Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Sufficient supplies of fresh marine commodities were noted among the monitored retail markets this week. This may be attributed to the following: a.) peak fishing season in the Philippines which usually begins in March, b.) and continuing fair weather condition in most parts of the country. For local-fresh galunggong, abundant volume of supplies were observed in all monitored retail markets this week. As a result, the prevailing retail price of local-fresh galunggong remained stable at Php200.00/kg and were stable for the past few weeks. Most of the supplies recorded were medium to large in size and were mainly sourced from Northern Palawan and Zambales. Also, other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were recorded in some of the monitored retail markets this week. Limited volume of supplies were observed for imported-frozen galunggong due to the abundant supply of local-fresh galunggong. More specifically, only two (2) retail markets (Guadalupe and Polo Public) was noted with available supply this week. According to fish vendors, majority of the consumers prefer buying local than imported galunggong. The prevailing retail price of imported-frozen galunggong was at Php150 & 200/kg this week. Other imported-frozen commodities like pompano, salmon mackarel, pusit kalawang and tulingan were still observed in the market. Sufficient supplies of medium-sized alumahan were noted among the monitored retail markets this week. The prevailing retail price of alumahan is at Php200, 280, 380.00/kg this week. The difference in the price may be due to the size, freshness and source area of the commodity. Supplies were mainly sourced from Malabon and Navotas Fish ports and were mostly sold in mixed sizes. The prevailing retail price of bangus remained at Php160.00/kg this week due to the stable and sufficient supplies at the market. According to vendors, lesser demand for aquaculture commodities were noted due to the cheaper price of fresh marine commodities. Some of the vendors in Munoz, Tandang Sora, and Galas Markets were observed selling large bangus due to its higher demand from the consumers/buyers. For tilapia, the prevailing retail price remained relatively high at Php150.00/kg as supplies were mostly sourced from Batangas. There is a decrease in the supply of tilapia sourced from Pampanga since the 3rd week of April. As reported by region 3, the increase in the cost of feed mill resulted to fish farmers of tilapia from Pampanga opting to stop or reduce their operations until their profit margins are acceptable for them. There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ul style="list-style-type: none"> a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Navotas & Malabon Fish Ports d. Alumahan - Navotas & Malabon Fish Port According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. 																									
	<p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Scylla serrata</i> or Alinango - mixed - (Php300 & 700/kg) - lowest prevailing price of Php300.00/kg were recorded at Maypajo Market where supplies recorded were small to medium size, hence, the lower price. Highest prevailing price of Php700.00/kg was noted at Polo Market where supplies recorded were medium to large size, hence the higher price. <i>Rastrelliger kanagurta</i> or Alumahan - (Php200, 280, 380/kg) - lowest prevailing price of Php200.00/kg were recorded at Mega-Q and Maypajo Markets where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php380.00/kg was noted at Mandaluyong and Guadalupe Markets where supplies recorded were in good quality. <i>Glossogobius giuris</i> or Bias - (Php200.00 & 420.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php420.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price. <i>Leiopotherapon plumbeus</i> or Ayungin - (Php600.00 & 800.00/kg) - both the lowest and highest prevailing retail price were recorded in Marikina Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 600.00/kg was smaller in size and the highest prevailing price of Php800.00/kg was larger in size. <i>Mullus surmuletus</i> or Salmonete - (Php240.00/kg & 440.00/kg) - lowest prevailing price of Php240.00/kg were recorded at Guadalupe Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php440.00/kg was noted at Marikina Market where supplies recorded were in good quality. <i>Stolephorus comersonii</i> or Dilis - (Php120.00 & 320.00/kg) - lowest prevailing price of Php120.00/kg were recorded at Pasig Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php320.00/kg was noted at Guadalupe Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
