Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Lesser volume of fresh marine commodities were noted among the monitored retail markets this week. This may be due to the inclement weather condition brought by Typhoon "Betty" resulting to halted fishing operations in affected areas plus the effects of full moon on June 4 where fishes tend to go deeper making them harder to catch. Ample supply of local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>) were noted among the monitored retail markets this week. This resulted to a stable prevailing retail price at Php200.00/kg of local-fresh galunggong and have been stable for the past few weeks. All sizes were recorded among the monitored retail markets this week sourced from Northern Palawan. There were also other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babea" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) recorded in some of the monitored retail markets this week. For imported-frozen galunggong, supplies remained minimal as only one market (Polo Public Market) had an available supply due to the ample supplies of its local variants. In addition, only limited vendors get supplies of imported galunggong as buyers more prefer local than imported. The prevailing retail price of imported-frozen galunggong was at Php140.00 & Php150.00/kg this week. There are other imported-frozen commodities like pampano, salmon mackerel, pusit kalawang, and tulingan still observed in the market. Adequate volume of alumahan were noted at the monitored retail markets this week. Availability of supplies remain unpredictable especially due to the rainy weather condition brought by Typhoon "Betty" this week. The prevailing retail price this week is at Php200.00/kg as supplies remained adequate and most of the supplies recorded were stocks from previous market days. The prevailing retail price of bangus increased at Php180.00/kg this week as supplies were recorded mostly from Pangasinan. Also, the decrease in the volume of supplies for fresh marine commodities resulted to the shift in demand for aquaculture commodities. Fish vendors in Quinta, Mega-Q, Tandang Sora, and Kamuning markets were observed selling large-sized bangus due to its higher demand from the consumers/buyers. For tilapia, the prevailing retail prices are at Php120.00/kg and Php150.00/kg this week. The difference in the price may be due to the quality of the commodity as higher price were noted for live than fresh-chilled. Most of the supply were still sourced from Batangas since the 3rd week of April. As reported by region 3, the increase in the cost of feed mill resulted to fish farmers of tilapia from Pampanga opting to stop or reduce their operations until their profit margins are acceptable for them. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ul style="list-style-type: none"> a. Bangus - Pangasinan b. Tilapia - Batangas c. Local Galunggong - Navotas & Malabon Fish Ports d. Alumahan - Navotas & Malabon Fish Port According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. 																								
	<p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Peneaus monodon</i> or Suugo - Medium - (Php900.00 & 1000.00/kg) - both the lowest and highest prevailing retail price were recorded in Polo Market. The difference in the price were due to the quality of the commodity, wherein the supply of lowest prevailing price of 800.00/kg were stocks from previous market days, hence, the lower price and the highest prevailing price of Php1000.00/kg was newer stocks and were just freshly delivered. <i>Dendrophysa russelli</i> or Alakaak - (Php120.00 & 320.00/kg) - lowest prevailing price of Php120.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php320.00/kg was noted at Mandaluyong Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price. <i>Metapeneus ensis</i> or Suwaha - (Php360.00 & 600.00/kg) - lowest prevailing price of Php360.00/kg were recorded at Guadalupe Market where supplies were small to medium in size, hence, the lower price. Highest prevailing price of Php600.00/kg was noted at Polo Market where supplies recorded were large size, hence, the higher price. <i>Oratosquilla oratoria</i> or Tatampal Puti - (Php300.00 & 500.00/kg) - both the lowest and highest prevailing retail price were recorded in Polo Market. The difference in the price were due to the size of the commodity, wherein the supply of lowest prevailing price of 300.00/kg was smaller in size and the highest prevailing price of Php500.00/kg was larger in size. <i>Pseudorhombus sp.</i> or Dapa - (Php200.00/kg & 400.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php400.00/kg was noted at Mandaluyong Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price. <i>Stolephorus comersonii</i> or Dilis - (Php180.00 & 300.00/kg) - lowest prevailing price of Php180.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php300.00/kg was noted at Guadalupe Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price. 																								
	<p>(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p>
