REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-October 3-7, 2022

Supplies of fishery commodities coming from the nearby coastal regions were still available at the monitored retail markets. Moreover, prices remained stable.

Unsold stocks were being sold online (by collecting orders) and deliver to the buyers.

Low demand of fishery commodities were still observed among the monitored markets.

WEEK 2-October 10-14, 2022

Limited availability of fishery commodities were observed in Kalinga and Mountain Province.

Since, CAR is a landlocked region, fishery commodities present in the retail markets were sourced from nearby regions.

Prices may be affected by the seasonality and special occasions/ holidays.

Moreover, as observed, fish vendors sold their products at their respective community/ barangay. Other unsold fish products were brought to their homes and sold thru online (by collecting orders) and deliver to the buyers.

WEEK 3-October 17-21, 2022 - WEEK 4-October 24-28, 2022

Minimal supply of fresh marine commodities were observed among the monitored retail markets this week. This is could be due to the inclement weather condition.

Consequently, limited number of commodities were noted in Kalinga and Mountain Province.

Prices may fluctuate depending on the volume of stocks/ supply, seasonality of fish, and celebration of holidays.

Since, CAR is a landlocked region, supply present were derived from nearby coastal regions. Hence, fishery commodities available in three (3) major and four (4) additional markets depend on delivery.

As observed, some fish vendors sold their products at their respective community/ barangay and other unsold fish were brought to their homes and sold online (by collecting orders) and delivered to the costumer/ consumer.

WEEK 1-October 3-7, 2022																					
Supplies of fishery commodities were available for the consumers.																					
Commodities observed were bangus, tilapia, and others.																					
Imported galunggong were still present in San Fernando City Public Market, San Fernando City, La Union, Urdaneta City Public Market Urdaneta City, Pangasinan and Magsaysay Public Market Dagupan City, Pangasinan at Php100.00 - Php240.00/kg.																					
WEEK 2-October 10-14, 2022																					
Due to the occurrence of typhoon, local-fresh galunggong were unavailable in Vigan City Public Market.																					
Nevertheless, imported-frozen galunggong were observed in Vigan City Public Market, Vigan City, Ilocos Sur, San Fernando City Public Market, San Fernando City, La Union, Urdaneta City Public Market Urdaneta City, Pangasinan and Magsaysay Public Market Dagupan City, Pangasinan at Php100.00-240.00/kg.																					
WEEK 3-October 17-21, 2022																					
Presence of imported-frozen galunggong were still available in San Fernando City Public Market, San Fernando City, La Union, Urdaneta City Public Market Urdaneta City, Pangasinan and Magsaysay Public Market Dagupan City, Pangasinan at Php100.00-240.00/kg.																					
Other observed commodities were yellowfin tuna, skipjack tuna, blue marlin, and others.																					
WEEK 4-October 24-28, 2022																					
Supplies of imported-frozen galunggong continued to be available in San Fernando City Public Market, San Fernando City, La Union, Urdaneta City Public Market Urdaneta City, Pangasinan, and Magsaysay Public Market Dagupan City, Pangasinan at Php100.00/kg-Php240.00/kg this week.																					
R2																					
WEEK 2-October 10-14, 2022																					
Don Domingo Public Market: Most commodities sold are from outside the region and are frozen. Hito and tilapia are the only commodities that are sold live. Prices of the fish were stable.																					
Solano Public Market: It was observed that consumers no longer go to the public market due to the establishment of "talipapa" in every barangay in Solano, Nueva Vizcaya. Online selling has become a trend as well in the municipality wherein consumers' orders are being delivered in their doorsteps.																					
WEEK 3-October 17-21, 2022																					
Don Domingo Public Market: Prices of tilapia and bangus increased due to the oil price hike. Most of the commodities were frozen and from Manila. Limited supply of mudcrabs due to the typhoon.																					
Solano Public Market: The fish supply in the market was sufficient. The price of some fish commodities is stable and there was no price increase.																					
Diffun Public Market: Vendors sell limited varieties of fish and other fishery products due to minimal demand. Vendors prefer to sell the most common and affordable fish and other fishery products such as bangus, tilapia, galunggong (imported and fresh), etc. to ensure that all supplies will be disposed easily. There is no change in the prevailing prices of the available supplies of fish in the market. Tilapia as the locally available supply in the province remained stable and sufficient.																					
Santiago City Public Market: Prices were stable and fishery commodities were sufficient in the market.																					
WEEK 4-October 24-28, 2022																					
Don Domingo Public Market: Prices of tilapia and bangus increased due to the oil price hike. Most of the commodities are frozen and from Manila. Limited supply of mudcrabs due to the typhoon.																					
Solano Public Market: The fish supply in the market was sufficient. The price of some fish commodities is stable and there is no price increase.																					
Diffun Public Market: Vendors sell limited varieties of fish and other fishery products due to minimal demand. Vendors prefer to sell the most common and affordable fish and other fishery products such as bangus, tilapia, galunggong (imported and fresh), etc to ensure that all supplies will be disposed easily. There is no change in the prevailing prices of the available supplies of fish in the market. Tilapia as the locally available supply in the province remained stable and sufficient.																					
Santiago City Public Market: Prices are stable and fishery commodities are sufficient in the market.																					
R3																					
WEEK 1-October 3-7, 2022 - WEEK 4-October 24-28, 2022																					
No changes with the price and unloaded volume of fishery commodities at Nueva Ecija.																					
R4A																					
WEEK 1-October 3-7, 2022																					
Supplies of fishery commodities were stable at the monitored retail markets.																					
However, prices of marine commodities were high due to low supply caused by the occurrence of full moon.																					
WEEK 2-October 10-14, 2022 - WEEK 4-October 24-28, 2022																					
Supply of fishery commodities in five (5) monitored markets were stable this week.																					
Nevertheless, prices of marine fishery commodities may be affected by the increased in the price of gasoline/ diesel and trucking which also caused retail price spikes.																					
R4B																					
WEEK 1-October 3-7, 2022																					
Prices of fishery commodities might be affected by the increased in the transportation expenses.																					
WEEK 2-October 10-14, 2022																					
Due to bad weather condition and transportation expenses, prices of fishery commodities were high.																					
Meanwhile, only tilapia and bangus were observed available in Calapan City Public Market.																					
WEEK 3-October 17-21, 2022																					
Most of the tilapia and bangus supplies in MIMAROPA were from Dagupan, Manila, and Batangas.																					
Prices of fishery commodities were high due to oil price hike that affects transportation expenses.																					
WEEK 4-October 24-28, 2022																					
Low supply due to the occurrence of Severe Tropical Storm Paeng.																					
R5																					
WEEK 1-October 3-7, 2022																					
Minimal supply of fishery commodities were noted at the monitored markets.																					
However, supply of tilapia, blue swimming crab, and shrimp were observed sufficient.																					
Availability of imported-frozen galunggong sourced from China were also recorded and supply of local-fresh galunggong were reportedly derived from Pasacao, Camarines Sur.																					
Other observed commodities includes pangasius/creamdory, bighead carp, red snapper, indian anchovy, redbelly yellowtail fusilier, shells, common ponyfish, blue and gold fusilier, yellowbelly threadfin bream and others.																					
WEEK 2-October 10-14, 2022																					
Some fishery species were not available in the market.																					
WEEK 3-October 17-21, 2022																					
Minimal availability of fishery commodities were observed this week which might be due to the inclement weather condition particularly in the province of Sorsogon.																					
Nevertheless, abundant supply of tilapia, blue-swimming crab, and shrimp were noted.																					
Presence of imported galunggong from China and local galunggong from Pasacao, Camarines Sur were also observed.																					
Other reported commodities includes creamdory, bighead carp, shrimp, indian halibut, blue-spotted stingray, big-eyed trevally, giant trevally, yellow-stripe scad, and others.																					
WEEK 4-October 24-28, 2022																					
1. All commodities came from mainland areas																					
2. Less fishery commodity due to bad weather condition in Catanduanes.																					
3. Abundant supply of tilapia, blue-swimming crab and shrimps while minimal supply of bangus																					
4. Minimal supply of fishery commodities were observed which might be due to the inclement weather condition caused by Severe Tropical Storm Paeng.																					
5. Frozen/imported galunggong (round-scad) were from China.																					
6. Green mussel were not available in the market during the monitoring.																					
7. Other species includes (pangasius/creamdory, bighead carp, shrimps, teardrop threadfin-bream, obtuse barracuda, false trevally indian anchovy, buccanneer anchovy, common silver-biddy, purple-spotted bigeye, goldband goatfish, common ponyfish, goldband goatfish and etc.) in NCPM. Some of the fishery commodities were not available due to heavy rains in the province of Sorsogon.

R6																					
WEEK 1-October 3-7, 2022																					
1. At the Province of Aklan, abundant supply of fishery commodities were observed at Kalibo Public Market. Consequently, prices were partially decreased for both marine and aquaculture commodities. Moreover, lot of consumers were observed during the conduct of price monitoring.																					
2. Meanwhile, at Antique Public Market, no changes were reported in the price of fishery commodities. In fact, fish stalls were filled with fishes.																					
3. Sufficient supply of fishery commodities were observed at Roxas City this week, hence, prices were stable. Nevertheless, prices of displayed fishery commodities may have been affected by the quality (in terms of freshness). Further, no displays of shellfish were observed due to the presence of Red Tide in coastal waters.																					
4. Lastly, at Guimaras, Iloilo, and Negros Occidental, prices were stable.																					
WEEK 2-October 10-14, 2022																					
1. Province of Aklan, abundant supply of fishery commodities were observed in Kalibo Public Market. Prices were partially decreased from both marine and aquaculture species. Lot of consumers were observed during the conduct of price monitoring.																					
2. Sufficient supply of fish were noted in the market of Capiz. However, no displays of shellfish were observed due to the presence of Red Tide in coastal waters of Roxas City. Prices remains stable this week.																					
3. Limited display of fishery commodities were observed in Guimaras this week. Prices were unstable.																					
4. Abundant display of fishery commodities were observed in the province of Iloilo. In fact, lot of consumer were noted during the conduct of price monitoring.																					
5. Prices of fishery commodities were stable in the province of Negros Occidental.																					
WEEK 3-October 17-21, 2022																					
Ample supplies of fishery commodities were observed in Kalibo Public Market and lot of consumers were noted during the conduct of price monitoring.																					
Similarly, at Antique Market, supplies were sufficient among the monitored retail markets this week. Fish stalls were filled with fishery commodities and market administrators were implementing precautionary safety measures (ie. wearing of facemask) to avoid further spread of COVID-19. Moreover, most of the fishes available were caught by using Ring Net from Municipality of San Jose and per interview with fish vendors, bangus,tilapia, and pasayan were obtained from Iloilo.																					
Due to bad weather condition, supplies of fishery commodities at Guimaras were limited, hence, prices have been affected.																					
Similarly, limited supply of fishery commodities were noted in Iloilo Central Market. This could be due to the bad weather condition.																					
Stable prices of fishery commodities were observed in the province of Negros Occidental.																					
WEEK 4-October 24-28, 2022																					
1. Abundant supply of fishery commodities in Kalibo Public Market; Price partially decreased for both marine and aquaculture species. Lot consumers were observed during the conduct of price monitoring.																					
2. In the province of Antique, it was observed that Tropical Depression Paeng affects fishing activity especially fisherfolks engaging in fishing using municipal and small scale fishing boats due to frequent rainfall and sea turbulence reason to slight increase in some fishery commodities, price such as yellowfin tuna from Php360.00/kg last week to Php380.00/kg while other remain as is. Blank stalls were observed inside the market. People going in the market wears facemask as part of COVID19 protocol. As per interviewed by vendor, the source of bangus, tilapia, and pasayan were from Hamtic, Antique and Iloilo City.																					
3. There is sufficient supply of fish in the market of Capiz, Even though the coastal water of Roxas City is still positive in Red Tide the prices of fishes in the market remained stable.																					
4. It was observed that abundant supply of fishery commodities displayed in the market of Guimaras and the price were still stable.																					
5. It was observed that the price of fishery commodities in the market of Negros Occidental, was slightly increased due to the bad weather condition.																					
WEEK 1-October 3-7, 2022																					
Prices of fishery commodities were affordable and sufficient.																					
WEEK 2-October 10-14, 2022																					
Due to unfavorable weather condition fishery commodities were insufficient and expensive.																					
WEEK 3-October 17-21, 2022																					
Due to unfavorable weather condition fishery commodities were insufficient and expensive.																					
WEEK 4-October 24-28, 2022																					
Due to unfavorable weather condition fishery commodities were insufficient and expensive.																					
R8																					
WEEK 1-October 3-7, 2022																					
Sufficient supply of fishery commodities were noted during the monitoring.																					
Prices may vary depending on the sizes, source area, and quantity of supplies.																					
Aside from the regular fish stalls, ambulant fish vendors were observed surrounding the area especially at Tacloban City Market.																					
WEEK 2-October 10-14, 2022																					
Sufficient supply of fishery commodities were noted during the conduct of price monitoring.																					
Top fishery commodities (ie., bangus, tilapia, & galunggong) were available in the monitored markets.																					
Prices may vary depending on the unloaded supplies, size, source area, and weather condition.																					
Moreover, ambulant vendors were observed surrounding the market area of Tacloban City.																					
WEEK 3-October 17-21, 2022																					
Sufficient supply of fishery commodities were noted during the conduct of price monitoring.																					
Top fishery commodities (bangus, tilapia, & local GG) were available at the monitored markets.																					
Price variation may be due to the dissimilarity in the sizes, source area, and quantity of available supplies.																					
Moreover, aside from the regular fish stalls, ambulant vendors were observed surrounding the market area of Tacloban City Market.																					
WEEK 4-October 24-28, 2022																					
Sufficient supplies of fish were noted in the market during the monitoring.																					
The price variations of the different fish species available in all monitored markets depend on the size of the fish, origin and the availability (in terms of quantity). Weather condition also affects the price of fish.																					
Top 3 target commodities, bangus and galunggong were available in the market while other fish species were present in the market. Sufficient supply of fish in the market.																					
Aside from the regular stalls, ambulant vendors were observed surrounding the market area especially in Tacloban City Market																					
R9																					
WEEK 1-October 3-7, 2022																					
Due to the occurrence of full moon, less volumes were observed traded at the market resulting to the increased in prices of fishery commodities.																					
In fact, less displays of fishery commodities were reported in the market of Zamboanga del Norte (ZDN).																					
Per interview with some stall owners, they prefer shipping out their commodities to atleast recover their capital.																					
Prices could be affected by the quality (in terms of freshness and sizes).																					
Few fish stalls were observed open in the wet market in some province of Zamboanga.																					
WEEK 2-October 10-14, 2022																					
Less volume of fish catch/ traded in the market this week. This could be due to the Low Pressure Area (LPA) and strong wind in the fishing ground.																					
Consequently, less display of fishery commodities were observed in the wet market of Zamboanga del Norte (ZDN).																					
Prices may be affected by the quality (in terms of sizes) and quantity of unloaded supplies.																					
WEEK 3-October 17-21, 2022																					
Due to the strong wind in the fishing ground, less volume of fishes were observed traded among the monitored retail markets this week.																					
Prices might be affected by the quality (in terms of sizes and freshness).																					
Few fish stalls were observed operating in the wet market in some Province of Zamboanga.																					
WEEK 4-October 24-28, 2022																					
Less volume of fish catch/traded in the market resulting to moderate to high price of fish due to Severe Tropical Storm Paeng.																					
Prices of fish retailed depends on its quality (in terms of sizes and freshness). There were few fish stall open in the wet market in some province of Zamboanga.																					
People who are fully vaccinated with facemask can go to public places and in the market.

R10																					
WEEK 1-October 3-7, 2022																					
Sufficient supply of fishery commodities were observed at the monitored markets. Supply of bangus, tilapia, and galunggong were adequate for the consuming public. No changes were recorded in the prices.																					
WEEK 2-October 10-14, 2022																					
Due to heavy rainfall, insufficient supply of fishery commodities were observed this week. Nevertheless, high supply of bangus, tilapia, and galunggong were recorded.																					
WEEK 3-October 17-21, 2022																					
Sufficient supply of fishery commodities were noted among the monitored markets this week. In fact, no problem with regards to the movement of prices in the markets.																					
WEEK 4-October 24-28, 2022																					
There were no problem with regards to the movement of prices of fishery commodities. There were sufficient supply of fishery commodities in the major market. High supply of milkfish, tilapia, and galunggong were still observed this week. Furthermore, other fishery commodities like demersal fishes were expensive than the pelagic fishes.																					
R11																					
WEEK 1-October 3-7, 2022																					
Supplies of fishery commodities were abundant, especially for eastern little tuna and moonfish.																					
WEEK 2-October 10-14, 2022																					
As observed, less supply of fishery commodities were observed this week. This might be due to the bad weather conditions. However, in other public wet markets, supply of fishery commodities were abundant especially matambaka, frigate tuna, squid, bangus, and tuna.																					
WEEK 3-October 17-21, 2022																					
Minimal supplies of fresh marine commodities were observed at the monitored retail markets this week. This might be due to the inclement weath condition. Nevertheless, supplies of aquaculture commodities such as bangus and tilapia were ample this week. Moreover, prices may be affected by the increase in the price of gasoline.																					
WEEK 4-October 24-28, 2022																					
As observed, in other public wet market supply of fishery commodities was inadequate due to the bad weather condition (strong winds and waves), hence, price increased. However, the fishery commodity supply in most wet public markets were high, especially bangus, galunggong, hipon, and tuna, thus, prices remained the same.																					
R12																					
WEEK 1-October 3-7, 2022																					
General Santos City- small volume of fishery commodities were observed which might be due to the inclement weather condition. Meanwhile- at Koronadal City, supplies and prices were stable in the market. Similarly- at Tacurong City and Glan no changes were noted in the prices of fishery commodities. Lastly- at Kidapawan City, supplies were limited and prices were unstable which might be caused by the occurrence of typhoon.																					
WEEK 2-October 10-14, 2022																					
General Santos City- small volumes of fishery commodities were observed which might be due to the bad weather condition. Koronadal City- no changes were reported in the price of fish in the market. Tacurong City- fish supply is stable in the market. Glan- the retailer display less volume due to less buying of consumer. Kidapawan City- all fishery commodities were stable in price.																					
WEEK 3-October 17-21, 2022																					
General Santos City - Minimal volume of fresh marine commodities were observed this week which might be due to the bad weather condition. Nevertheless, supplies of bangus and tilapia were sufficient this week. Koronadal City - Supplies were unstable this week which may be due to the occurrence of typhoon. Meanwhile, supplies of aquaculture commodities such as bangus, tilapia, and hito were sufficient. Tacurong City - Less consumer were observed this week. Prices have slight adjustment in the market.																					
WEEK 4-October 24-28, 2022																					
General Santos City - small volume of fish in the market due to Typhoon. Koronadal City - no changes in price and supply of fish. Tacurong City - the supply of marine fishery commodities were sufficient and part of them came from Region 9 and 11. The price has been slightly changed. There was an ample supply of hito, tilapia and bangus. Glan - no price difference from main commodities only low supply of tuna. Kidapawan City - no changes in price of fishery commodities. Nonetheless, no supply of squid observed this week.																					
R13																					
WEEK 1-October 3-7, 2022 - WEEK 2-October 10-14, 2022																					
Low demand for fishery commodities were observed at the monitored markets. Prices may have been affected by the inclement weather condition.																					
WEEK 3-October 17-21, 2022																					
Some provinces have lack of supply which may be due to the bad weather condition. Low influx of buyers were noted among the monitored markets this week.																					
WEEK 4-October 24-28, 2022																					
Last week reports the demand for fish in the wet markets decreased and the price increased due to bad weather condition brought by Severe Tropical Storm Paeng. Some provinces have lack of supply that is why some commodities increased in price.																					
NCR																					
The following observations were gathered from market vendors and administrators for the month of October:																					
1. Overall, minimal display of fresh marine commodities were observed among the monitored retail markets this month. This may be attributed to the hampered fishing operations caused by the unfavorable weather condition in the country brought by the Intertropical Convergence Zone (ITCZ), and presence of Tropical Depression "Neneng" (2nd week), Tropical Depression "Obet" (3rd week), and Severe Tropical Storm "PAENG" (4th week) of the month. Relatively, limited availability of local fresh galunggong lalaki (Decapterus macrosoma) was recorded this month sourced mainly from Malabon and Navotas Fish Port.																					
2. In connection, more availability of imported-frozen galunggong lalaki (Decapterus macrosoma) was recorded this month as vendors prefer to purchased the commodity due its affordable price enabling them to sell it easily.																					
3. Similarly, limited display of medium-sized alumahan, (Rastrelliger kanagurta) was recorded among the monitored retail markets this month. As large-sized commodity was apparently the majority of supply in the markets. Moreover, availability of other variant of the commodity (i.e., Hasa-hasa) Rastrelliger brachysoma was recorded chiefly sourced from Malabon Fish Port.																					
4. Meanwhile, sufficient display of aquaculture commodities (i.e., bangus and tilapia) were recorded throughout the month. As a result, prices of both commodities remained stable. Nonetheless, high wholesale prices of the said commodities were reported by vendors especially supply of bangus coming from Dagupan and the supply of tilapia from Batangas.																					
5. Top fishery commodities in the sixteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Malabon & Navotas Fish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port																					
6. Still, low influx of buyers were apparently observed among the monitored retail markets throughout the month. In connection, vendors were noted selling lower volume and variety of fishery commodities to ensure all displays will be sold by the end of the day to avoid losses. Further, as observed, some of the displayed fishery commodities were remaining stocks from previous market days.
