**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- Adequate display of fresh marine commodities were observed among the monitored retail markets this week. More specifically, for medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*), sufficient volumes sourced from Navotas and Malabon Fishports and Quezon were recorded in all monitored retail markets this week. This resulted to a sustained prevailing retail price of Php180.00-200.00/kg compared from previous week. Other local galunggong variant like "balsa" (*Decapterus macarellus*) was recorded this week.
- For medium-sized imported-frozen galunggong, the commodity was only available in Mega-Q Market at stable actual retail price of Php180.00/kg sourced from Navotas Fish Port. Less supply for imported-frozen was observed due to the adequate supply of local-fresh galunggong which is more preferred by consumers/buyers. Only Mega-Q Market was recorded to have an supply of large-sized imported-frozen galunggong.
- There is still sufficient supply of medium-sized alumahan sourced from Malabon and Navotas Fish Ports at the monitored retail markets this week. The prevailing retail price decreased this week as supplies were mostly sourced from Navotas fish port. Supplies available for the said commodity were mostly large-sized. The variation of prices could be due to the difference in quality (in terms of freshness) and source area of the unloaded supplies. Moreover, fresh marine commodities sourced from Lucena (Quezon) command good prices due to shorter transit period to Metro Manila (as compared to distant source area such as Palawan and Zamboanga).
- The prevailing retail prices of aquaculture commodities, bangus and tilapia, remained unchanged due to the stable demand plus the sufficient supply at the retail markets. Larger sizes is still being observed at Kamuning and Galas Market due to the higher demand from the consumers. For tilapia, there is still Php20-30/kg difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas
  - Local Galunggong -Quezon Province, Navotas & Malabon Fish Port
  - Alumahan - Quezon Province
- Low influx of buyers was continuously observed among the monitored retail markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Penaeus monodon* or Sugpo-large (Php720.00-1100.00/kg) - lowest prevailing price of Php720.00/kg was recorded in Marikina Market where the available supplies were not in good quality which resulted to lower price. Highest prevailing price of Php1100.00/kg was noted at Guadalupe Market where available supplies were in good quality sourced from Lucena, which resulted to a higher price.
- Auxis thazard* or Tulingan (Php160.00-280.00/kg) - lowest prevailing price of Php160.00/kg were recorded at Malabon & Pasig Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php280.00/kg were noted from secondary Markets, Guadalupe and Marikina markets which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.
- Scomberomorus commerson* or Tangigue (Php460.00-650.00/kg) - lowest prevailing price of Php460.00/kg were recorded at Pasig Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php650.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.
- Amblygaster sirm* or Turay (Php100.00-360.00/kg) - both prevailing price were noted at Guadalupe Market, wherein the lowest prevailing of Php100.00/kg are reportedly smaller in size, as compared to the Php360.00/kg which are noted to have larger sizes, hence the higher price.
- Metapenaeus ensis* or Suwaha (Php400.00-500.00/kg) - both prevailing price were noted at Malabon Market, wherein the lowest prevailing of Php400.00/kg are reportedly smaller in size, as compared to the Php500.00/kg which are noted to have larger sizes, hence the higher price.

(-) - Price and Volume not available during price monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring
