Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Overall, adequate displays of fresh marine commodities were observed among the monitored retail markets this week. Nonetheless, minimal availability of medium-sized local fresh galunggong laki (<i>Decapterus macrossoma</i>) was noted this week. This might be attributed to the implementation of Closed Fishing Season (CFS) of the commodity in Northern Palawan which have started on 1 November 2022. Meanwhile, ample availability of imported-frozen galunggong laki (<i>Decapterus macrossoma</i>) was recorded this week sourced mainly from Navotas Fish Port. Moreover, presence of other imported-frozen fishery commodities (i.e., pampano, bullet tuna, chub mackerel, moonfish, and Atlantic salmon) were also noted this week. Minimal availability of medium-sized alumahan was recorded among the monitored retail markets this week. However, availability of large-sized commodity remained adequate chiefly sourced from Malabon Fish Port. Further, supplies of other variant (i.e., Hasa-hasa) were also noted in some of the monitored markets this week. Sufficient supply of bangus and tilapia were still noted among the monitored retail markets this week. As a result, no major changes were recorded in the price of the mentioned commodities. Nevertheless, high wholesale prices of the said commodities were reported by fish vendors this week. This may be due to the minimal unloading's of the commodity as some fish farmers might limit their harvest to attain maximum size of their stocks in preparation of the upcoming holiday season which will have better demand in the market. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan, Pangasinan Tilapia - Batangas, Pampanga Local Galunggong - Navotas & Malabon Fish Ports Alumahan - Malabon Fish Port Low influx of buyers were continuously observed among the monitored markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. <p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Thunnus albacares</i> or Yellowfin - (Php120.00/kg & 240.00/kg) - lowest prevailing price of Php120.00/kg were recorded from Marikina Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php240.00/kg was noted at Pasig Market where supplies recorded were in good quality sourced from Lucena, Quezon. <i>Rastrelliger kanagurta</i> or Alumahan (medium)- (Php240.00-340.00/kg)- both prevailing prices were recorded in Kamuning market wherein, the lowest prevailing price of Php240.00/kg was observed low in quality (in terms of freshness) as it is leftover from the previous markets days. Meanwhile, highest recorded price of Php340.00/kg were in good quality sourced from Lucena, Quezon. <i>Dendrophysa russelli</i> or alakaak (Php180.00-280.00/kg) - lowest prevailing price of Php180.00/kg were recorded at Navotas Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php280.00/kg were noted from secondary Market, Guadalupe market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices. <i>Jagora asperata</i> or suso pilipit (Php100.00-200.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Malabon Market which usually offers a lower price as it directly source their supplies to nearby wholesale markets (i.e., Malabon Fish port). Highest prevailing price of Php200.00/kg were noted from secondary Market, Marikina market which sources their supplies from nearby primary markets (i.e., Farmers), resulting to relatively higher prices. 																							
	<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p>
