**Remarks/Market Observations:**

The following observations were gathered from market personnel and vendors this week:

- Minimal but sufficient supplies of fresh marine commodities were observed among the monitored retail markets this week. This may be attributed to the following: a.) occurrence of bright moon which affects the fishing activity of the fishermen, wherein fishes tend to go deeper making them hard to catch; b.) presence of Low-Pressure Area (LPA) in the eastern part of Davao City; and c.) presence of Intertropical Convergence Zone (ITCZ) in Visayas and Mindanao.
- Nonetheless, volume of supply for medium-sized local-fresh galunggong remained sufficient and ample among the monitored retail markets this week. This resulted to a prevailing retail price at Php200.00/kg and its been stable for the past few weeks. All sizes for local-fresh galunggong were available at the monitored markets and were sourced mainly from Northern Palawan and Zambales. There were also other local galunggong variants like "balsa" (*Decapterus macarellus*), "babae" (*Decapterus russelli*) and "burot" (*Decapterus kurroides*) recorded in some of the monitored retail markets this week.
- Due to the abundant supply of local-fresh galunggong, less supplies of imported-frozen galunggong were available among the retail markets this week. In fact, only three (3) retail markets namely, Muñoz, Guadalupe and Polo Public markets have available supply. According to fish vendors in Muñoz market, some of their buyers (*Carinderia* vendors) prefer buying imported galunggong due to its uniform sizes. Nonetheless, most of the buyers still prefer local galunggong than imported galunggong. The prevailing retail price of imported-frozen galunggong was at Php140-240/kg this week. Also, other imported-frozen commodities like pompano, salmon mackarel, chabeta, pusit and tulingan were still observed in the market.
- For alumahan, ample volume of supplies were still noted among the monitored retail markets this week with a prevailing retail price of Php300.00/kg. Most of supplies were sourced from Malabon and Navotas Fish ports and all sizes were available.
- There is an increased in the prevailing retail prices of bangus at Php180.00/kg this week. According to fish vendors, there is a shift in the demand for aquaculture commodities as lesser volume were noted for marine commodities this week. Also, most of the available supply were mostly sourced from Pangasinan, which offers higher price due to its premium quality.
- Also for tilapia, higher prevailing retail price of Php140.00 & 150.00/kg were noted this week as most of the tilapia were sourced from Batangas. According to enumerators of NCR, most of the supply of tilapia was dominated by the supply from Batangas since the third week of April 2023. Moreover, as reported by region 3, the increase in the cost of feed mill resulted to fish farmers of tilapia from Pampanga opting to stop or reduce their operations until their profit margins are acceptable for them. This caused a decrease in supplies sourced from Pampanga among the retail markets. In Balintawak market, there is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas, Pampanga
  - Local Galunggong - Navotas & Malabon Fish Ports
  - Alumahan - Navotas & Malabon Fish Port
- According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets.

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Sytila serrata* or Alimango - medium - (Php600, 700, 750/kg) - lowest prevailing price of Php600.00/kg were recorded at Marikina and Pasig Markets where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php750.00/kg was noted at Polo and Farmers Markets where supplies recorded were in good quality.
- Decapterus macrostoma* or GG imported - medium - (Php140-240/kg) - lowest prevailing price of Php140.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php240.00/kg were noted from secondary Market (Guadalupe market) which sources their supplies from nearby primary markets (i.e. Farmers), resulting to relatively higher prices.
- Glossogobius giuris* or Bias - (Php160.00 & 380.00/kg) - lowest prevailing price of Php160.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php380.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
- Mullus surmuletus* or Salmonete - (Php240.00/kg & 440.00/kg) - lowest prevailing price of Php240.00/kg were recorded at Guadalupe Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php440.00/kg was noted at Marikina Market where supplies recorded were in good quality.
- Siganus canaliculatus* or Malaga - (Php120.00 & 350.00/kg) - both the lowest and highest prevailing retail price were recorded in Mega-Q Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 120.00/kg was smaller in size and the highest prevailing price of Php350.00/kg was larger in size.

(-) - Price and Volume not available during price monitoring  
 (-) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring
