		Female	-	**90	**90	**90	**90	-	Vietnam

**Remarks/Market Observations:**

**The following observations were gathered from market personnel:**

- At Navotas Fish Port (wholesale), minimal unloading of fresh marine commodities was noted this week. Commodities recorded were dalagang bukid, gulyasan, tambakol, bisugo, lumot, pusit, tulingan, espada, alakaak, lapad, and others. More specifically, for medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*), only one (1) broker unloaded medium-sized commodity on 04 February 2023 with an actual wholesale price of Php235.00/kg and two (2) brokers on 07 February 2023 price at Php230.00/kg chiefly sourced from Palawan and Batangas. Nonetheless, availability of other local galunggong variants (i.e., burot and galunggong babae) were recorded in the fish port this week.
- Meanwhile, for medium-sized imported-frozen galunggong lalaki the prevailing wholesale price was stable at Php140.00/kg chiefly sourced from Vietnam.
- Available supply of medium-sized alumahan (*Rastrilleger kanagurta*) was also observed this week with a recorded actual wholesale price of Php230.00/kg and Php235.00/kg sourced from Masbate and Quezon Province.
- Nonetheless, adequate supplies of bangus and tilapia were still noted at the Navotas Fish Port (wholesale) this week. However, no supplies of medium-sized bangus from Pangasinan were still recorded as large-sized bangus were unloaded at the fish port this week. Meanwhile, supplies of medium to large-sized bangus from Bulacan continued to be present in the fish port with steady prevailing wholesale price of Php140.00/kg.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
  - Bangus - Bulacan
  - Tilapia - Batangas
  - Local Galunggong - Palawan
  - Alumahan - Quezon Province, Masbate
  - Imported galunggong - Vietnam
- Low influx of buyers remains to be evident this week at the Fish Port. As a result, lower quality of some displayed fishery commodities were observed this week.

*Note: Wholesale price data is as of February 4 & 7, 2023, as price data from PFDA was not provided within the internal cut off of the covering period of this report.*

(-) - Price and Volume not available during price monitoring

(\*\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market.

This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
