REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022

Overall, prices of fishery commodities were stable among the monitored retail markets.

Low demand for fishery commodities were observed throughout the month.

Moreover, since CAR is a landlocked region, supplies available depends on the shipment coming from the nearby coastal regions.

R1

WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022

Frozen galunggong was observed the entire month in San Fernando City Public Market, San Fernando City, La Union, Urdaneta City Public Market Urdaneta City, Pangasinan and Magsaysay Public Market Dagupan City, Pangasinan at Php100.00/kg - 240.00/kg.

Due to the inclement weather condition during the 2nd week of the month, supplies of fresh marine commodities were unavailable in Laoag City Commercial Complex Laoag City, Ilocos Norte and Vigan City Public Market Vigan City, Ilocos Sur.

R3

WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022

At Nueva Ecija, no changes were recorded in the retail prices of fishery commodities.

R4A																					
WEEK 1- AUGUST 1-5, 2022																					
Supply of fishery commodities in the market are stable. However, the prices of other marine fishes were still high due to low supply caused by the bad weather condition. But the price of tamban was still low due to over supply especially in Antipolo City Market & Lucena Public Market.																					
WEEK 3- AUGUST 15-19, 2022																					
Steady supply of fishery commodities were reported among the monitored retail markets this week.																					
More specifically, supplies of "tamban" were still ample this week as observed in Antipolo City Market and Lucena Public Market.																					
Prices may have been affected by the inclement weather condition, occurrence of full moon, and quality (in terms of sizes).																					
WEEK 4- AUGUST 22-26, 2022																					
Stable supplies of fishery commodities were noted at the monitored wet markets this week.																					
Prices of other marine fishery commodities may have been affected by the low supply caused by the bad weather condition.																					
Nevertheless, supplies of "tamban" at Lucena City Public Market was reportedly ample for the consuming public.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Stable supply of fishery commodities were observed at the retail markets this week.																					
Meanwhile, due to bad weather condition, low supply of local galunggong was noted.																					
On the contrary, availability of tamban was adequate at Lucena City Public Market.																					
R4B																					
WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Price of fishery commodities available in the monitored wet markets may have been affected by the transportation expenses.																					
R5																					
WEEK 2- AUGUST 8-12, 2022																					
Fluctuation of prices might be due to the occurrence of full moon and weather disturbances.																					
WEEK 3- AUGUST 15-19, 2022																					
Limited fishery commodities were recorded this week, which could have been due to the occurrence of full moon.																					
WEEK 4- AUGUST 22-26, 2022																					
Supplies of bangus, tilapia, shrimp, and blue-swimming crab were reportedly abundant at the monitored markets.																					
Other commodities recorded were tiger-tooth croaker, hardshell clams, mantis shrimps, thread-fin bream, moonfish, creamdory/pangasius, silver carp, flying fish, silver silago, common ponyfish, indian anchovy and others.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Ample supplies of tilapia, bangus, blue-swimming crab, and shrimp were reported this week.																					
Other fishery commodities observed were indian scad, pangasius, bighead carp, short mackerel, shells, goldband goatfish, yellow-stripe scad, indian anchovy, redtail scad, and others.																					
R6																					
WEEK 1- AUGUST 1-5, 2022																					
1. In the Province of Aklan, abundant supply of fishery commodities were observed among the monitored retail markets, particularly in Kalibo Public Market. Consequently, prices of marine and aquaculture fishery commodities were stable and lot of consumers/ buyers were noted. More specifically, ample availability of bangus was reported this week at Php130.00/kg - Php160.00/kg sourced from New Washington Aklan and Batan Aklan.																					
2. For the Province of Antique, stable supply was noted during the conduct of price monitoring of fishery commodities. In fact, it was evident that the fish stalls were filled with fishery commodities. Lastly, Market Administrator continue to implement precautionary measures (i.e., wearing of facemask) to avoid further spread of COVID-19.																					
3. No operation was conducted/ late submission in the Province of Capiz.																					
4. For the Province of Guimaras, minimal supply of fishery commodities were observed at the monitored retail markets this week. This could have been due to the bad weather condition that may hamper the fishing operation.																					
5. For the Province of Iloilo, abundant supply of fishery commodities were observed in Iloilo Central Market. As a result, prices were stable for the consuming public.																					
6. Lastly, stable supply was noted in the Province of Negros Occidental.																					
WEEK 2- AUGUST 8-12, 2022																					
Stable prices of fishery commodities were observed in Kalibo Public Market, Capiz Market, and Negros Occidental this week. The stable prices may be attributed to the steady supply and demand at the monitored markets.																					
Nonetheless, prices of fishery commodities in Guimaras were high, which could be due to the limited supply observed in the market.																					
WEEK 3- AUGUST 15-19, 2022																					
Supplies of fishery commodities were observed adequate in the Province of Aklan, Capiz, and Negros Occidental.																					
Nevertheless, in the province of Guimaras and Iloilo, price increment of some fishery commodities may have been affected by the bad weather condition.																					
WEEK 4- AUGUST 22-26, 2022																					
Overall, supplies of fishery commodities were reportedly stable at Kalibo Public Market, Province of Antique, Guimaras, and Negros Occidental this week.																					
Prices may have been affected by the bad weather condition and supplies available at the wet market.																					
Moreover, Covid-19 protocols (i.e., wearing of facemask) were still being implemented in the monitored wet markets.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Supply of fishery commodities were observed sufficient particularly in the Province of Aklan (i.e., Kalibo Public Market), Capiz, Province of Iloilo, and Negros Occidental. As a result prices were noted stable among the monitored markets. However, prices may still vary depending on the sizes and freshness of the commodity.																					
Moreover, COVID-19 protocols (i.e., wearing of face mask) were still implemented at the monitored markets.																					
R7																					
WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Prices of fishery commodities may have been affected by the unfavorable weather condition and oil price hike in the country.																					
R8																					
WEEK 1- AUGUST 1-5, 2022 - WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Sufficient supply of fishery commodities were observed during the entire monitoring days this month.																					
Difference in the recorded prices may have been caused by the varying quality (in terms of sizes and freshness) and weather condition.																					
Further, ambulant fish vendors were observed surrounding the market area of Tacloban City Market.

R9																					
WEEK 1- AUGUST 1-5, 2022																					
Ample volumes of fishery commodities were unloaded at the monitored retail markets this week. However, less displays were noted in the wet markets of Zamboanga Del Norte.																					
Prices of fish retailed depends of its quality (in terms of freshness and sizes).																					
Lastly, in some provinces of Zamboanga, few fish stalls were open during the conduct of price monitoring.																					
WEEK 2- AUGUST 8-12, 2022																					
Due to the occurrence of full moon and strong winds in fishing ground, minimal supply of fishery commodities were observed in the wet market of Zamboang Del Norte.																					
Prices may vary depending on its quality (in terms of sizes and freshness).																					
Zamboanga City is on Alert Level 1 , wherein people who are fully vaccinated with facemask are allowed to go to public places.																					
WEEK 3- AUGUST 15-19, 2022																					
During the conduct of price monitoring, minimal volumes of fishery commodities were observed traded at the monitored retail markets this week.																					
Prices might be affected by the quality (in terms of sizes and freshness) of the commodity.																					
Few fish stalls were noted operating in some province of Zamboanga.																					
WEEK 4- AUGUST 22-26, 2022																					
Sufficient volumes of fishery commodities were observed traded at the market.																					
However, less display was noted in Zamboanga del Norte.																					
Prices may vary depending on the quality (in terms of sizes).																					
Few fish stalls were reportedly open during the conduct of price monitoring.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Sufficient availability of fishery commodities were observed traded in the market.																					
Prices may have been affected by the quality (in terms of freshness and sizes).																					
Lastly, few fish stalls were noted during the conduct of monitoring.																					
R10																					
WEEK 1- AUGUST 1-5, 2022																					
Adequate supply of fishery commodities were observed among the monitored retail markets this week.																					
More specifically, ample availability of galunggong was reported.																					
For Aquaculture commodities (i.e., bangus and tilapia), minimal unloading was observed.																					
WEEK 2- AUGUST 8-12, 2022																					
Supplies of fishery commodities were observed sufficient at the monitored markets.																					
In fact, high supplies of galunggong, milkfish, and tilapia were recorded.																					
Prices were lower as compared to last week fishery prices. This might be caused by the rollback of fuel price in the country.																					
WEEK 3- AUGUST 15-19, 2022																					
Sufficient supply of fishery commodities were observed during the conduct of price monitoring.																					
In fact, adequate supply of bangus and tilapia were noted among the monitored markets.																					
Nonetheless, low supply of galunggong was reported this week which might be due to the weather disturbances that could affect the supply.																					
WEEK 4- AUGUST 22-26, 2022																					
Sufficient supplies of fishery commodities were recorded among the monitored retail markets this week.																					
In fact, adequate supplies of galunggong, bangus, and tilapia were noted.																					
Due to oil price hike, prices of some fishery commodities have been affected.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Sufficient supply of fishery commodities were noted at the monitored retail markets this week.																					
In fact, high supply of aquaculture commodities (i.e., bangus and tilapia) were recorded. On the other hand, for galunggong low supply was observed which might be affected by the inclement weather condition.																					
R11																					
WEEK 1- AUGUST 1-5, 2022																					
Prices of fishery commodities increased this week, which migh be due to the bad weather condition that affects the supply available in the market.																					
Total landed volume inside the wet market was only reflected from the monitored stalls only.																					
WEEK 2- AUGUST 8-12, 2022																					
As observed apart from Digos and Tagum public wet markets, fish supply in other public wet markets was inadequate which may have been due to the bad weather condition, hence increase in prices.																					
Moreover, total landed volume was only reflected inside the wet markets specifically from the monitored stalls.																					
WEEK 3- AUGUST 15-19, 2022																					
Ample supply of fishery commodities were observed in the monitored major markets this week.																					
However, prices of some marine fishery commodities may have been affected by the strong winds and heavy rainfall which could hamper the fishing operation.																					
Total landed volume was only reflected from the monitored fish stalls.																					
WEEK 4- AUGUST 22-26, 2022																					
Abundant supplies of shrimp and tuna were reported this week.																					
Meanwhile, prices of other fishery commodities were higher in some of the monitored markets which migh have been due to the limited supply caused by the continuous strong winds and heavy rainfalls.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Adequate supply of fishery commodities were observed this week.																					
Prices may have been affected by the bad weather condition.																					
R12																					
WEEK 3- AUGUST 15-19, 2022																					
Per interview with the fish vendors at the Tacurong City, price increment was due to the lack of supply and high mobility cost.																					
WEEK 4- AUGUST 22-26, 2022																					
In general, insufficient supplies of fishery commodities were reported this week which resulted to the increase in prices.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Due to the bad weather condition, small volume of fresh marine commodities were observed this week at General Santos City.																					
No changes were recorded in the supply and price of fishery commodities at Koronadal City.																					
According to fish vendors of Tacurong City, due to low influx of buyers prices of some fishery commodities have slight adjustment but, other fishery commodities remained stable.																					
Supply of fishery commodities were stable as a result, no price adjustment were reported at Glan City.																					
Consequently, no changes were noted in the price list and stocks of fishes at Kidapawan City.

R13																					
WEEK 1- AUGUST 1-5, 2022																					
Low demand of fishery commodities were observed among the monitored retail markets.																					
Minimal displays of fishery commodities were reported this week. This could have been attributed to the bad weather condition affecting the supply unloaded at the market.																					
WEEK 2- AUGUST 8-12, 2022																					
Low supply of fishery commodities were noted among the monitored retail markets this week. This might have been due to the inclement weather condition which could hamper the fishing activity.																					
WEEK 3- AUGUST 15-19, 2022																					
Low supply of fishery commodities were reported this week which might be attributed to the bad weather condition.																					
WEEK 4- AUGUST 22-26, 2022																					
Some provinces have reportedly lack of fishery commodities displayed at the monitored retail markets.																					
Price increment could be caused by the bad weather condition.																					
Low demand of fishery commodities were still observed this week.																					
WEEK 5- AUGUST 29-SEPTEMBER 2, 2022																					
Some provinces were reportedly have lack of displays of fishery commodities at the monitored markets.																					
Price increment of marine commodities present at the monitored markets could have been caused by the bad weather condition.																					
NCR																					
The following observations were gathered from market vendors and administrators for the month of July:																					
1. Generally, minimal but sufficient supplies of fresh marine commodities were observed among the monitored retail markets this month. This might have been attributed by the occurrence of the Severe Tropical Storm "Florita", Tropical Depression "Gardo" and Typhoon "Henry" noted on the fourth and fifth week of the month. Meanwhile, the Low Pressure Area (LPA) in Southwest of Hinatuan, Surigao del Sur, and Southwest Monsoon were also noted in the first week of the month as well as the occurrence of full moon on 11 August 2022. Nevertheless, availability of local-fresh galunggong lalaki (Decapterus macrosoma) was continuously recorded in all the monitored wet markets this month sourced mainly from Malabon Fish Port and Navotas Fish Port.																					
2. More availability of imported-frozen galunggong lalaki (Decapterus macrosoma) was noted this month as vendors prefer to purchase the commodity due to cheaper price making it easier for them to sell.																					
3. Adequate supply of medium-sized alumahan (Rastrelliger kanagurta) was recorded among the monitored retail market this month. However, majority of the supplies were still large sizes noted specifically in Farmers market sourced from Lucena (Quezon). Meanwhile, availability of other variant (i.e., Hasa-hasa) Rastrelliger brachysomawas also present in selected wet markets this month usually sourced from Malabon Fish Port.																					
4. For bangus and tilapia, sufficient supplies were observed among the monitored retail markets this month. However, minimal increment in price of tilapia in the wholesale level were reported by vendors which might be attributed to the minimal supply of tilapia from Batangas caused by the fish kill in Taal Lake.																					
5. Top fishery commodities in the sixteen (16) monitored retail markets are sourced mainly from the following areas: <ul style="list-style-type: none"> a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas c. Local Galunggong - Malabon & Navotas Fish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port 																					
6. Low influx of buyers were continuously observed this month among the monitored retail markets despite the relaxation of COVID-19 protocols in the region. As a result , lower quality (in terms of freshness) were observed in some displayed fishery commodities which are leftovers from the previous markets days. Meanwhile, vendors are coping by adjusting the volume and variety of their stocks to ensure all are sold and avoid losses.																					
7. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19OMICRON variant, in accordance with the General-Community Quarantine-Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.																					
General Observation																					
Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.																					
1. <i>Scylla serrata</i> or Alimango (Mixed) (Php 400.00 & 500.00 /kg) - lowest prevailing price of Php 400.00/kg was recorded in Region 4B, Region 8, Region 9, and Region 10 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 500.00/kg was recorded in Region 5, Region 6, Region 7, and NCR wherein the available supply was larger in size, hence, price is higher.																					
2. <i>Acanthurus olivaceus</i> or Uring (Php 150.00 & 260.00 /kg) - lowest prevailing price of Php 150.00/kg was recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 260.00/kg was recorded in Region 10 wherein the available supply was larger in size, hence, price is higher.																					
3. <i>Anodontia edentula</i> or Imbao (Php 120.00 & 250.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 10 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 250.00/kg was recorded in Region 11 wherein the available supply was larger in size, hence, price is higher.																					
4. <i>Aprion verescens</i> or Olong-olong (Php 300.00-400.00 /kg) - both the lowest and highest prevailing prices of Php 300.00/kg and Php 400.00/kg, respectively, were recorded in Region 8 . Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
5. <i>Carangoides ferdau</i> or Talakitok (Php 250.00-400.00 /kg) - both the lowest and highest prevailing prices of Php 250.00/kg and Php 400.00/kg, respectively, were recorded in Region 3. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
6. <i>Gazza achlamsy</i> or Sapsap (Php 200.00-360.00 /kg) - both the lowest and highest prevailing prices of Php 200.00/kg and Php 360.00/kg, respectively, were recorded in Region 3. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
7. <i>Gerres oyena</i> or Latab (Php 120.00-380.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 8 wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 380.00/kg was recorded in NCR wherein the available supply was sourced from other regions and larger in size, hence, price is higher.																					
8. <i>Glossogobius giuris</i> or Pijanga (Php 200.00 & 500.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in CARAGA wherein the said commodity was sourced within the locality and smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 500.00/kg was recorded in NCR wherein the available supply was sourced from other regions and larger in size, hence, price is higher.																					
9. <i>Hypoaetherina temminckii</i> or Dilis (Php 100.00 & 240.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 5 due to ample supply as it was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 240.00/kg was recorded in Region 11 wherein the available supply was limited and larger in size, hence, price is higher.																					
10. <i>Leiognathus splendens</i> or Sapsap (Php 80.00-300 /kg) - lowest prevailing price of Php 80.00/kg was recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 4A wherein the available supply was larger in size, hence, price is higher.																					
11. <i>Leiopotherapon plumbeus</i> or Ayungin (Php 120.00-280.00 /kg) - lowest prevailing price of Php 120.00/kg was recorded in Region 10 wherein the said commodity was sourced within the locality, hence, price is lower. Meanwhile, highest prevailing price of Php 280.00/kg was recorded in NCR wherein the available supply was sourced from other regions and larger in size, hence, price is higher.																					
12. <i>Lethrinus lentjan</i> or Katambak (Php 200.00 & 350.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 8 and Region 10 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in Region 10 and CARAGA wherein the available supply was larger in size, hence, price is higher.																					
13. <i>Lethrinus ornatus</i> or Kanuping (Php 140.00-300.00 /kg) - lowest prevailing price of Php 140.00/kg was recorded in NCR wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 300.00/kg was recorded in Region 9 wherein the available supply was larger in size, hence, price is higher.																					
14. <i>Lethrinus semicinctus</i> or Lagaw (Php 240.00 & 380.00 /kg) - both the lowest and highest prevailing prices of Php 240.00/kg and Php 380.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
15. <i>Mugil cephalus</i> or Bolasi (Php 100.00-450.00 /kg) - lowest prevailing price of Php 100.00/kg was recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 450.00/kg was recorded in Region 2 wherein the available supply was larger in size, hence, price is higher.																					
16. <i>Nemipterus furcosus</i> or Bisugo (Php 200.00 & 400.00 /kg) - lowest prevailing price of Php 200.00/kg was recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 400.00/kg was recorded in Region 4A wherein the available supply was larger in size, hence, price is higher.																					
17. <i>Nemipterus japonicus</i> or Bisugo (Php 230.00-350.00 /kg) - lowest prevailing price of Php 230.00/kg was recorded in Region 2 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, highest prevailing price of Php 350.00/kg was recorded in Region 10 wherein the available supply was larger in size, hence, price is higher.
