		Male	120	120	120	120	120	-	China and Vietnam
		Female	80	75	75 & 80	80	75	-	China and Vietnam

Remarks/Market Observations:

The following observations were gathered from market personnel:

- In general, sufficient volume of fresh marine commodities were unloaded at Navotas Fish Port this week. Among the fishery commodities recorded were gulyasan, tulingan, matambaka, pusit, lapad, balsa, burot, tamban, babae, bilog, espada, betilya, and others. For local-fresh galunggong lalaki (*Decapterus macrosoma*), only one (1) broker unloaded the medium-sized commodity at the fish port on June 6, 2022 at wholesale price of Php100.00/kg and Php175.00/kg on June 13, 2022 both sourced from Northern Palawan. On the other hand, majority of the supply observed on June 6, 2022 were small sizes.
- Meanwhile, unloading of imported-frozen galunggong lalaki (*Decapterus macrosoma*) and babae (*Decapterus russelli*) remained sufficient at the Fish Port this week despite the adequate availability of local-fresh galunggong and its varinats (i.e., balsa).
- For alumahan, no medium-sized of the commodity was still noted at the Fish Port this week.
- For bangus, sufficient supply was observed this week sourced from Laguna, Bulacan, and Pangasinan. As a result, stable prevailing wholesale price was still recorded.
- Similarly, steady prevailing wholesale price for medium-sized tilapia was recorded this week sourced mainly from Batangas.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Pangasinan, Bulacan
 - Tilapia - Batangas
 - Local Galunggong- Northern Palawan
 - Alumahan- NA
 - Imported galunggong - China and Vietnam
- Precautionary measures (e.g., wearing of face mask and face shields as well as white boots and shirts, mandatory temperature checks, and regularly scheduled cleaning and disinfection) were continuously implemented by the Philippine Fisheries Development Authority (PFDA) at Navotas Fish Port Complex to safeguard vendors and buyers against COVID-19.

Note: Wholesale price data is as of June 6 & 13, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
