The following observations were gathered from market personnel and vendors this week:

- In general sufficient volume of fresh marine commodities were still observed among the monitored retail markets this week. More specifically, for local-fresh galunggong lalaki (*Decapterus macrosoma*), adequate volumes of were recorded in all monitored retail markets this week. This resulted to the decreased in the prevailing retail price of local-fresh galunggong at Php180.00-200.00/kg. Majority of the supplies observed were obtained from Lucena (Quezon), Malabon, and Navotas Fish Ports. Other local galunggong variant like "balsa" (*Decapterus macarellus*) was evidently abundant this week.
- For medium-sized imported-frozen galunggong lalaki, the commodity remained unavailable among the monitored retail markets this week. This might be attributed to the adequate availability of local-fresh galunggong and its other local variants (i.e., balsa, burot) which is mostly preferred by consumers/buyers. Only Mega-Q Market was recorded to have an supply of large-sized imported-frozen galunggong.
- Supplies of medium-sized alumahan continued to be available in the monitored retail markets this week. The recorded prevailing retail price of the commodity ranged from Php200.00/kg to Php280.00/kg derived from Zambales and Malabon Fish Port, respectively. The price difference could be attributed to the varying quality (in terms of freshness and sizes) and source area.
- Supply of alumahan remained sufficient among the monitored retail markets. Most of the supply were still large-sized sourced from Quezon Province.
- No changes were recorded for the prevailing retail prices of bangus and tilapia this week. This may be due to the stable demand plus the sufficient supply at the retail markets. Majority of the supplies available for bangus at Kamuning, Munoz, and Galas Markets are large-sized as vendors prefer selling larger sizes due to higher demand from the consumers. For tilapia, there is still Php20-30/kg difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan, Pangasinan
 - Tilapia - Batangas
 - Local Galunggong -Quezon Province, Navotas & Malabon Fish Port
 - Alumahan - Quezon Province
- The demand for fishery commodities were still low among the monitored markets this week. As a result, vendors are coping by selling modest volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

- Amblygaster sirm* or Turay (Php220.00-360.00/kg) - both prevailing price were noted at Guadalupe Market, wherein the lowest prevailing of Php220.00/kg are reportedly smaller in size, as compared to the Php360.00/kg which are noted to have larger sizes, hence the higher price.
- Glossogobius giuris* or Pijanga/Bias (Php240- Php500/kg) - lowest prevailing price of Php240.00/kg was recorded in Marikina Market where the available supplies were not in good quality which resulted to lower price. Highest prevailing price of Php500.00/kg was noted at Guadalupe Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price.
- Mugil cephalus* or Banak (Php200.00-350.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php350.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.

(-) - Price and Volume not available during price monitoring
 (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
 NA - Source Area not available during price monitoring
