Remarks/Market Observations:

The following observations were gathered from market personnel and vendors this week:

1. Sufficient volume of supply for fresh marine commodities were still observed at the monitored retail markets this week despite the rainy weather condition. Specifically, ample displays of medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*) were noted this week (dagsa). Other local galunggong variant like "balsa" (*Decapterus macarellus*) was evidently abundant this week.
2. Only Trabajo Market was recorded to have an available supply of imported-frozen galunggong. This may be attributed to the abundant (dagsa) supply of local-fresh galunggong at the monitored retail markets this week. Supply available were only large-sized.
3. Supply of alumahan remained sufficient among the monitored retail markets. Most of the supply were still large-sized sourced from Quezon Province.
4. The prevailing retail prices of bangus and tilapia remained stable due to the steady supply and demand at the retail markets. Most of the supply of bangus being sold at Kamuning and Galas Markets were large size as some vendors prefer selling larger sizes due to higher demand. For tilapia, there is still Php20-30/kg difference between live and dead tilapia.
5. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - a. Bangus - Bulacan
 - b. Tilapia - Batangas
 - c. Local Galunggong - Quezon Province, Navotas & Malabon Fish Port
 - d. Alumahan - Quezon Province
6. Low influx of buyers was continuously observed among the monitored retail markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
7. Nevertheless, market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

1. *Scylla serrata* or Alimango - mixed (Php500.00-600.00/kg) - both prevailing price were noted at Guadalupe Market, wherein the lowest prevailing of Php500.00/kg are reportedly smaller in size, as compared to the Php600.00/kg which are noted to have larger sizes, hence the higher price.
2. *Rastriliger kanagurta* or Alumahan (Php120- Php250/kg) - lowest prevailing price of Php120.00/kg was recorded in Caloocan Market where the available supplies were not in good quality which resulted to lower price. Highest prevailing price of Php250.00/kg was noted at Malabon Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price.
3. *Amblygaster sirm* or Turay (Php220.00-360.00/kg) - both prevailing price were noted at Guadalupe Market, wherein the lowest prevailing of Php220.00/kg are reportedly smaller in size, as compared to the Php360.00/kg which are noted to have larger sizes, hence the higher price.
4. *Mugil cephalus* or Banak (Php220.00-350.00/kg) - lowest prevailing price of Php220.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php350.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.

(-) - Price and Volume not available during price monitoring

(*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA - Source Area not available during price monitoring
