<b>Remarks/Market Observations:</b>	<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>Overall, limited displays of fresh marine commodities were observed among the monitored retail markets this week. This may be attributed to the onslaught of Severe Tropical Storm "Paeng" which hampered fishing operations brought by the heavy rains and strong winds and caused some floods in affected areas (Regions 5, 6, 8, 12 and BARMM).</li> <li>Minimal display of local-fresh galunggong were observed among the monitored retail markets this week. This resulted to a relatively high prevailing retail price of local-fresh galunggong "lalaki" at Php280.00/kg this week. The minimal availability of the said commodity may be attributed to the issuance of Closed Fishing Season (CFS) for local-fresh galunggong at Northeastern Palawan. The high prevailing retail price caused some vendors to look for a cheaper alternative resulting to vendors selling other local variant like galunggong "balsa" (<i>Decapterus macarellus</i>). There are also other local galunggong variants like "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) observed at the monitored retail markets.</li> <li>More available supply of imported-frozen galunggong was noted among the monitored retail markets this week due to the low supply of local-fresh galunggong brought by the rainy weather condition and CFS in Northern Palawan. Higher demand was observed among the buyers/consumers. Most of the vendors sell imported-frozen galunggong due to its cheaper price making it easier to sell. There are also other imported commodities like salmon mackarel, chabeta, pampano, tulingan and matambaka observed in some of the monitored retail markets this week.</li> <li>Adequate supply of medium-sized alumahan was recorded among the monitored retail markets this week. The prevailing retail price remained at Php320.00/kg which were mainly sourced from Malabon Fish Port. The availability of supply remain unpredictable. Price difference may be attributed to the dissimilarity in the source area, and quality (freshness) of the commodity.</li> <li>The prevailing retail price of bangus remain relatively high at Php180.00/kg this week despite the sufficient and stable supply at the monitored retail markets. The high prevailing retail price may be attributed to the colder weather, where it requires longer culturing period for bangus causing higher production cost. Also, higher demand for aquaculture commodities brought by the rainy season contributed to the increase in price. Higher demand were observed for bangus in some retail markets (Kamuning, Galas and Muñoz).</li> <li>The prevailing retail price of tilapia remained at Php120.00/kg due to the sufficient supply at the monitored retail markets this week. There is a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Supplies were mainly sourced from Batangas and Pampanga.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan, Pangasinan</li> <li>Tilapia - Batangas, Pampanga</li> <li>Local Galunggong - Navotas &amp; Malabon Fish Ports</li> <li>Alumahan - Malabon Fish Port</li> </ol> </li> <li>Low influx of buyers was continuously observed among the monitored markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.</li> <li>Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.</li> </ol> <p><b>General Observations:</b></p> <p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Peneaus monodon</i> or Sugpo - Medium - (Php650.00/kg &amp; 750.00/kg) - lowest prevailing price of Php650.00/kg were recorded at Navotas Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php750.00/kg was noted at Farmers Market where supplies recorded were in good quality sourced from Lucena, Quezon.</li> <li><i>Portunus palagicus</i> or Alimasag - Large - (Php400.00/kg &amp; 500.00/kg) - lowest prevailing price of Php400.00/kg were recorded at Munoz Market where supplies recorded were not in good quality (supplies from previous days) and Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php500.00/kg was noted at Commonwealth Market where supplies recorded were in good quality sourced from Lucena, Quezon and Marikina Market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.</li> <li><i>Jagora asperata</i> or suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.</li> <li><i>Upeneus mollicensus</i> or Saramulyete (Php180.00-300.00/kg) - the higher and lowest prevailing price were both recorded at Commonwealth Market. The difference in the price was due to the dissimilarity in size and source area where the supplies at the price of Php120.00/kg were in small-sized and were sourced from Navotas and the supplies for Php240.00/kg were large-sized and were sourced from Malabon.</li> </ol>																								
<p>(-) - Price and Volume not available during price monitoring  (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
