Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <p>1. Minimal availability of fresh marine commodities were noted among the monitored retail markets this week. This could be influenced by the hampered fishing operations brought by the presence of tropical depression "Amang" affecting the southern portion of Luzon and Visayas. Also, low number of vendors and buyers were noted among the monitored retail markets. According to vendors, some of the buyers and their fellow vendors went for a vacation to their provinces (Holy Week) and has not yet returned this week.</p> <p>2. However, the volume of supplies for mediu-sized local-fresh galunggong remained ample at the monitored retail markets this week. This is resulted to a stable prevailing retail price of Php200.00/kg sourced mainly from Palawan. Higher prevailing price was still noted from Farmers Market as supplies were more fresh in terms of its quality as supplies were only sourced from Lucena, Quezon. Most of the supplies were still small to medium-sized (12-25pcs/kg). There were also other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) recorded in some of the monitored retail markets this week.</p> <p>3. Low supply of imported-frozen galunggong were recorded among the monitored retail markets this week. This may be attributed to the ample supply of local galunggong which is more preferred by consumers/buyers. The prevailing retail price was at Php200-240.00/kg this week. There were also other imported-frozen commodities like pampano, salmon mackarel, & pusit.</p> <p>4. The prevailing retail price of alumahan remained at Php300-320.00/kg due to the ample supplies this week. Most of the supplies remained medium to large-sized sourced mainly from Navotas and Malabon fish ports.</p> <p>5. For bangus, the prevailing retail price decreased at Php160.00/kg this week due to the decrease of the demand from the consumers following the end of Holy Week which happened last week (April 5-9). Most of the supplies were still sourced from Bulacan and Pangasinan. Some of the vendors in Trabajo, Tandang-Sora, Kamuning and Galas Markets prefer selling large-sized bangus due to higher demand from the buyers.</p> <p>6. No changes were noted for the prevailing retail price of tilapia at Php140.00/kg this week. This may be attributed to the sufficient and stable supply at the monitored markets. Most of the supplies were sourced from Pampanga and Batangas. There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.</p> <p>7. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Navotas & Malabon Fish Ports d. Alumahan - Navotas & Malabon Fish Port</p> <p>8. According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets.</p>																									
	<p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <p>1. <i>Peneaus monodon</i> or Supgo-small - (Php750-1050/kg) - both lowest and highest prevailing price were recorded at Farmers Market. The difference in the price may be due to the quality of the product wherein the lowest price were mostly old stock while the highest price were new stocks.</p> <p>2. <i>Rastrelliger kanagurta</i> or Alumahan - small - (Php80.00/kg & 200.00/kg) - lowest prevailing price of Php80.00/kg were recorded at Polo Market where abundant supplies were recorded resulting to a low price. Highest prevailing price of Php200.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced directly.</p> <p>3. <i>Glossogobius</i> sp. or Bias - (Php200.00/kg & 420.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php420.00/kg was noted at Marikina Market where supplies recorded were in good quality.</p> <p>4. <i>Leiopotherapon plumbeus</i> or Ayungin - (Php320.00 & 800.00/kg) - lowest prevailing price of Php320.00/kg were recorded at Pasig Market where abundant supplies were recorded resulting to a low price. Highest prevailing price of Php800.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.</p> <p>5. <i>Panulirus</i> sp. or Banagan (Php2500.00-3000.00/kg) - both the lowest and highest prevailing retail price were recorded in Farmers Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 2500.00/kg was smaller in size and the highest prevailing price of Php3000.00/kg was larger in size.</p>																									
<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p> <p>Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators Markets 11-16 (Malabon Central to Upang Valenzuela) - Monitored by BFAR-NCR Enumerators</p>
