Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Abundant supplies of fresh marine commodities were noted among the monitored retail markets this week. This may be due to the following: a.) peak fishing season in the Philippines which usually begins in March. b.) weak presence of Northeast Monsoon or Amihan affecting only the extreme northern portion of Luzon, c.) and continuing fair weather condition in most parts of the country. For local-fresh galunggong, the prevailing retail price remained low at Php200.00/kg due to the abundant supplies noted among the monitored retail markets this week. The retail price for the said commodity began to decrease on March as abundant supplies continue to unload in different fish ports following the lifting of closed fishing season last 1 February 2023. Most of the supplies of local-fresh galunggong recorded were small to medium-sized (15-20pcs/kg) only sourced mainly from Navotas and Malabon Fish Port. Also, the prevailing price noted in Farmers and Galas markets remained high at Php300-320/kg as supplies were directly sourced from Lucena, Quezon (better quality in terms of freshness). Also, other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were recorded in some of the monitored retail markets this week. Supplies of imported-frozen galunggong remained adequate in the monitored retail markets despite the abundant supply of local galunggong. Most of the recorded supplies were medium to large-sized (7-13pcs/kg). According to fish vendors, some of them still prefer selling imported-frozen galunggong as some of their buyers favor uniform and larger size. The prevailing retail price remained at Php200.00/kg, which is similar to local galunggong as some of the vendors misdeclare their supply of imported commodity as local. Additionally, the presence of imported-frozen galunggong lalaki in the wet markets are possibly the remaining stocks from the arrived volume (24, 468 MT) of imported fish, as according to FIQD. Ample supply of alumahan were noted among the monitored retail markets this week. Most of the noted supplies this week were medium to large-sized. The prevailing retail price is at Php300.00/kg sourced mainly from Navotas and Malabon fish ports this week. The prevailing retail price of bangus is at Php160.00 & 180.00/kg this week as supplies were mostly sourced from Bulacan and Pangasinan. Nonetheless, supplies remained stable and sufficient among the monitored retail this week. Some of the vendors in Trabajo, Quinta, Tandang-Sora, Farmers, Balintawak and Galas Markets prefer selling large-sized bangus due to higher demand from the buyers. For tilapia, supplies remained stable and sufficient which resulted to a stable prevailing price at Php130.00/kg this week. Most of the supplies were sourced from Pampanga and Batangas. There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan, Pangasinan Tilapia - Batangas, Pampanga Local Galunggong - Navotas & Malabon Fish Ports Alumahan - Navotas & Malabon Fish Port According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Peneus monodon</i> or Supgo-small - (Php850-1100/kg) - both lowest and highest prevailing price were recorded at Farmers Market. The difference in the price may be due to the quality of the product wherein the lowest price were mostly old stock while the highest price were new stocks. <i>Sardinella fimbriata</i> or Tunsoy - (Php80.00-200.00/kg) - lowest prevailing price of Php80.00/kg were recorded at Navotas Market where abundant supplies were recorded resulting to a low price. Highest prevailing price of Php200.00/kg was noted at Malabon Market where supplies recorded were in good quality and sourced directly from Lucena, Quezon, hence, the higher price. <i>Rastrelliger kanagurta</i> or Alumahan - (Php200.00/kg & 360.00/kg) - lowest prevailing of Php200.00/kg were recorded at Polo Market where supplies were reportedly small to medium size, as compared to the highest prevailing of Php360.00/kg which were recorded at Marikina, Market where supplies were noted in medium to large size. <i>Elops howlandis</i> or Bidbid - (Php90.00-200.00/kg) - both the lowest and highest prevailing retail price were recorded in Polo Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 90.00/kg was small size and the highest prevailing price of Php200.00/kg was large-sized. <i>Glossogobius</i> sp. or Bias - (Php200.00/kg & 500.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php500.00/kg was noted at Marikina Market where supplies recorded were in good quality. <i>Orastiosquilla aratoria</i> or Tatampal puti - (Php400.00 & 500.00/kg) - both lowest and highest prevailing price were recorded at Polo Market. The difference in the price may be due to the quality of the product wherein the lowest price were mostly old stock while the highest price were new stocks. <i>Tylosorus</i> sp. or Batalay (Php120.00-300.00/kg) - both the lowest and highest prevailing retail price were recorded in Navotas Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 120.00/kg was small size and the highest prevailing price of Php300.00/kg was large-sized. 																										
<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market.
