(C) - Price and Volume not available during price monitoring  
(\* ) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA - Source Area not available during price monitoring

REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-FEBRUARY 27-MARCH 3, 2023

Due to cold weather condition, low volume of aquaculture commodities (i.e., bangus and tilapia) were noted this week.

Most of the supplies of tilapia in the Region were derived from Ambuklao Dam and Magat Dam.

Prices may be affected by the transportation cost, quality (in terms of sizes and freshness), and source areas.

WEEK 2-MARCH 6-10, 2023

Prices of displayed fishery commodities in the markets may be affected by source areas and quality (in terms of freshness and sizes).

Most of the supplies of tilapia in CAR were derived from Ambukalo Dam and Magat Dam.

WEEK 3-MARCH 13-17, 2023

Supplies of fishery commodities remained stable.

Prices may be affected by the quality (in terms of freshness and size) and source areas.

WEEK 4-MARCH 20-24, 2023

Supplies of fishery commodities remained stable in the monitored markets.

Prices may vary depending on the quality (in terms of sizes and freshness), and source areas.

Prices in the morning may also differ from the prices taken on the afternoon.

WEEK 5-MARCH 27-31, 2023

Supplies of fishery commodities were stable and available in the monitored markets this week.

Prices may vary depending on the source areas and quality (in terms of sizes and freshness).

<b>R5</b> <b>WEEK 1-FEBRUARY 27-MARCH 3, 2023</b> Sufficient supply of fishery commodities were noted in the monitored markets this week. Commodities recorded were squid, green mussels, pangasius, bighead carp, redbtail-scad, banana shrimp, Indian anchovy, and others. <b>WEEK 2-MARCH 6-10, 2023</b> Overall, abundant supplies of local fishery commodities were observed in the monitored markets this week. Nonetheless, presence of imported fishery commodities such as squid (pusit pula), Indian mackerel (salmunun), and round-scad (galunggong) were noted. <b>WEEK 3-MARCH 13-17, 2023</b> Supplies of fishery commodities remained abundant in the monitored markets this week. Commodities recorded were tilapia, bangus, shrimps, redbtail-scad, and others. Despite the abundant availability of local fishery commodities, imported fishes such as pompano were observed in the market. <b>WEEK 4-MARCH 20-24, 2023</b> Sufficient supplies of fishery commodities were noted in the monitored markets. Commodities recorded were bangus, tilapia, hipon, tahong, and others. Nonetheless, availability of imported pompano from Manila were observed in the markets. <b>WEEK 5-MARCH 27-31, 2023</b> Sufficient supplies of fishery commodities were observed in the monitored markets this week. Among the commodities recorded were bangus, tilapia, pickhandle barracuda, giant trevally, oriental sillago, fork-tail threadfin bream, moonfish, and others. Nonetheless, availability of imported commodities such as pompano were noted.																						
<b>R6</b> <b>WEEK 1-FEBRUARY 27-MARCH 3, 2023</b> Minimal but sufficient supply of fishery commodities were noted in the monitored markets. This could be due to the occurrence of Northeast Monsoon. Most of the abundant fishery commodities were bangus, galunggong, and bantae-an. <b>WEEK 2-MARCH 6-10, 2023</b> Despite the effect of Northeast Monsoon and full moon on 07 March, supplies of fresh marine commodities remained available and sufficient in the monitored markets this week. Commodities recorded were bisugo ( <i>Nemipterus</i> sp.), bluw swimming crab ( <i>Portunus pelagicus</i> ), and others. On the other hand, for aquaculture commodities (i.e., bangus and tilapia), supplies of the commodities remained ample for the consuming public. <b>WEEK 3-MARCH 13-17, 2023</b> Sufficient volumes of fishery commodities were observed in the monitored markets this week. Most of the displayed fishes were bangus, galunggong, and hasa-hasa. <b>WEEK 4-MARCH 20-24, 2023</b> The following were observed during the conduct of price monitoring in the region: 1. There are lot of consumers observed during the conduct of price monitoring. The most abundant fishery products are: Bangus ( <i>Chanos chanos</i> ) with recorded retail price of Php200.00-220.00/kg from Batangas; Moonfish (Mene maculata) with recorded price of Php200.00/kg from Antique; Big-eyed scad (Selar crumenupthalmus) with recorded price of Php200.00/kg from Libertad Antique, Tulisan (Encrasicholina sp.) with recorded price of Php100.00/kg from Tangalan, Aklan. 2. Sufficient supply of fishery commodities were observed in the market of Capiz; Prices of fish remain stable. 3. According to fish vendors, price of fishery commodities gradually going back to normal. Large volume of fish stocks were observed during the conduct of price monitoring in Guimaras. 4. Price of fish increased due to upcoming holy week. Currently, price of Bangus ( <i>Chanos chanos</i> ) increased from Php200.00-240.00/kg last week to Php200.00-260.00/kg, Gulaman (Gracilaria sp.) increased Php10.00 this week, Bisugo (Nemipterus sp.) from Php280.00-380.00/kg to Php300.00-400.00/kg in Iloilo. <b>WEEK 5-MARCH 27-31, 2023</b> Ample supplies of fishery commodities were recorded among the monitored markets this week. In fact, some of the fishery commodities decreased in price which may be caused by the abundant availability in the markets.																						
<b>R7</b> <b>WEEK 1-FEBRUARY 27-MARCH 3, 2023</b> Due to the unfavorable weather condition, supplies of fishery commodities were expensive. <b>WEEK 2-MARCH 6-10, 2023</b> Minimal supplies of fishery commodities were observed in the monitored markets this week. <b>WEEK 3-MARCH 13-17, 2023</b> Minimal supplies of fishery commodities were observed in the monitored markets. This could be due to the inclement weather condition. <b>WEEK 4-MARCH 20-24, 2023</b> Due to the unfavorable weather condition, supplies of fishery commodities were insufficient and expensive. <b>WEEK 5-MARCH 27-31, 2023</b> Due to the strong waves in the region, insufficient supplies of fishery commodities were observed in the monitored markets. Prices may vary depending on the quality (in terms of freshness), as some of the available supplies in the market were remaining stocks from previous market days.																						
<b>R8</b> <b>WEEK 1-FEBRUARY 27-MARCH 3, 2023</b> Sufficient displays of fishery commodities were observed in the monitored markets this week. Prices may vary depending on the sizes and source areas. <b>WEEK 2-MARCH 6-10, 2023</b> Sufficient supply of fishery commodities were observed during the conduct of price monitoring in the markets. Prices may vary depending of the quality (in terms of sizes and freshness) and quantity. <b>WEEK 3-MARCH 13-17, 2023</b> Sufficient supplies of fishes were noted during the conduct of price monitoring in the monitored markets this week. Prices may vary depending on the quality (in terms of size and freshness) and source areas. <b>WEEK 4-MARCH 20-24, 2023</b> Sufficient supply of fish was noted during price monitoring in the markets. Price variation may be due to the varying sizes, freshness, and quantity of supplies available. <b>WEEK 5-MARCH 27-31, 2023</b> Sufficient supplies of fishery commodities were noted during the conduct of price monitoring in the markets. Price difference may be due to the varying sizes, freshness, and quantity of supplies available.

R9																					
WEEK 1-FEBRUARY 27-MARCH 3, 2023																					
Less volume of fishes were traded in the monitored markets of Zamboanga.																					
WEEK 2-MARCH 6-10, 2023																					
Due to the strong winds and currents in the fishing ground, less volume of fish catch/ traded in the markets resulting to moderate high price.																					
WEEK 3-MARCH 13-17, 2023																					
Less volume of fishery commodities were observed in the monitored markets this week.																					
Price could be affected by the quality (in terms of freshness and sizes).																					
Moreover, the Closed Fishing Season (CFS) for sardines was lifted on March 1.																					
WEEK 4-MARCH 20-24, 2023																					
Due to the strong wind and observance of RAMADAN, less volume of fish catch/ traded in the market.																					
Price difference may be caused by the varying quality (in terms of sizes and freshness).																					
WEEK 5-MARCH 27-31, 2023																					
Due to the strong wind and observance of RAMADAN, less volume of fish catch/ traded in the market.																					
Price difference may be caused by the varying quality (in terms of sizes and freshness).																					
R10																					
WEEK 1-FEBRUARY 27-MARCH 3, 2023																					
Abundant supply of fishery commodities were observed in the monitored markets this week.																					
In fact, high supply of bangus, tilapia, and galunggong.																					
WEEK 2-MARCH 6-10, 2023																					
Abundant supply of fishery commodities were observed in the major markets this week.																					
In fact, high supply of bangus, tilapia, and galunggong were noted.																					
WEEK 3-MARCH 13-17, 2023																					
Abundant supplies of fishery commodities were observed in the major markets this week.																					
More specifically, for local galunggong, high supply of the commodity was noted.																					
WEEK 4-MARCH 20-24, 2023																					
Still, abundant supply of fishery commodities were noted in the major markets.																					
High supply of bangus and tilapia were noted this week.																					
Demersal fishes were expensive than pelagic fishes.																					
WEEK 5-MARCH 27-31, 2023																					
Still, abundant supply of fishery commodities were noted in the major markets.																					
High supply of bangus and tilapia were noted this week.																					
R11																					
WEEK 1-FEBRUARY 27-MARCH 3, 2023																					
Due to constant bad weather condition, low supply of fresh marine commodities were noted in the monitored markets.																					
WEEK 2-MARCH 6-10, 2023																					
As observed, inadequate supply of fishery commodities were observed especially in Madang and Tagum this week.																					
This might be due to the occurrence of Low Pressure Area (LPA) in the region.																					
WEEK 3-MARCH 13-17, 2023																					
Sufficient supply of fishery commodities were observed among the monitored markets this week.																					
There is minimal increment in the prices of some marine fishes in Tagum and Panabo public markets this week.																					
The minimal increment may be affected by the inclement weathere condition in the region which could affect the fishing activity of the fishermen.																					
WEEK 4-MARCH 20-24, 2023																					
As observed in public wet markets, sufficient supply of fishery commodities were noted during price monitoring.																					
WEEK 5-MARCH 27-31, 2023																					
As observed in public wet markets, sufficient supply of fishery commodities were noted this week.																					
R12																					
WEEK 1-FEBRUARY 27-MARCH 3, 2023																					
Overall, stable and sufficient supplies of fishery commodities were observed among the monitored markets this week.																					
Commodities recorded includes pusit, bangus, tilapia, and others.																					
WEEK 2-MARCH 6-10, 2023																					
Minimal but ample supplies of fishery commodities were observed among the monitored markets this week.																					
Among the commodities recorded were yellowfin tuna, squid, round scad, anchovy, tabyos, and others.																					
WEEK 3-MARCH 13-17, 2023																					
Overall, sufficient supplies of fishery commodities were observed in the monitored markets this week.																					
Consequently, abundant supplies of borot, tulay, pusit, tabyos, bolinao, and tamban were noted in General Santos Fish Port Complex.																					
Price difference might be due to the varying quality (in terms of freshness), as some of the observed supplies displayed in Tacurong City were remaining stocks from previous market days.																					
WEEK 4-MARCH 20-24, 2023																					
Stable supplies of fishery commodities were noted among the minitored markets.																					
More specifically in Tacurong City, enough supply of aquaculture commodities such as bangus, tilapia, and hito were noted.																					
WEEK 5-MARCH 27-31, 2023																					
Stable supplies of fishery commodities were noted among the minitored markets.																					
More specifically in Tacurong City, enough supply of aquaculture commodities such as bangus, tilapia, and hito were noted.

This could be due to the inclement weather condition which may affect the fishing operations of the fishermen.</div><div>Relative to this, prices of displayed fishes were high in the monitored markets.</div><div>Moreover, low demand for fishery commodities were still observed this week.</div><div>WEEK 5-MARCH 27-31, 2023</div><div>Minimal supplies of fishery commodities were observed in the monitored markets this week. This could be due to the inclement weather condition which may affect the fishing operations of the fishermen.</div><div>Relative to this, prices of displayed fishes were high in the monitored markets.</div><div>Moreover, low demand for fishery commodities were still observed this week.</div></div></div>																						
<div><div>NCR</div><div><div>The following observations were gathered from market vendors and administrators for the month of March:</div><div>1. More supplies of fresh marine commodities were observed among the monitored retail markets this month. This may be due to the following: a.) peak fishing season in the Philippines which usually begins in March. b.) weak presence of Northeast Monsoon or Amihan affecting only the extreme northern portion of Luzon. c.) and continuing fair weather condition in most parts of the country.</div><div>2. The prevailing retail price of local-fresh galunggong decreased from Php280.00/kg last February to Php200.00/kg this March due to the abundant supplies recorded among the monitored retail markets this month. According to fish vendors, more and more supplies of local-fresh galunggong were observed in different fishports this month and will continue to come for the coming weeks or months. Most of the available supplies recorded were still small to medium-sized (11-26pcs/kg) sourced mostly from Navotas and Malabon Fish Ports. Also, there were other local galunggong variants like "balsa" (Decapterus macarellus), "babae" (Decapterus russelli) and "burot" (Decapterus kurroides) recorded in some of the monitored retail markets this month.</div><div>3. For imported-frozen galunggong, there were still some vendors who were observed selling the said commodities in some of the monitored retail markets (Trabajo, Quinta, Mega-Q, Balintawak, Galas, Pasig) this month despite the available supply of its local variant. Some of the vendors in Trabajo and Quinta prefer selling imported-frozen galunggong due to its larger and uniform size which was preferred by its buyers/consumers. Also, some of the fish vendors prefer selling imported-frozen galunggong due to its cheaper price making it easier to sell. There were also other imported-frozen commodities recorded like chub mackerel, Atlantic salmon, squid, pampano, moonfish, Indian scad, and bullet tuna this month.</div><div>4. There is a slight decreased in the prevailing retail price of bangus at Php160.00/kg as most of the supplies recorded were sourced from Bulacan this month. Nonetheless, the volume of supplies remained sufficient and stable to cater the demand from the consumers. Some of the fish vendors, particularly in Galas, Tandang Sora, and Kamning markets prefer selling larger bangus due to its higher demand.</div><div>5. For tilapia, there is also decreased in the prevailing retail price at Php130.00/kg as more supplies were noted among the monitored retail markets this month. Most of the supplies were still mostly sourced from Batangas and Pampanga. There is still a Php10-20/kg price difference between live and dead tilapia. Some of the buyers prefer tilapia sourced from Batangas than tilapia sourced from Pampanga due to its premium quality and taste preference of consumers and buyers.</div><div>6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:<div><div>a. Bangus - Bulacan, Pangasinan</div><div>b. Tilapia - Batangas, Pampanga</div><div>c. Local Galunggong - Navotas, Malabon Fish Ports</div><div>d. Imported Galunggong - Navotas Fish Port</div><div>e. Alumahan - Malabon Fish Port</div></div></div></div></div>																						
<div><div>General Observation</div><div>Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.</div><div>1. <i>Scylla serrata</i> or Alimango (Female) (Php 650.00 &amp; 800.00 /kg) - supplies with the lowest prevailing price of Php 650.00/kg were recorded in Region 6, Region 9 and NCR wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 800.00/kg were recorded in Region 3, Regio 4B and Region 11 wherein the available supply were larger in size.</div><div>2. <i>Scylla serrata</i> or Alimango (Mixed) (Php 350.00 &amp; 700.00 /kg) - supplies with the lowest prevailing price of Php 350.00/kg were recorded in Region 5, Region 8, Region 10, CARAGA and NCR wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 700.00/kg were recorded in CAR, Region 4B, Region 6, Region 11 and CARAGA wherein the available supply were larger in size.</div><div>3. <i>Anodontia edentula</i> or Imbao (Php 150.00-270.00 /kg) - supplies with the lowest prevailing price of Php 150.00/kg were recorded in Region 10 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 270.00/kg were recorded in Region 11 wherein the available supply were larger in size.</div><div>4. <i>Carangoides armatus</i> or Talakitok (Php 345.00-600.00 /kg) - supplies with the lowest prevailing price of Php 345.00/kg were recorded in Region 11 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 600.00/kg were recorded in Region 4A wherein the available supply were larger in size.</div><div>5. <i>Carangoides ferdau</i> or Talakitok (Php 280.00-450.00 /kg) - supplies with the lowest prevailing price of Php 280.00/kg were recorded in Region 3 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 450.00/kg were recorded in Region 11 wherein the available supply were larger in size.</div><div>6. <i>Carangoides</i> spp. or Talakitok (Php 300.00-550.00 /kg) - supplies with the lowest prevailing price of Php 300.00/kg were recorded in Region 10 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 550.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</div><div>7. <i>Caranx sexfasciatus</i> or Talakitok (Php 300.00-460.00 /kg) - both the lowest and highest prevailing prices of Php 300.00 /kg and Php 460.00 /kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>8. <i>Cypselurus oligolepis</i> or Bangsi (Php 100.00-200.00 /kg) - both the lowest and highest prevailing prices of Php 100.00 /kg and Php 200.00 /kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>9. <i>Decapterus russelli</i> or Galunggong Babae Local (Php 140.00-240.00 /kg) - supplies with the lowest prevailing price of Php 140.00/kg were recorded in Region 4A wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 240.00/kg were recorded in Region 10 wherein the available supply were larger in size.</div><div>10. <i>Decapterus tabl</i> or Tabilos (Php 120.00-240.00 /kg) - both the lowest and highest prevailing prices of Php 120.00 /kg and Php 240.00 /kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>11. <i>Elaagatis</i> sp. or Salmon (Php 120.00-250.00 /kg) - both the lowest and highest prevailing prices of Php 120.00 /kg and Php 250.00 /kg, respectively, were recorded in Region 9. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>12. <i>Eleutheronema tetradactylum</i> or Bikaw (Php 120.00-280.00 /kg) - supplies with the lowest prevailing price of Php 120.00/kg were recorded in Region 12 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</div><div>13. <i>Glossogobius giuris</i> or Pijanga (Php 140.00-500.00 /kg) - supplies with the lowest prevailing price of Php 140.00/kg were recorded in CARAGA wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 500.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</div><div>14. <i>Lethrinus semicinctus</i> or Lagaw (Php 180.00 &amp; 450.00 /kg) - both the lowest and highest prevailing prices of Php 180.00 /kg and Php 450.00 /kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>15. <i>Lutjanus argentimaculatus</i> or Laya (Php 250.00-450.00 /kg) - supplies with the lowest prevailing price of Php 250.00 /kg were recorded in Region 4B wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 450.00 /kg were recorded in Region 10 wherein the available supply were larger in size.</div><div>16. <i>Macrobranchium rosenbergii</i> or Ulang (Php 100.00- 800.00 /kg) - supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 11 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 800.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</div><div>17. <i>Makaira mazara</i> or Malasugi (Php 400.00 &amp; 600.00 /kg)- supplies with the lowest prevailing price of Php 400.00 /kg were recorded in Region 9 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 600.00 /kg were recorded CARAGA wherein the available supply were larger in size.</div><div>18. <i>Metapenaeus ensis</i> or Suwahe (Php 400.00 &amp; 500.00 /kg) - supplies with the lowest prevailing price of Php 400.00 /kg were recorded in NCR wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 500.00 /kg were recorded in Region 4A wherein the available supply were larger in size.</div><div>19. <i>Mistichitys luzonensis</i> or Sinarapan (Php 80.00-360.00 /kg) - both the lowest and highest prevailing prices of Php 80.00 /kg and Php 360.00 /kg, respectively, were recorded in Region 12. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>20. <i>Naso lituratus</i> or Sungayan (Php 300.00 &amp; 400.00 /kg) - both the lowest and highest prevailing prices of Php 300.00 /kg and Php 400.00 /kg, respectively, were recorded in Region 1. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>21. <i>Naso hexacanthus</i> or Gangis (Php 230.00-330.00 /kg) - both the lowest and highest prevailing prices of Php 230.00 /kg and Php 330.00 /kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>22. <i>Naso</i> sp. or Surahan (Php 70.00 &amp; 230.00 /kg) - supplies with the lowest prevailing price of Php 70.00/kg were recorded in Region 4B wherein the said commodity was smaller in size, hence, price is lower compared to Region 10.</div><div>23. <i>Parastromateus niger</i> or Pompano Itim (Php 450.00-650 /kg) - both the lowest and highest prevailing prices of Php 450.00/kg and Php 650.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>24. <i>Salmo salar</i> or Salmon (Belly) (Php 300.00- 440.00 /kg) - both the lowest and highest prevailing prices of Php 300.00/kg and Php 440.00/kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>25. <i>Sillago argentifasciata</i> or Asuhos (Php 240.00-350.00 /kg) - supplies with the lowest prevailing price of Php 240.00/kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower compared to Region 10.</div><div>26. <i>Sillago</i> spp. or Asohos (Php 145.00-300/kg) - both the lowest and highest prevailing prices of Php 145.00/kg and Php 300.00/kg, respectively, were recorded in Region 9. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div><div>27. <i>Phyrraena obtusata</i> or Torsilyo (Php 180.00-400.00 /kg) - supplies with the lowest prevailing price of Php 180.00/kg were recorded in Region 11 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.</div><div>28. <i>Thunnus obesus</i> or Tulingan (Php 200.00-300.00 /kg) - supplies with the lowest prevailing price of Php 200.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to CARAGA.</div><div>29. <i>Trachinotus</i> sp. or Pampano (Black) (Php 300.00 &amp; 440.00/kg) - both the lowest and highest prevailing prices of Php 300.00/kg and Php 440.00/kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</div></div>
