Remarks/Market Observations: The following observations were gathered from market personnel and vendors this week: 1. In general, limited displays of fresh marine commodities were observed among the monitored retail markets this week. This may be attributed to the hampered fishing operations brought by the heavy rains and strong winds of Severe Tropical Storm "Paeng" almost throughout the whole country (Regions 5, 6, 8, 12 and the Bangsamoro Autonomous Region in Muslim Mindanao (BARMM)). 2. For medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i>), minimal supply was observed at the monitored retail markets this week. This resulted to an increased in the prevailing retail price of local-fresh galunggong "lalaki" at Php280.00/kg this week. Due to the higher prevailing price, most of the vendors were observed selling other galunggong local variant like "balsa" as they look for a cheaper alternative commodity. Other local galunggong variants like "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were also observed. 3. Higher volume of supply for imported-frozen galunggong was recorded among the monitored retail markets this week. Most of the vendors sell imported-fresh galunggong due to the limited supply of local-fresh galunggong at different fishports (walang makuhaan) brought by the rainy weather condition caused by Severe Tropical Storm "Paeng" plus the upcoming Closed Fishing Season (CFS) for local galunggong at Northeastern Palawan. Also, most of the vendors prefer selling imported-frozen galunggong due to its cheaper wholesale price making it easier to sell. There are also other imported commodities like salmon mackarel, chabeta, pampano, tulingan and matambaka observed in some of the monitored retail markets this week. 4. Supply of medium-sized alumahan remained sufficient at the monitored retail markets this week. The prevailing retail price was noted at Php320.00/kg this week which were mainly sourced from Malabon Fish Port. Price difference may be attributed to the dissimilarity in the source area, and quality (freshness) of the commodity. 5. The prevailing retail price of bangus increased at Php180.00/kg this week. According to vendors, higher wholesale price was observed due to the colder weather, where it requires longer culturing period for bangus causing higher production cost. Also, higher demand for aquaculture commodities brought by the rainy season contributed to the increase in price. Some vendors in Kamuning, Galas and Munoz prefer selling larger bangus due to the higher demand observed from consumers/buyer. 6 For Tilapia, the prevailing retail price remained at Php120.00/kg due to the sufficient supply at the monitored retail markets. There is a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Supplies were mainly sourced from Batangas and Pampanga. 7. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Navotas & Malabon Fish Ports d. Alumahan - Malabon Fish Port 8. Low influx of buyers was continuously observed among the monitored markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. 9. Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 MICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.																										
			General Observations: Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Peneaus monodon</i> or Supgo-small - (Php480.00/kg & 680.00/kg) - lowest prevailing price of Php480.00/kg were recorded from Caloocan Market where supplies recorded were small-sized and not in good quality(supplies from previous days). Highest prevailing price of Php680.00/kg was noted at Farmers Market where supplies recorded were in good quality sourced from Lucena, Quezon. 2. <i>Thunnus albacares</i> or Yellowfin - (Php120.00/kg & 240.00/kg) - lowest prevailing price of Php120.00/kg were recorded from Marikina Market where supplies recorded were not in good quality(supplies from previous days). Highest prevailing price of Php240.00/kg was noted at Pasig Market where supplies recorded were in good quality sourced from Lucena, Quezon. 3. <i>Dendrophysa russelli</i> or alakaak (Php180.00-280.00/kg) - lowest prevailing price of Php180.00/kg were recorded at Navotas Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php280.00/kg were noted from secondary Market, Guadalupe market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices. 4. <i>Jagora asperata</i> or suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.
