**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- Generally, minimal quantities of fresh marine commodities were observed among the monitored retail markets this week. This could still be due to the bad weather condition brought about by the Low Pressure Area (LPA) and Southwest Monsoon or habagat affecting Ilocos Region, Cordillera Administrative Region, Cagayan, Zambales, Bataan, Cavite, Occidental Mindoro, Palawan, Metro Manila and the rest of the country. As a result, retail prices of fresh marine commodities were reportedly high due to the minimal supplies at different fishports. The continuous increased in petroleum gas throughout the country also contributed to the increased in price of fishery commodities.
- For medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*), low volume of supply were noted at the monitored retail markets this week. This resulted to an increased in the prevailing retail price at Php280.00/kg sourced mostly from Malabon and Navotas Fish Port. Other local galunggong variants like "balsa" (*Decapterus macarellus*) and "burot" (*Decapterus kurroides*) were recorded this week.
- More supply of imported-frozen galunggong were recorded among the monitored retail markets due to the minimal supply of local-fresh galunggong this week. Some of the vendors prefer selling imported-frozen galunggong due to its cheaper price making it easier to sell to buyers. Supplies were available at Trabajo, Mega-Q, Balintawak, Munoz, and Malabon Markets.
- Adequate supply of alumahan mainly sourced from Malabon and Navotas Fish Ports were observed this week. Most of the supplies available were still large-sized. The variation of prices could be due to the difference in quality (in terms of freshness) and source area of the unloaded supplies.
- There is an increased in the prevailing retail price of bangus this week compared from previous week. This may be attributed to the low supply of fresh marine commodities this week, where price of aquaculture commodities increased as they are considered a substitute commodity for marine commodities. Larger sizes is still being observed at Kamuning and Galas Market due to the higher demand from the consumers.
- For tilapia, prevailing retail price remained stable due to the sufficient supply and stable demand at the market. There is still Php20-30/kg difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas
  - Local Galunggong - Quezon Province, Navotas & Malabon Fish Ports
  - Alumahan - Malabon Fish Port
- Low influx of buyers was continuously observed among the monitored retail markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Gerres oyena* or Latab/Lamas (Php220.00-350.00/kg) - lowest prevailing price of Php220.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php350.00/kg were noted from secondary Market, Guadalupe market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.
- Jagora asperata* or Suso pilipit (Php60.00-200.00/kg) - lowest prevailing price of Php60.00/kg were recorded at Commonwealth Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Navotas Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.
- Leiognathus sp.* or SapSap (Php380.00-480.00/kg) - lowest prevailing price of Php380.00/kg was recorded in Tandang-Sora & Mega-Q Markets where the available supplies were not in good quality which resulted to lower price. Highest prevailing price of Php480.00/kg was noted at Mandaluyong & Marikina Markets where available supplies were in good quality sourced from Lucena, which resulted to a higher price.
- Mene maculata* or Chabeta (Php140.00-300.00/kg) - lowest prevailing of Php100.00/kg was observed at Balintawak market wherein supplies reported were smaller in size and imported resulting to lower price. Highest prevailing price of Php360.00/kg which are noted at Marikina Market have larger sizes, hence the higher price.

(-) - Price and Volume not available during price monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring

Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators  
 Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators
