**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- Overall, adequate availability of fresh marine commodities were observed among the monitored retail markets this week. Consequently, ample supplies of small-sized galunggong lakali (*Decapterus macrosoma*) was recorded particularly in Commonwealth, Mega-Q, Balintawak, and Quinta markets. Display of other variants (i.e., Burot, Balsa, and Galunggong babae) were also noted this week. On the other hand, no medium-sized local fresh galunggong lakali was observed specifically in Commonwealth market as majority of the vendors prefer selling imported-frozen galunggong due to its affordable price.
- Meanwhile, supplies of medium-sized alumahan (*Rastrelliger kanagurta*) remained available this week in the monitored retail markets sourced mainly from Malabon Fish Port. Presence of other variant i.e., Hasa-hasa (*Rastrelliger brachysoma*) was also noted this week.
- Sufficient supplies of bangus and tilapia were also observed among the monitored retail markets throughout the week. However, limited display of medium-sized bangus was reported in Commonwealth market on 17 March 2023 as majority of the supplies were large-sized sourced mainly from Bulacan and Pangasinan.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas, Pampanga
  - Local Galunggong - Malabon Fish Port and Lucena (Quezon)
  - Imported-frozen Galunggong - Navotas Fish Port
  - Alumahan - Navotas Fish Port
- According to vendors, in spite of the sufficient supply of fishery commodities noted this week. Low demand continues to be apparent in the monitored retail markets. As a result, some displayed fishery commodities were observed low in quality in terms of freshness as it is usually leftovers from the previous market days. Meanwhile, some vendors opted to bargain their price to ensure all stocks will be sold by the end of the day.

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Rastrelliger kanagurta* or Alumahan-medium (Php260.00 & 380.00/kg)-lowest prevailing price of Php260.00/kg were recorded in Quinta, Guadalupe, and Pasig markets wherein supplies observed were small to medium size of the commodity as compared to the supply noted in Commonwealth, Farmers, and Muñoz markets which have noted to have larger size medium to large sourced from Lucena, Quezon. Hence, recorded the highest price of Php380.00/kg.
- Dendrophysa russelli* or Alakaak (Php120.00 & 250.00/kg)- Similarly, variations of prices are attributed due to the difference in size of the commodity. Wherein, the lowest recorded price of Php120.00/kg noted in Polo Public market was observed smaller size as compared to the supplies recorded in Malabon Central market which have recorded the highest recorded price of Php250.00/kg sourced from Malabon Fish Port.
- Mullus surmuletus* (Php320.00-440.00/kg)-Meanwhile, lowest prevailing price of Php320.00/kg noted in Guadalupe Market are noted to have low quality in terms of freshness. Hence, supply are usually offer in a lower price. On the other hand, highest recorded price of Php440.00/kg noted in Marikina market are noted to have premium quality sourced from Lucena, Quezon, hence, high price.

(-) - Price Not Available During Price Monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring
