Remarks/Market Observations	<p>The following observations were gathered from market vendors and administrators for the month of July:</p> <p>1. Overall, limited supplies of fresh marine commodities were observed among the monitored retail markets this month. This could have been caused by the inclement weather condition brought about by the occurrence of Low Pressure Area (LPA) noted in the first to third week of the month. As a result, retail prices of fresh marine commodities were reportedly high this month. Consequently, for medium-sized local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>), the recorded retail price of the commodity increased from Php200.00/kg last month (June) to Php280.00/kg this month (July). Supplies of local-fresh galunggong lalaki this month were reportedly sourced from Navotas Fish Port, Malabon Fish Port, and Lucena (Quezon). The price increment may have been attributed to the bad weather condition and the continuous oil price hike in the country.</p> <p>2. Meanwhile, supplies of imported-frozen galunggong lalaki (<i>Decapterus macrsoma</i>) were recorded in selected wet markets this month particularly, in Mega-Q, Balintawak, and Muñoz Markets, wherein vendors are opting to sell imported variant due to cheaper price making it easier for them to sell.</p> <p>3. On the other hand, large-sized alumahan continued to be the majority of the supplies among the monitored retail markets observed this month. Nevertheless, medium-sized alumahan was consistently noted particularly in Muñoz Market this month.</p> <p>4. For aquaculture commodities (i.e., bangus and tilapia), stable prices were still recorded as the supplies and demand for both commodities remained stable this month. Moreover, only large-sized bangus was commonly noted in Trabajo, Quinta, and Tandang Sora markets, wherein vendors prefer selling larger size which are reported to have better demand in said markets. Meanwhile, for tilapia there remains to have ten (10) to twenty (20) pesos difference between tilapia from Batangas and Pampanga. Further, price of commodity sourced from Batangas range to Php120.00-130.00/kg are reportedly have better demand in the market due to its premium quality in terms of taste, while price of tilapia from Pampanga ranges to Php100.00-110.00/kg, noted to have lesser demand in the market.</p> <p>5. Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas c. Local Galunggong - Malabon & Navotas Fish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port</p> <p>6. Fluctuations in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. *<i>Portunus pelagicus</i> or Alimasag (Small) - (Php200.00/kg - Php400.00/kg) - Highest prevailing price of Php400.00/kg was recorded in the first week of the month wherein supplies observed were larger sizes (small-medium) resulting to offer relatively higher. Meanwhile, lowest prevailing price of Php200.00/kg was noted in the third week of the month wherein supply observed were smaller sizes, resulting to offer in a lower price. *<i>Acetes</i> spp. or Alamang (Php60.00/kg & 160.00/kg) - lowest prevailing price of Php60.00/kg were recorded from Malabon Market where supplies are directly sourced from Malabon Market (primary). Highest prevailing price of Php160.00/kg was noted at Marikina Markets where available supplies were in good quality sourced from Lucena, which resulted to a higher price. * <i>Letrinus</i> or Betilya - (Php120.00/kg - Php350.00/kg) - Lowest prevailing price of Php120.00/kg was noted in the third week of the month wherein small size of the commodity was noted. Meanwhile, highest prevailing price of Php350.00/kg was noted in the fourth week of the month wherein larger size of the commodity was recorded, hence offer in a higher price.</p> <p>7. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</p>
