products at their respective community/barangay. Others, unsold fish products in the public market were brought to their homes and sold it thru online (by collecting orders) and deliver it to consumers.

Since CAR is a landlocked Region, the provinces rely only on shipment coming from the nearby coastal regions. Therefore, fish commodities present and available in the 3 major markets depends on delivery. Probably we usually record low volume of fishery commodities in the markets.

WEEK 3-MAY 16-20, 2022

Steady supply and demand were observed during the conduct of monitoring.

Some fish vendors sold their products at their respective community/barangay. Others, unsold fish products in the public market were brought to their homes and sold it thru online (by collecting orders) and deliver it to consumers.

Moreover, CAR is a landlocked Region, the provinces rely only on shipment coming from the nearby coastal regions. Therefore, fish commodities present and available in the 3 major markets depends on delivery. Probably we usually record low volume of fishery commodities in the markets.

WEEK 4-MAY 23-27, 2022

Stable prices of fishery commodities were still noted this week.

R1

WEEK 1-MAY 2-6, 2022

In Vigan City Public Market, most of fishery commodities were from Dagupan City; Tilapia was not available in the market during the monitoring; supply of fishery commodities were sufficient.

Prices of some fishery commodities in Laoag City Commercial Complex decreased due to the increase in the supply of marine commodities during the monitoring.

However, low supply of fresh marine commodities were observed at Magsaysay Public Market, which might be due to strong winds/waves.

No changes were recorded in the prices of fishery commodities in San Fernando City Public Market during the monitoring.

WEEK 2-MAY 9-13, 2022

Few buyers were observed at the monitored markets this week.

Minimal but sufficient supply of fishery commodities were noted in Magsaysay market which might be due to the minimal fishing operation.

WEEK 3-MAY 16-20, 2022

Supply of fishery commodities were low as noted in Magsaysay Market.

WEEK 4-MAY 23-27, 2022

No availability of shellfish in Bolinao Public Market, Bolinao, and Pangasinan due to the occurrence of Red Tide in the mentioned areas.

R2

WEEK 2-MAY 9-13, 2022

It was observed that local-fresh galunggong was noted in Claveria.

Meanwhile, frozen galunggong noted in Cagayan province.

R4A

WEEK 2-MAY 9-13, 2022

Sufficient supply of fishery commodities were observed at the monitored retail markets this week.

As a result, prices of fishery commodities were stable.

On the other hand, it was noted that prices of marine commodities have increased which might have been affected by the oil price hike in the country.

WEEK 4-MAY 23-27, 2022

Some of the fishery commodities have price increment, which might have been due to the oil price hike in the country.

R9
WEEK 1-MAY 2-6, 2022
Less volume of fish catch/traded in the market resulting to high price.
Prices of fish retailed depends on its quality and sizes.
Few fish stalls were observed open in the wet market of the Province of Zamboanga.
Zamboanga City and other Provinces are now on Alert Level 1 & 2, people who are fully vaccinated with facemask can go to public places and in market.
WEEK 2-MAY 9-13, 2022
Due to the minimal supply, prices of fishery commodities increased this week.
Prices may have been affected by the varying sizes and quality in terms of freshness.
Few fish stalls were observed open dueing the conduct of price monitoring.
Nevertheless, Zamboanga City and other Provinces are now on Alert Level 1 & 2, people who are fully vaccinated with facemask can go to public places.
WEEK 3-MAY 16-20, 2022
Due to the bad weather condition, traded and catch of fishery commodities were hampered.
Few fish stalls were noted during the conduct of price monitoring and inspection.
Zamboanga City and other Provinces is now on Alert Level 1 & 2, people who are fully vaccinated with facemask can go to public places and in market.
WEEK 4-MAY 23-27, 2022
Sufficient volume of fish catch/traded in the market resulting to moderate price.
As per interview with some fish stall owners, some fish traders prefer to ship out their commodity to other region to recover the capital atleast even though the fuel price is high than to sell it cheaply in the local market resulting to low profit.
Prices of fish retailed depends on its quality and size.
Few fish stalls were still apparently oserved in the province of Zamboanga.
Zamboanga City and other provinces are now on Alert Level 1 & 2, people who are fully vaccinated with facemask can go to public places and in market.

R10
WEEK 1-MAY 2-6, 2022
Sufficient supply of fresh fishery commodities were recorded among the monitored retail markets this week.
In fact, ample supply of galunggong was observed this week. Additionally, among the recorded fishery commodities were skipjacks, bigeyed scad, eastern little tunas, stipped bonito tuna, and yellow fin tunas.
For bangus and tilapia, the commodities remained available in the region.
WEEK 2-MAY 9-13, 2022
Adequate supply of fishery commodities were observed among the monitored retail markets this week.
In fact, abundant supply of bangus and galunggong were noted.
Other marine fishery commodities were also noted such as skipjacks, bigeyed scads, eastern little tunas, stipped bonito tuna, shrimps, yellow fin tunas, and others.
WEEK 4-MAY 23-27, 2022
Adequate supply of fishery commodities were still noted this week.
Fishery commodities observed were skipjack, bigeyed scad, eatern little tunas, stipped bonito tuna, shrimp, yellow fin tuna, and others.

R11
WEEK 1-MAY 2-6, 2022
Ample supply of fishery commodities were observed this week.
WEEK 2-MAY 9-13, 2022
In general, ample quantity of fishery commodities were recorded at the monitored retail markets this week.
Total landed volume inside the wet market only reflects from the monitored stalls only.
WEEK 3-MAY 16-20, 2022
As observed, some fishery commodities such as tuna and squid have high prices due to limited supply and a distant source.
Other commodities were observed sufficient.
Total landed volume inside the wet market only reflects from the monitored stalls only.
WEEK 4-MAY 23-27, 2022
Sufficient quantity of fishery commodities were observed in the monitored markets.
Some of the recorded fishery commodities were remaining stocks from previous market days.
Total landed volume inside the wet market only reflects from the monitored stalls only.

R13
WEEK 1-MAY 2-6, 2022
Low demand for fishery commodities were observed this week.
Prices of recorded fishery commodities may have been affected by the oil price hike in the country.
Lastly, some provinces have minimal supply of fishery commodities. This could have been possibly due to the inclement weather condition more specifically in Siargao City/ Tandag City.
WEEK 2-MAY 9-13, 2022
Low demand for fishery commodities were still observed this week.
Prices of recorded fishery commodities may have been affected by the oil price hike in the country.
Lastly, some provinces have minimal supply of fishery commodities. This could have been possibly due to the inclement weather condition more specifically in Siargao City/ Tandag City.
WEEK 3-MAY 16-20, 2022
Some provinces have lack of supply for fishery commodities, which could have been attributed to the inclement weather condition specially in Siargao City, Surigao del Sur .

NCR
The following observations were gathered from market vendors and administrators for the month of April:
1. Generally, the supply of fresh marine commodities remained sufficient among the monitored retail markets throughout the whole month despite the rainy weather condition. Specifically, abundant displays of medium-sized local-fresh galunggong lalaki (Decapterus macrosoma) were observed this month chiefly sourced from Navotas Fish Port and Quezon Province. There are other local galunggong variant like "balsa" (Decapterus macarellus), "burot" (Decapterus kurroides) and "babae" (Decapterus russelli). Evidently, abundant supplies of galunggong "Balsa" were noted at the retail markets this month.
2. As a result, only few retail markets were observed to have available supply of imported-frozen galunggong. Only Trabajo, Quinta, and Balintawak Retail Markets were recorded to have supply of imported-frozen galunggong sourced from Navotas Fish Port this month. Most of the supply recorded were still large-sized.
3. Availability of medium-sized alumahan (Rastrelliger kanagurta) was consistently observed this month among the monitored retail markets majorly sourced from Malabon Fish Port. On the other hand, large-sized of the commodity remain the majority of the supply observed. Nevertheless, presence of other variant i.e., Hasa-hasa (Rastrelliger brachysoma) was also observed this month.
4. No changes were recorded at the prevailing retail prices of bangus and tilapia this month. This may be attributed to the sufficient supply and stable demand at the monitored retail markets. In Trabajo and Kamuning Markets, most of the available supply of bangus were large size. Vendors prefer selling larger sizes due to higher demand. For tilapia, there is still Php20-30/kg difference between live and dead tilapia. Also, there is a Php10.00/kg difference between the price of tilapia from Pampanga compared to tilapia sourced from Batangas as consumers mostly prefer buying tilapia from Batangas due to the better quality (in terms of taste) which commands a higher price.
5. Few buyers/consumers were observed on the 2nd week of the month plus some of the fish vendors did not open their stalls, which might be due to the recent 2022 National Elections.
6. Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas:
a. Bangus - Bulacan, Pangasinan
b. Tilapia - Batangas
c. Local Galunggong - Malabon & NavotasFish Port
d. Imported Galunggong - Navotas Fish Port
e. Alumahan - Malabon Fish Port

General Observation

Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.

- Scylla serrata* or Alimango (Male) (Php400.00&600.00 /kg) - lowest prevailing price of Php 400.00/kg was recorded in Region 9, Region 10 and Region 13 wherein the available supply was smaller in size, hence, price is low. Meanwhile, highest prevailing price of Php 600.00/kg was recorded in Region 3, Region 11 and NCR wherein the said commodity are larger in size, hence, price is higher.
- Scylla serrata* or Alimango (Female) (Php700.00&800.00 /kg) - lowest prevailing price of Php 700.00/kg was recorded in Region 4B, Region 9 and Region 10 wherein the available supply was smaller in size, hence, price is low. Meanwhile, highest prevailing price of Php 800.00/kg was recorded in Region 3, Region 10 and Region 11 wherein the said commodity are larger in size, hence, price is higher.
- Acanthurus olivaceus* or Uring (Php 140.00-300.00 /kg) - lowest prevailing price of Php140.00/kg was recorded in Region 8 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower compared to Region 1 wherein the available supply was larger in size, hence, price is higher.
- Alepes vari* or Salay (Php 200.00-400.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 400.00/kg was recorded in Region 4A wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Amblygaster sirm* or Turay (Php 220.00&360.00 /kg) - lowest prevailing price of Php 220.00/kg and highest prevailing price of Php 360.00/kg was recorded in NCR wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Aprion verescens* or Olong-olong (Php 200.00-400.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 400.00/kg was recorded in Region 8 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Carangoides armatus* or Talakitok (Php 220.00-450.00 /kg) - lowest prevailing price of Php220.00/kg was recorded in Region 4B wherein the said commodity was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 450.00/kg was recorded in Region 4A wherein the available supply was larger in size, hence, price is higher.
- Gerres* sp. or Latab (Php 160.00-300.00 /kg) - lowest prevailing price of Php160.00/kg was recorded in Region 9 wherein the said commodity was sourced within the locality, hence, price is lower compared to NCR wherein the available supply was sourced from other region, hence, price is higher.
- Glossogobius giurris* or Pijang (Php 120.00&500.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 13 due to ample supply of the said commodity as it was sourced within the locality, hence, price lower. Meanwhile, highest prevailing price of Php 500.00/kg was recorded in NCR wherein the available supply weas sourced from other region, hence, price is higher.
- Leiognathus equulus* or Sapsap (Php 80.00-300.00 /kg) - lowest prevailing price of Php 80.00/kg and highest prevailing price of Php 300.00/kg was recorded in Region 6 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Mugil cephalus* or Bolasi (Php 180.00-350.00 /kg) - lowest prevailing price of Php 180.00/kg was recorded in Region 1 due to ample supply of the said commodity as it was sourced within the locality, hence, price lower. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in NCR wherein the available supply weas sourced from other region, hence, price is higher.
- Naso Unicornis* or Surahan (Php 200.00&300.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 8 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower compared to Region 11.
- Nemipterus japonicus* or Bisugo (Php 180.00-320.00 /kg) - lowest prevailing price of Php 180.00/kg and highest prevailing price of Php 320.00/kg was recorded in Region 4A wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Nemipterus nemurus* or Bisugo (Php 150.00 &250.00 /kg) - lowest prevailing price of Php 150.00/kg and highest prevailing price of Php 250.00/kg was recorded in Region 9 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Pinna bicolor* or Baloko (Php 160.00&320.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 5 due to ample supply of the said commodity as it was sourced within the locality, hence, price lower. Meanwhile, highest prevailing price of Php 320.00/kg was recorded in NCR wherein the available supply was sourced from other region, hence, price is higher.
- Pterocaesio chrysozona* or Dalagang Bukid Bilog (Php 230.00 - 400.00 /kg) - lowest prevailing price of Php 230.00/kg was recorded in Region 2 wherein the available supply was smaller in size, hence price is lower. Meanwhile, highest prevailing price of Php. 400.00/kg was recorded in Region 4A wherein the said commodity was larger in size and relatively better in quality in terms of freshness, hence, price is higher.
- Pterocaesio digramma* or Dalagang Bukid Bilog (Php 180.00 - 300.00 /kg) - lowest prevailing price of Php 180.00/kg was recorded in Region 6 wherein the available supply was smaller in size, hence price is lower. Meanwhile, highest prevailing price of Php. 300.00/kg was recorded in Region NCR wherein the said commodity was larger in size, hence, price is higher.
- Rastrelliger* sp. or Hasa-hasa (Php 120.00 - 360.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 9 wherein the available supply was smaller in size, hence price is lower. Meanwhile, highest prevailing price of Php. 360.00/kg was recorded in Region 4A wherein the said commodity was larger in size, hence, price is higher.
- Salmo salar* or Salmon (Belly) (Php 230.00-360.00 /kg) - lowest prevailing price of Php 230.00/kg and highest prevailing price of Php 360.00/kg was recorded in Region 4A wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Siganus vermiculatus* or Malaga (Php 200.00-380.00 /kg) - lowest prevailing price of Php 200.00/kg and highest prevailing price of Php 380.00/kg was recorded in Region 1 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Stolephorus indicus* or Dilis (Php100.00&250.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 8 due to ample supply of the said commodity as it was sourced within the locality, hence, price is lower compared to Region 4A.
- Teuthida* sp. or Pusit (Php 120.00 - 400.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 11 due to ample supply as it was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php. 400.00/kg was recorded in Region NCR wherein the said commodity was sourced from other region and larger in size, hence, price is higher.
- Thunnus* spp. or Caraw (Php 220.00-400.00 /kg) - lowest prevailing price of Php 220.00/kg and highest prevailing price of Php 400.00/kg was recorded in Region 11 wherein prices varies from it sizes, quality of the fish(in terms of freshness) and abundant of supply.
- Upeneus mollicensis* or Saramulyete (Php 160.00-300.00 /kg) - lowest prevailing price of Php 160.00/kg was recorded in Region 8 wherein the said commodity was smaller in size compared to Region 7.
