Remarks/Market Observations:	<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <p>1. Overall, low volumes of supply for fresh marine commodities were observed among the monitored retail markets this week. This may be attributed to the bad weather condition brought about by the Low-Pressure Area (LPA) affecting Cagayan Valley, Cordillera Administrative Region, Ilocos Norte, Ilocos Sur, La Union, and Aurora. Meanwhile, localized thunderstorms were affecting Metro Manila and the rest of the country.</p> <p>2. Display of medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i>) was observed to have minimal availability at the monitored retail markets this week. This resulted to an increased in the prevailing retail price of local-fresh galunggong "lalaki" at Php260.00/kg this week. Most of the vendors look for a cheaper alternative for local-fresh galunggong "lalaki" as the prevailing wholesale price remain relatively high due to the rainy weather condition this past few weeks. As a result, vendors sell other local galunggong variant like galunggong "balsa" in some of the monitored retail markets. There are also other local variants of local galunggong observed like "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>).</p> <p>3. For imported-frozen galunggong, higher volume of supply was observed among the monitored retail markets this week due to the low supply of local-fresh galunggong. Most of the supplies of galunggong available this week were imported-frozen galunggong. According to vendors, they prefer selling imported-frozen galunggong due to its cheaper price making it easier to sell and expect to have more supply available for the next weeks to come. There are also other imported commodities like salmon mackarel, chabeta, pampano, tulingan and matambaka observed in some of the monitored retail markets this week.</p> <p>4. Sufficient supply of medium-sized alumahan was observed at the monitored retail markets this week. The prevailing retail price was noted at Php260.00/kg this week which were mainly sourced from Malabon Fish Port. Price difference may be attributed to the dissimilarity in the source area, and quality (freshness) of the commodity.</p> <p>5. For aquaculture commodities, the prevailing retail prices of bangus and tilapia have remained stable this week due to the stable demand and sufficient supply at the monitored retail markets. There is higher demand observed from consumers/buyers for larger sizes for the said commodity. Also, there is a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Supplies were mainly sourced from Bulacan and Pampanga, respectively.</p> <p>6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:  a. Bangus - Bulacan, Pangasinan  b. Tilapia - Batangas, Pampanga  c. Local Galunggong - Navotas &amp; Malabon Fish Ports  d. Alumahan - Malabon Fish Port</p> <p>7. Low influx of buyers was continuously observed among the monitored markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.</p> <p>8. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</p>																									
	<p><b>General Observations:</b></p> <p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <p>1. <i>Gerres sp.</i> or Latab (Php120.00/kg &amp; 260.00/kg) - lowest prevailing price of Php120.00/kg were recorded from Commonwealth Market where supplies recorded were small-sized and not in good quality (supplies from previous days). Highest prevailing price of Php260.00/kg was noted at Malabon Market where supplies recorded were in good quality sourced from Lucena, Quezon.</p> <p>2. <i>Jagora asperata</i> or Suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.</p> <p>3. <i>Pterocasio tile</i> or Dalagang bukid-bilog (Php120.00-240.00/kg) - the higher and lowest prevailing price were both recorded at Commonwealth Market. The difference in the price was due to the dissimilarity in size and source area where the supplies at the price of Php120.00/kg were in small-sized and were sourced from Navotas and the supplies for Php240.00/kg were large-sized and were sourced from Malabon.</p>																									
	<p>(-) - Price and Volume not available during price monitoring  (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
