Remarks/Market Observations:

The following observations were gathered from market personnel and vendors this week:

- In general, sufficient volume of supply for fresh marine commodities were observed at the monitored retail markets this week. Nonetheless, low supply of medium-sized local-fresh galunggong was observed due to the implementation of Closed Fishing Season (CFS) for galunggong species (*Decapterus* spp.) from 1 November 2022 to 31 January 2023 in Northeastern Palawan. This resulted to a relatively high prevailing retail price at Php280.00/kg this week. Moreover, presence of other local galunggong variants such as "balsa" (*Decapterus macarellus*), "babae" (*Decapterus russelli*) and "burot" (*Decapterus kurroides*) were observed in some of the monitored retail markets this week.
- Higher availability of imported-frozen galunggong was observed among the monitored retail markets this week. This may be attributed to the low supply of local-fresh galunggong due to the CFS of local galunggong in Northeastern Palawan. According to fish vendors, most of the available supply for local galunggong at the wholesale market were imported as no unloadings were observed from the different source areas. Also, most of the vendors sell imported-frozen galunggong due to its cheaper price making it easier to sell. Other imported commodities like pampano, salmon, mackarel, chabeta, tulingan, and matambaka were observed in some of the monitored retail markets this week.
- The prevailing retail price remained at Php320.00/kg due to the ample supply of medium-sized alumahan was recorded among the monitored retail markets this week. Price difference may be attributed to the dissimilarity in the source area, and quality (freshness) of the commodity.
- For medium-sized bangus, the prevailing retail price remain relatively high at Php180.00/kg this week despite the sufficient and stable supply at the monitored retail markets. According to vendors, most of the available supply for recorded were small and large size. The high prevailing retail price may be attributed to the colder weather, where it requires longer culturing period for bangus causing higher production cost.
- No changes were observed for the prevailing retail price of tilapia which remained at Php120.00/kg due to the sufficient supply at the monitored retail markets this week. There is a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Supplies were mainly sourced from Batangas and Pampanga.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan, Pangasinan
 - Tilapia - Batangas, Pampanga
 - Local Galunggong - Navotas & Malabon Fish Ports
 - Alumahan - Malabon Fish Port
- Low influx of buyers was continuously observed among the monitored markets today. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

- Scylla serrata* or Alimango - Female - (Php600.00/kg & 880.00/kg) - lowest prevailing price of Php600.00/kg were recorded at Marikina Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php880.00/kg was noted at Farmers Market where supplies recorded were in good quality sourced from Lucena, Quezon.
- Auxis thazard* or Tulingan (Php160.00/kg & 280.00/kg) - lowest prevailing price of Php160.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php280.00/kg was noted at Marikina Market where supplies recorded were in good quality sourced from Lucena, Quezon.
- Jagora asperata* or Suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices.

f - Price and Volume not available during price monitoring
 (***) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
 NA - Source Area not available during price monitoring
