		Male	135	130	130 & 135	135	130	-	China
		Female	**89	90	90	90	**89	-	China

**Remarks/Market Observations:**

**The following observations were gathered from market personnel:**

- At Navotas Fish Port (wholesale), sufficient unloading of fresh marine commodities were observed this week. Among the commodities recorded were hasa-hasa, dalagang bukid, gulyasan, tulingan, tunsoy, tanigue, salay ginto, betilya, and others. Nevertheless, minimal unloading of medium-sized galunggong lalaki (*Decapterus macrosoma*) was noted this week. The recorded wholesale prices were Php180.00/kg on 18 November 2022 and Php200.00/kg on 22 November 2022. Price difference may be attributed to the varying number of brokers unloaded the supplies and source areas. In fact, supplies of 18 November were derived from Southeastern Palawan, Bataan, and Zambales. Meanwhile, supplies on 22 November were chiefly sourced from Balabac Strait, Palawan.
- For imported-frozen galunggong lalaki (*Decapterus macrosoma*), ample supply was still recorded this week at the fish port as the demand for the commodity remained high due to the limited availability of its local variants (i.e., galunggong lalaki, burot, balsa, and others) caused by the Closed Fishing Season (CFS) for *Decapterus* spp. which was started on 1 November 2022 until 30 January 2023. Moreover, availability of other imported-frozen commodity such as chub mackerel was also observed at the fish port this week.
- Meanwhile, only two (2) brokers unloaded medium-sized alumahan on 22 November 2022 with actual prices of Php230.00/kg and Php263.00/kg chiefly sourced from Masbate.
- For aquaculture commodities (i.e., bangus and tilapia), adequate unloadings were still observed at the fish port throughout the week. On the other hand, minimal supply of medium-sized bangus was noted this week, as some fish farmers might limit their harvest to attain maximum size of their stocks in preparation for the upcoming holiday season which will have better demand in the market.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas
  - Local galunggong- Southeastern Palawan
  - Alumahan- Masbate
  - Imported galunggong - China
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

*Note: Wholesale price data is as of November 18 & 22, 2022, as price data from PFDA was not provided within the internal cut off of the covering period of this report.*

(-) - Price and Volume not available during price monitoring

(\*\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
