(-) - Price and Volume not available during price monitoring
 (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
 NA - Source Area not available during price monitoring
REMARKS AND MARKET OBSERVATIONS
CAR
WEEK 1-January 30-February 3, 2023
 Most of the fishery commodities available in the monitored markets of CAR were sourced from other regions (R1, R2, R3, and R4). Majority of the supplies for tilapia and hito were harvested by the fisherfolk in their backyard and sold in the market. Price variation may be affected by the tranportation cost, freshness, sizes, and source areas.
WEEK 2-February 6-10, 2023
 Low supplies of bangus and tilapia were noted in the monitored markets this week. This might be due to the cold weather condition that affects the growth of cultured commodities. Supplies of tilapia were derived from Ambuklao Dam and Magat Dam. Fishes available in the Region were purchased from the dealers of Baguio City. Prices may be affected by the quality (in terms of freshness and sizes) and source areas.
WEEK 3-February 13-17, 2023 - WEEK 4-February 20-24, 2023
 Supplies of fishery commodities available in the markets were sourced from other regions. Prices may be affected by the freshness, sizes, and source areas of supplies.
 For tilapia, most of the supplies present in Cordillera markets were derived from Dam and Magat Dam.

	Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low
R11 WEEK 1-January 30-February 3, 2023 Sufficient supply of fishery commodities were observed in the monitored markets. Prices of marine commodities may be affected by the bad weather condition that hampers fishing operation. WEEK 2-February 6-10, 2023 Minimal supply of fishery commodities were observed in the monitored markets this week. This might be attributed to the inclement weather condition that hampers fishing operation. Nevertheless, availability of bangus, tilapia, galunggong, matambaka, frigate tuna, and shrimp were noted. WEEK 3-February 13-17, 2023 Limited supplies of fishery commodities were observed in the monitored markets. WEEK 4-February 20-24, 2023 Limited supply of fishery commodities were observed in the monitored retail markets this week. This might be due to the bad weather condition that affects the fishing operations of the fishermen.																						
R12 WEEK 1-January 30-February 3, 2023 Minimal supply of fishery commodities were observed in the monitored retail markets this week. Prices may be affected by the varying quality (in terms of sizes and freshness). WEEK 2-February 6-10, 2023 Supply of fishery commodities were available and stable in the monitored markets. WEEK 3-February 13-17, 2023 Minimal supplies of fishery commodities were observed in the monitored retail markets this week. This may be due to the occurrence of Low Pressure Area (LPA). WEEK 4-February 20-24, 2023 Due to bad weather condition, limited supply of fishery commodities were observed in the monitored markets. Prices may be affected by the transportation cost and quantity of the available supplies.																						
R13 WEEK 1-January 30-February 3, 2023 Supplies of fishery commodities were minimal which could be due to the heavy rainfall and bad weather condition. In connection, prices of displayed fishes were higher in the monitored markets. WEEK 2-February 6-10, 2023 Due to bad weather condition, minimal supplies of fishery commodities were observed among the monitored markets this week. WEEK 3-February 13-17, 2023 Low demand of fishery commodities were still observed in the monitored markets this week. WEEK 4-February 20-24, 2023 Some of the province have lack of supply which might be due to the bad weather condition. Low demand for fishery commodities continued to be apparent in the monitored markets.																						
NCR The following observations were gathered from market vendors and administrators for the month of January: 1. Ample volume of supplies for fresh marine commodities were noted among the monitored retail markets this month. However, for medium-sized local galunggong (<i>Decapterus macrosoma</i>) and alumahan (<i>Rastrelliger kanagurta</i>), minimal availability were recorded during the 1st to 3rd week of the month despite the lifting of closed fishing season in Northern Palawan last 1 February 2023 and in Visayan Sea last 15 Feb 2023. Abundant supplies for the said commodities were noted during the 4th week of the month. According to fish vendors, expect to have more supplies for local galunggong and alumahan available during the next few weeks as more unloadings will be observed following the lifting of closed fishing season for the two (2) fishery commodities. Nonetheless, other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>) and "burot" (<i>Decapterus kurroides</i>) were noted today. 2. For imported-frozen galunggong, sufficient supplies were still noted among the monitored retail markets this month. Majority of the fish vendors in the retail markets still prefer selling imported-frozen galunggong due to its cheaper price making it easier to sell than local galunggong. As supply of local galunggong still remain adequate but not abundant some vendors look for an alternative commodity like imported-frozen galunggong to augment the supply. There were also other imported-frozen commodities recorded like Atlantic Salmon, Chub mackerel, Squid, Pampano, Moonfish, Indian scad, and Bullet tuna this month. 3. Sufficient volume of supplies for bangus were noted among the monitored markets this month. This resulted to a stable prevailing retail price at Php160-180/kg. Some of the fish vendors, particularly in Galas, Muñoz and Tandang Sora markets prefer selling large-sized bangus due to higher demand from the consumers/buyers. 4. For tilapia, the prevailing retail price increased at Php140-150/kg this month. This may be attributed to the increased in the feeds price in farm production. Also, most of the reported supplies this month were mostly sourced from Batangas resulting to a higher price due to its premium quality and higher taste preference of consumers/buyers. 5. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Malabon Fish Port d. Imported Galunggong - Navotas Fish Port e. Alumahan - Malabon Fish Port 6. Lifted closed fishing season this month: a. Local galunggong (Decapterus sp.) - Northern Palawan - lifted last February 1 b. Sardines, Herrines, Mackerels - Visavan Sea - lifted last February 15																						
General Observation Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Anodontia edentula</i> or Imbao (Php 140.00-250.00 /kg) - supplies with the lowest prevailing price of Php 140.00/kg were recorded in Region 10 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 250.00/kg were recorded in Region 11 wherein the available supply were larger in size. 2. <i>Carangoides ferdau</i> or Talakitok (Php 220.00-350.00 /kg) - supplies with the lowest prevailing price of Php 220.00/kg were recorded in Region 3 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 350.00/kg were recorded in Region 5 wherein the available supply were larger in size. 3. <i>Carangoides</i> spp. or Talakitok (Php 250.00-450.00 /kg) - supplies with the lowest prevailing price of Php 250.00/kg were recorded in Region 4B wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 450.00/kg were recorded in Region 10 wherein the available supply were larger in size. 4. <i>Caranx sexfasciatus</i> or Talakitok (Php 300.00-480.00 /kg) - supplies with the lowest prevailing price of Php 300.00/kg were recorded in Region 1 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 480.00/kg were recorded in Region 4A wherein the available supply were larger in size. 5. <i>Decapterus russelli</i> or Galunggong Babae Local (Php 130.00-280.00 /kg) - supplies with the lowest prevailing price of Php 130.00/kg were recorded in Region 4A wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 6. <i>Glossogobius giuris</i> or Pijanga (Php 180.00 & 500.00 /kg) - supplies with the lowest prevailing price of Php 180.00/kg were recorded in CARAGA wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 500.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 7. <i>Hypogasterina temminckii</i> or Dilis (Php 100.00 & 200.00 /kg) - supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 5 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 200.00/kg were recorded in Region 11 wherein the available supply were larger in size. 8. <i>Jagora asperata</i> or Suso pilipit (Php 80.00 & 200.00 /kg) - supplies with the lowest prevailing price of Php 80.00/kg were recorded in Region 10 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 200.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 9. <i>Leiognathus splendens</i> or Sapsap (Php 240.00 & 400.00 /kg) - supplies with the lowest prevailing price of Php 240.00/kg were recorded in Region 5 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 400.00/kg were recorded in Region 4A wherein the available supply were larger in size. 10. <i>Lethrinus nebulosus</i> or Katambak (Php 200.00-350.00 /kg) - supplies with the lowest prevailing price of Php 200.00/kg were recorded in Region 1 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 350.00/kg were recorded in Region 8 wherein the available supply were larger in size. 11. <i>Macrobrachium rosenbergii</i> or Ulang (Php 160.00-350.00 /kg) - supplies with the lowest prevailing price of Php 160.00/kg were recorded in Region 11 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 350.00/kg were recorded in Region 3 wherein the available supply were larger in size.
