		Male	130	130	130	-	China, Vietnam			
		Female	**88	**88	**88	-	China, Vietnam			

Remarks/Market Observations:

The following observations were gathered from market personnel:

- Minimal unloadings of fresh marine commodities were observed at Navotas Fish Port (wholesale) this week. Among the commodities recorded were gulyasan, dorado, sapsap, dalangang bukid, bisugo, pusit, and others.
- Consequently, no unloadings of local-fresh galunggong laki (*Decapterus macrosoma*) were noted at Navotas Fish Port Complex (wholesale) this week. This may be attributed to the Closed Fishing Season (CFS) for galunggong species (*Decapterus* spp.) in Northeastern Palawan.
- There is an increased in the supply of imported-frozen galunggong observed at Navotas Fish Port this week. Due to the low supply of local-fresh galunggong, higher demand from the consumers were observed. The prevailing wholesale price remained at Php130.00/kg.
- There is still no supply for alumahan recorded at the Navotas Fish Port (wholesale) this week.
- For bangus, the prevailing wholesale price remained at Php130.00/kg this week due to the sufficient and stable supply at the Navotas Fish Port.
- No changes were observed in the prevailing wholesale price of tilapia at Php95.00/kg this week due to the sufficient supply at Navotas Fish Port.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Bulacan
 - Tilapia - Batangas
 - Local galunggong- N/A
 - Imported galunggong - China, Vietnam
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

Note: Wholesale price data is as of November 6 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
