Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Despite the relaxation of COVID-19 in the region, low influx of buyers were continuously observed among the monitored retail markets this week. That is why, fish vendors tend to purchase lower volumes of fishery commodities to ensure that all of the commodities will be sold out by the end of the day to avoid losses. Moreover, some of the displayed fishery commodities in the wet markets were remaining stocks from previous market days. Nevertheless, minimal but sufficient supplies of fresh fishery commodities were observed the entire week. However, abundant "dagsa" supplies of yellowfin tuna (<i>Thunnus albacares</i>) were noted on 16 September 2022 at Commonwealth Market obtained from Malabon Fish Port and Navotas Fish Port. Meanwhile, minimal availability of medium-sized local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>) was noted on 16 September (Friday) this week. In fact, fish vendors particularly in Farmers and Mega-Q Markets opted to purchased imported-frozen galunggong due to minimal availability of local galunggong. Unloadings of medium-sized alumahan were still noted at the monitored retail markets this week. Further, other variant such as hasa-hasa (<i>Rastrilliger brachysoma</i>) was also recorded. For medium-sized bangus, the commodity was available throughout the monitoring days this week. On the other hand, for medium-sized tilapia, majority of the displayed commodity was derived from Pampanga due to its cheaper price making it easier to sell at the retail markets. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ul style="list-style-type: none"> a. Bangus - Dagupan, Bulacan b. Tilapia - Batangas c. Local Galunggong - Malabon and Navotas Fish Port d. Alumahan - Malabon and Navotas Fish Port Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others. 																							
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Scylla serrata</i> or Alimango (Female)- (Php550.00-900.00/kg)- Lowest prevailing price of Php550.00/kg was noted in Malabon Fish Port wherein supplies are observed to have smaller size as compared to the supplies noted in Farmers market wherein recorded the prevailing price of Php900.00/kg sourced from Roxas. <i>Acetes</i> spp. or Alamang- (Php60.00-Php160.00 /kg)- Significant difference of the recorded retail prices may be due to the varying quality (in terms of sizes and freshness) of the commodity. <i>Jagora asperata</i> or Suso pilipit- (Php100.00 - 200.00/kg)- Similarly, smaller sizes of the commodity were noted in Malabon Central market wherein recorded lowest prevailing price of Php100.00/kg sourced from Malabon Fish Port. Meanwhile, the highest prevailing price of Php200.00/kg recorded in Marikina market were observed larger sizes of the commodity sourced from Cavite. 																							

(-) - Price and Volume not available during price monitoring
(*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
NA - Source Area not available during price monitoring
