Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Overall, minimal quantities of fresh marine commodities were observed among the monitored retail markets this week. This could be due to the bad weather condition brought about by Southwest Monsoon or Habagat affecting Metro Manila, Zambales, Bataan, Cavite, Batangas, Occidental Mindoro, northern portion of Palawan including Kalayaan Islands, and the rest of the country. For local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>), sufficient supply were still recorded among the monitored retail markets this week despite the bad weather condition brought by Southwest Monsoon. This resulted to a stable prevailing retail price at Php200.00/kg and Php240.00/kg this week. In Balintawak Market, some vendors sell galunggong "balsa" as an alternative for galunggong "lalaki" as higher wholesale price were observed for the said commodity. Other local variants of local galunggong were observed like "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>). The supply for imported-frozen galunggong remained available despite the sufficient supply of local-fresh galunggong in some of the monitored retail markets (i.e., Trabajo, Quinta, Tandang-Sora, Mega-Q, Farmers, Balintawak, Munoz, Galas, & Pasig) this week. Some of the vendors still prefer selling imported galunggong due to its cheaper price making it easier to sell. Adequate supply of medium-sized alumahan was observed at the monitored retail markets this week. The prevailing retail price was noted at Php240.00/kg this week which were mainly sourced from Malabon Fish Port. Price difference may be attributed to the dissimilarity in the source area, and quality (freshness) of the commodity. For bangus, the prevailing retail price remained at Php160.00/kg due to the stable demand and sufficient supply at the monitored retail markets. Most of the supply were still sourced from Bulacan and Pangasinan. Higher demand from consumers/buyers were recorded for larger sizes of the said commodity. The prevailing retail price of Tilapia remained relatively high at Php140.00/kg this week. This may be attributed to the continuous high cost of petroleum affecting the country. There is a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Supplies sourced from Batangas have higher price compared to supply sourced from Pampanga. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan, Pangasinan Tilapia - Batangas, Pampanga Local Galunggong - Navotas & Malabon Fish Ports Alumahan - Malabon Fish Port Low influx of buyers was continuously observed among the monitored markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others. <p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Peneaus monodon</i> or Supgo-small (Php320.00/kg & 650.00/kg) - lowest prevailing price of Php320.00/kg were recorded from Caloocan Markets where supplies recorded were small-sized and not in good quality (supplies from previous days). Highest prevailing price of Php650.00/kg was noted at Farmers Market where supplies recorded were in good quality sourced from Lucena, Quezon. <i>Jagora asperata</i> or Suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices. <i>Metapenaues ensis</i> or Suwaha (Php400.00-500.00/kg) - the higher and lowest prevailing price were both recorded at Malabon Market. The difference in the price was due to the dissimilarity in size where the supplies at the price of Php400.00/kg were in small-sized and the supplies at the price of Php500.00/kg were large-sized. 																																
	<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
