(-) - Price and Volume not available during price monitoring

(\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

#### REMARKS AND MARKET OBSERVATIONS

# WEEK 1-MAY 1-5, 2023 - WEEK 4-MAY 22-26, 2023

Supplies of fishes were steady.

Supplies available in the monitored markets were obtained from nearby regions.

Majority of the supplies of tilapia were still sourced from Ambukalo Dam and Magat Dam.

Nonetheless, price may be affected by the source areas and quality (in terms of sizes and freshness).

#### WEEK 5-MAY 29-IUNE 2, 2023

Lesser volume of supplies of fishes were observed in the markets. This may be due to the inclement weather condition caused by Typhoon "Betty".

Supplies were purchased from the dealers of Baguio City.

Prices may be affected by the quality (in terms of sizes and freshness) of the commodity.

## WEEK 1-MAY 1-5, 2023

Majority of the commodities during price monitoring were bangus, tilapia, and galunggong.

Presence of imported-frozen galunggong were also observed in Ilocos Sur, La Union, and Pangasinan with recorded price of Php70.00/kg-Php200.00/kg. Price difference may be attributed to the varying sizes, as supplies with highest recorded price were large-sized.

## WEEK 2-MAY 8-12, 2023 - WEEK 3-MAY 15-19, 2023

Majority of the aquaculture commodities available were bangus and tilapia.

Nonetheless, marine fishes such as local-fresh galunggong was also present.

Presence of imported-frozen galunggong was also recorded in the monitored wet markets of La Union and Pangasinan at ranged prices from Php100.00/kg (small) to Php180.00/kg (large).

### WEEK 4-MAY 22-26, 2023

Supplies of fishery commodities remained available in the monitored markets.

Commodities recorded were bangus, tilapia, galunggong, and others.

Also, presence of imported-frozen galunggong were noted this week.

## WEEK 5-MAY 29-IUNE 2, 2023

Few quantities of marine fishes were observed in the monitored markets this week.

This may be due to the bad weather condition.

Presence of imported-frozen galunggong were also observed in the wet markets of La Union and Pangasinan at range prices from Php100.00/kg to Php180.00/kg. Price difference may be due to the varying sizes of supplies.

## WEEK 1-MAY 1-5, 2023 - WEEK 2-MAY 8-12, 2023

Supplies of fishes were steady among the monitored markets this week.

## WEEK 3-MAY 15-19, 2023

Don Domingo Public Market: The price of malaga increased due to the increasing price of feeds and fingerling cost. Frequent raining has decreased the supply of fresh fish from nearby coastal areas.

Solano Public Market: . The fish supply in the market is sufficient. The fish they were selling was live and fresh with sufficient ice.

Diffun Public Market: Vendors sell limited species of fish and other fishery products due to minimal demand. There is no change in the prevailing prices of the available supplies of fish in the market. Tilapia as the locally available supply in the province remained stable and sufficient.

# WEEK 4-MAY 22-26, 2023

Supplies of fishery commodities were stable among the monitored markets this week.

# WEEK 5-MAY 29-JUNE 2, 2023

No changes in the status of supplies and prices of the fishery commodities in the monitored markets.

# WEEK 1-MAY 1-5, 2023

At the monitored market in Nueva Ecjia, supplies were steady.

# WEEK 1-MAY 1-5, 2023 - WEEK 4-MAY 22-26, 2023

Availability of fresh marine commodities remained adequate in all monitored markets this week.

#### Fluctuation in the prices of fishery commodities may be influenced by a number of factors such as the commodity's size, volume of supply, source area and other natural phenomena (i.e., presence of Typhoon) WEEK 5-MAY 29-JUNE 2, 2023

Despite the inclement weather condition, fresh marine commodities remained adequate in all the monitored markets this week.

### Price fluctuation may be influenced by the varying sizes, volume of supply, and source areas.

## WEEK 1-MAY 1-5, 2023

Supplies of fishery commodities in all the monitored markets except Calapan City, Occidental Mindoro, were sufficient this week.

The continous minimal availability of fishes in Calapan City may be due to the ongoing fishing ban caused by the incidence of oil spill.

### WEEK 2-MAY 8-12, 2023

As observed this week, prices were higher which may be affected by the transportation cost wherein it add up to the price of commodity.

## WEEK 3-MAY 15-19, 2023

Price is high due to transportation expenses.

## WEEK 4-MAY 22-26, 2023

Price increment of fishes available could be caused by the transportation expenses.

## WEEK 5-MAY 29-IUNE 2, 2023

High price of fishes in the monitored markets may be due to the logistic cost.

#### R5

# WEEK 1-MAY 1-5, 2023

Due to the presence of full moon, minimal supplies of fishery commodities were observed this week.

Nonetheless, supplies of aquaculture commodities (i.e., bangus, tilapia) were abundant for the consumers/ buyers.

#### WEEK 2-MAY 8-12, 2023

Abundant supply of fishes were observed at the monitored markets.

In fact, low prices were observed in some of the displayed fishes.

Also, supplies of bangus and tilapia were ample for the consumers/ buyers.

### WEEK 3-MAY 15-19, 2023

Sufficient supplies of fishery commodities were noted among the monitored markets.

Nonetheless, supplies of other marine fishes were not available in the province of Sorsogon which might be due to the heavy rainfall.

Supplies of aquaculture commodities such as bangus, tilapia, and shrimp remained ample for the consuming public.

#### WEEK 4-MAY 22-26, 2023

Minimal supplies of marine fishery commodities were observed at the monitored markets this week.

This might be due to the occurrence of typhoon which hampers fishing operations.

Likewise, minimal supplies of aquaculture commodities (i.e., bangus, tilapia, and shirmp) were recorded.

### WEEK 5-MAY 29-JUNE 2, 2023

Due to the heavy rainfall, lesser volume of supplies of marine fishes were observed this week.

Nonetheless, supplies of aquaculture commodities (i.e., bangus and tilapia) remained ample.

#### R6

#### WEEK 1-MAY 1-5, 2023

Sufficient supplies of fishery commodities were noted.

More specifically, for tamban, more volumes were observed this week.

Prices may be affected by the varying sizes and freshness.

#### WEEK 2-MAV 8-12 2023

Sufficient supply of fishery commodities were recorded among the monitored retail markets.

Price may vary due to the varying quality (in terms of freshness and sizes) and volume of supplies.

## Lot of consumers were also observed during the conduct of price monitoring.

#### WEEK 3-MAY 15-19, 2023

Ample supplies of fishery commodities were noted during the conduct of price monitoring in all the monitored markets this week.

In fact, some of the diplayed fishes decreased in price which could be due to the abundant volume of supply.

### WEEK 4-MAY 22-26, 2023

Sufficient supplies of fishery commodities were noted in the monitored markets this week.

Among the commodities recorded were tambakol, lapu-lapu, pusit, and others.

Meanwhile, for aquaculture commodities such as bangus and tilapia, supplies were still present in the monitored markets.

However, price of bangus, tilapia, and hipon were reportedly increased in Negros Occidental this week.

## WEEK 5-MAY 29-JUNE 2, 2023

Due to the bad weather condition brought about by the effect of Typhoon "Betty", limited displays of fresh marine commodities were observed among the monitored markets this week.

Moreover, some of the marine commodities increased in price.

Nonetheless, supplies of aquaculture fishes such as bangus and tilapia remained stable.

#### R7

## WEEK 1-MAY 1-5, 2023

Steady and sufficient supplies of fishery commodities were observed this week.

# WEEK 2-MAY 8-12, 2023

Sufficient and affordable supplies of fishes were observed.

#### WEEK 3-MAY 15-19, 2023

Sufficient supplies of fishery commodities were observed.

Consequently, price remained affordable in the monitored markets.

# WEEK 4-MAY 22-26, 2023

Price of fishery commodities in the monitored markets may be influenced by the quality (in terms of freshness) of the commodity.

### WEEK 5-MAY 29-JUNE 2, 2023

Limited volume of supplies were noted in the monitored markets. This could be due to the effect of Southwest Monsoon (Habagat) and Typhoon "Betty" in the country.

#### R

## WEEK 1-MAY 1-5, 2023

Sufficient supply of fishes were noted during price monitoring.

Price variation depends on the size, source areas, and well as volume of supplies available.

## WEEK 2-MAY 8-12, 2023

Sufficient supply of fishes was observed in the monitored markets.

Price difference may be attributed to the varying sizes, freshness, source areas, and volume of supplies. Also, weather condition could affect the supplies wherein it hampers the fishing operations of the fishermen.

#### WEEK 3-MAY 15-19, 2023

Sufficient supply of fishes were noted during the conduct of price monitoring.

Price variation may be due to the varying sizes, source area, and volume of supply available.

#### Also, weather condition might affect the volume of the marine fishes in the market.

## WEEK 4-MAY 22-26, 2023

Sufficient supply of fishery commodities were noted during the conduct of price monitoring.

Price may vary depending on the quality (in terms of freshness and sizes). Also, weather condition may affects the price.

#### WEEK 5-MAY 29-JUNE 2, 2023

Sufficient supply of fishes were observed during the conduct of price monitoring.

Price may vary depending on the source area, quantity of supplies, and quality (in terms of sizes and freshness).

Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg) High Low

#### R9

# WEEK 1-MAY 1-5, 2023

Less volume of supplies were observed in the monitored market. This may be due to the occurrence of full moon.

Price difference may be due to the varying quality (in terms of sizes and freshness).

#### WEEK 2-MAY 8-12, 2023

Minimal supplies of marine fishes were observed among the monitored markets this week. This might be due to the full moon activity on 05 May wherein fishes tends to go deeper making it hard for the fishermen to catch.

Another factor for the price difference is the quality (in terms of sizes and freshness). Generally, leftover supplies were cheaper as compared to new unloaded supplies

### WEEK 3-MAY 15-19, 2023

Due to the presence of Low Pressure Area (LPA), less volume of supplies were observed.

Price difference could be affected by the varying quality and size.

### WEEK 4-MAY 22-26, 2023

Less volume of fishes were observed in the monitored markets this week.

This may be due to the inclement weather condition brought about by the presence of Typhoon Betty.

### WEEK 5-MAY 29-JUNE 2, 2023

Less volume of fishes were traded in the market. This may be caused by the inclement weather condition hampering the fishing operations of the fishermen.

Price difference might be attributed to the varying freshness and sizes.

#### R10

## WEEK 1-MAY 1-5, 2023

As observed in the monitored markets, high supply of fishes were noted in the major markets.

Also, high supply of aquaculture commodities such as bangus and tilapia.

#### WEEK 2-MAY 8-12, 2023

High supply of fishery commodities were observed in the major markets.

In fact, ample supplies of aquaculture commodities such as bangus and tilapia were recorded.

Adequate supply of local-fresh galunggong was also noted.

#### WEEK 3-MAY 15-19, 2023

High supply of fishes were observed in the major markets.

More specifically, abundant supply of bangus, tilapia, and galunggong were recorded.

## WEEK 4-MAY 22-26, 2023

Low supply of marine fishery commodies were observed. This may be due to the bad weather condition in the country.

However, high supplies of bangus, tilapia, and galunggong were recorded.

### WEEK 5-MAY 29-JUNE 2, 2023

Low supply of galunggong were observed this week. This may be due to the inclement weather condition.

Nonetheless, for aquaculture commodities like bangus and tilapia, supplies were still available for the consuming public.

#### R11

## WEEK 1-MAY 1-5, 2023

Minimal supplies of fishery commodities were observed which might be due to the inclement weather condition and occurrence of full moon.

# WEEK 2-MAY 8-12, 2023

Due to the inclement weather condition, supply of fishery commodities were minimal.

This resulted to price increment of some displayed fishes.

## WEEK 3-MAY 15-19, 2023

As observed, adequate volume of supply was observed in the monitored markets except in Tagum Public Market.

Supply of marine commodities could be affected by the inclement weather condition which hampers fishing operations.

## WEEK 4-MAY 22-26, 2023

Limited supplies of fishery commodities except bangus and tilapia were noted.

## WEEK 5-MAY 29-JUNE 2, 2023

Limited supplies of marine fishery commodities were observed in all the monitored markets except in Malita Public market where supplies were abundant.

The decresed in supplies of marine fishes might be attributed to the bad weather condition brought about by the presence of Typhoon "Betty".

#### R12

## WEEK 1-MAY 1-5, 2023

Due to the bad weather condition, minimal supplies of fishery commodities were observed.

Price changed may be attibuted to the varying freshness, as old stocks commands lower price.

### WEEK 2-MAY 8-12, 2023

Sufficient supplies of marine fishes were reported this week.

Commodities recorded were matambaka, borot, chabita, pusit, and others.

Price variation could be caused by the difference in sizes and freshness.

### WEEK 3-MAY 15-19, 2023

Stable supplies of fishery commodities were observed among the monitored markets.

High volume of supply of moonfish, bilong-bilong, burot, pusit, matambaka at General Santos Fish Port Complex was recorded,

### WEEK 4-MAY 22-26, 2023

Ample supplies of fishery commodities were recorded in the monitored markets.

Nonetheless, few supplies of marine fishes were noted in General Santos Fish Port Complex which could be due to the inclement weather condition.

## WEEK 5-MAY 29-JUNE 2, 2023

finimal but sufficient supplies of fishes were observed in the monitored markets this week.

Supplies of marine fishes may be affected by the bad weather condition.

Meanwhile, supplies of aquaculture commodities (i.e., bangus and tilapia) continued to be stable and sufficient in the markets.

TOI	P FISHERY COMMODITION	ES																	NATIONAL
Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR F	Prevailing Price (Php/kg) High Low

WEEK 1-MAY 1-5, 2023

Due to the inclement weather condition, supplies of fishery commodities were minimal.

ow demand for fishery commodities were still observed among the monitored markets.

finimal supplies were noted which may be due to the bad weather condition.

Consequently, some provinces have lack of supply, hence prices were high.

Moreover, low demand for fishery commodities were observed.

#### WEEK 3-MAY 15-19, 2023

More supplies were noted in some provinces.

Nevertheless, low influx of buyers continued to be observed at the monitored markets.

#### WEEK 4-MAY 22-26, 2023

Due to bad weather condition, lack of supplies were observed.

ow influx of buyers were still noted in the monitored markets.

#### WEEK 5-MAY 29-IUNE 2, 2023

imited availability of fishes were still observed in the monitored markets.

Also, low influx of buyers were noted.

#### The following observations were gathered from market vendors and administrators for the month of May:

1. Still, sufficient supplies of fresh marine commodities were recorded among the monitored retail markets on the third and fourth week of the month. On the other hand, lesser volume of supplies was noted on the first, second, and fifth week of the month which migth be caused by the (a) occurrence of bright moon, wherein fishes tend to go deeper making them hard to catch, (b) presence of Low-Pressure Area (LPA) in the eastern part of Davao City, Intertropical Convergence Zone (ITCZ) in Visayas and Mindanao and (c) pressence of Typhoon "Betty" on May 27-June 1, 2023. Nonetheless, adequate supplies of local fresh galunggong lalaki (Decapterus macrosoma) was noted among the monitored retail markets sourced mainly from Navotas and Malabon Fish Ports. 2. For imported-frozen galunggong lalaki, minimal supplies of the commodity was observed this month. This may be due to the constant availability of local galunggong lalaki and its variants in the monitored markets.

3. Availability of alumahan remained sufficient in the monitored retail markets. However, majority of the display was observed to be large-sized sourced from Lucena (Quezon), Malabon, and Navotas Fish Ports.

4. Sufficient supply of aquaculture commodities (i.e., bangus and tilapia) were still observed among the monitored wet markets this month. Meanwhile, minimal display of medium-sized bangus was observed as large-sized (1-2pcs/kg) bangus remained to be the majority of displayed sizes in the monitored markets. Supplies were sourced from Pangasinan and Bulacan. Consequently, ample supply of tilania was still noted chiefly sourced from Batangas.

5. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:

- a, Bangus Bulacan, Pangasinan
- b. Tilapia Batangas, Pampanga
- c. Local Galunggong Navotas, Malabon Fish Ports d. Imported Galunggong - Navotas Fish Port

Alternate National Consolidator

- e. Alumahan Malahon Fish Port

#### General Observation

Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.

1. Scylla serrata or Mudcrab (Female) (Php 650.00 & 800.00/kg) - supplies with the lowest prevailing price of Php 650.00 /kg were recorded in Region 1.0 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 800.00/kg were recorded in Region 1.0 wherein the available supply were larger in

- 2. Alepes djedaba or Salay batang (Php 240.00-400.00/kg) supplies with the lowest prevailing price of Php 240.00/kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.
- 3. Carangoides armatus or Talakitok (Php 350.00-450.00 /kg)-both the lowest and highest prevailing prices of Php 350.00/kg and Php 450.00/kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 4. Carangoides ferdau or Talakitok (Php 230.00 & 350.00/kg) - supplies with the lowest prevailing price of Php 230.00/kg were recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower compared to Region 3.
- 5. Carangoides malabaricus or Talakitok (Php 300.00 & 400.00 /kg)-both the lowest and highest prevailing prices of Php 300.00/kg and Php 400.00/kg, respectively, were recorded in Region 6. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 6. Carangoides spp. or Talakitok (Php 350.00 & 500.00 /kg) supplies with the lowest prevailing price of Php 350.00/kg were recorded in NCR wherein the available supply were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 500.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.
- 7. Caranx ignobilis or Talakitok (Php 200.00-380.00 /kg)-both the lowest and highest prevailing prices of Php 200.00/kg and Php 380.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 8. Eleutheronema tetradactylum or Bikaw (Php 90.00-280.00 /kg) -supplies with the lowest prevailing price of Php 90.00/kg were recorded in NCR wherein the available supply were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced. from other regions and larger in size, hence, price was higher.
- 9. Gerres sp. or Latab (Php 130.00-300.00 /kg) -supplies with the lowest prevailing price of Php 130.00/kg were recorded in Region 9 wherein the available supply were sourced from other regions and larger in size, hence, price was higher
- 10. Gobiopterus lacustris or Dulong (Php 240.00 & 360.00/kg)- supplies with the lowest prevailing price of Php 240.00/kg were recorded in NCR wherein the available supply were sourced from other regions, hence, price was higher.
- 11. Hypoatherina temminckii or Dilis (Php 100.00-250.00/kg) supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.
- 12. Istiophorus playpterus or Malasugi (Php 300.00 & 400.00/kg) supplies with the lowest prevailing price of Php 300.00 /kg were recorded in Region 11 and CARAGA wherein the available supply were larger in size.
- 13. Naso hexacanthus or Gangis (Php 200.00 & 300.00/kg)- both the lowest and highest prevailing prices of Php 200.00/kg and Php 300.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 14. Naso sp. or Surahan (Php 200.00-350.00 /kg) supplies with the lowest prevailing price of Php 200.00 /kg were recorded in Region 1 wherein the available supply were larger in size. Meanwhile, supplies with the highest prevailing price of Php 350.00 /kg were recorded in Region 1 wherein the available supply were larger in size.
- 15. Nemipterus nematophorus or Saguision (Php 260.00-500.00 /kg)-both the lowest and highest prevailing prices of Php 260.00/kg and Php 500.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 6. Otolithes ruber or Abo (Php 160.00-260.00 /kg) -both the lowest and highest prevailing prices of Php 160.00/kg and Php 260.00/kg, respectively, were recorded in Region 5. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 7. Paphia undulata or Buranday (Php 100.00 & 200.00 /kg) -both the lowest and highest prevailing prices of Php 100.00/kg and Php 200.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available
- 18. Parupeneus indicus or Timbungan (Php 260.00-380.00 /kg) -both the lowest and highest prevailing prices of Php 260.00/kg and Php 380.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 19. Priacanthus tayenus or Siga (Php 200.00 & 300.00 /kg) -supplies with the lowest prevailing price of Php 200.00 /kg were recorded in Region 4A wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 300.00 /kg were recorded in Region 4A wherein the available supply were larger in size.
- 20. Sillago sihama or Asohos (Php 130.00-360.00 /kg) supplies with the lowest prevailing price of Php 130.00/kg were recorded in NCR wherein the available supply were sourced from other egions and larger in size, hence, price was higher.
- 21. Spratelloides gracilis or Dilis (Php 100.00-200.00 /kg) supplies with the lowest prevailing price of Php 100.00/kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to CARAGA.

National Consolidator

- 22. Sphyraena jello or Torsilyo (Php 100.00-280.00 /kg)—both the lowest and highest prevailing prices of Php 100.00/kg and Php 280.00/kg, respectively, were recorded in Region 9. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
- 23. Thunnus obesus or Barilis (Php 125.00-480.00 /kg) supplies with the lowest prevailing price of Php 125.00 /kg were recorded in Region 9 wherein the available supply were sourced from other regions and larger in size, hence, price was higher.

Program Leader, National Fisheries Price Monitorina Program

(2nd level)

24. Upeneus spp. or Saramulyete (Php 150.00-300.00 /kg) - both the lowest and highest prevailing prices of Php 150.00/kg and Php 300.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.
