Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> According to the fish vendors, adequate supplies of fresh marine commodities were available at the monitored retail markets this week. Relative to this, sufficient volume of supplies for local-fresh galunggong lakali (<i>Decapterus macrosoma</i>) was still observed sourced mainly from Navotas Fish Port. However, low influx of buyers were still observed among the monitored markets. As a result, fish vendors are coping by selling lower volume of supplies and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some fish vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets. Meanwhile, only Polo Public Market was noted to have supply of imported frozen galunggong lakali this week sourced from Obando, Bulacan. For alumahan, large-sized continued to be evident in most of the monitored wet markets this week. Also, available supply of other variant (i.e., Hasa-hasa) was present chiefly sourced from Malabon Fish Port. Adequate availability of bangus and tilapia were still observed in the monitored retail markets throughout the week. Nonetheless, supply of medium-sized bangus remain limited as majority are still large size sourced from Bulacan and Dagupan. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ul style="list-style-type: none"> a. Bangus - Bulacan b. Tilapia - Batangas c. Local Galunggong - Navotas Fish Port d. Imported-frozen Galunggong - Obando, Bulacan d. Alumahan - Malabon Fish Port 																														
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Glossogobius celebicus</i> or Biya -medium (Php200.00 - 450.00/kg)- lowest prevailing price of Php. 200.00/kg was recorded in Polo Public Market wherein supplies observed are smaller in size hence offer cheaper as compared to the supply recorded in Mandaluyong Public Market which are reported to be larger size and noted to have better quality in terms of freshness sourced from Lucena. <i>Leiopotherapon plumbeus</i> or Ayungin (Php360.00-800.00/kg)- Similarly, variations in price are attributed due to the size of the commodity. Wherein, the lowest recorded price of Php360.00/kg was observed smaller size as compared to the highest recorded price of Php800.00/kg. <i>Lethrinus miniatus</i> or Bitilya (Php200.00-320.00/kg)- Lowest recorded price of Php200.00/kg was observed in Marikina Public Market wherein smaller size of the commodity was noted. Meanwhile, highest recorded price of the commodity was noted in Polo Public Market which supplies are noted to have larger size, hence offer relatively higher. <i>Mullus surmuletus</i> or Salmonete (Php200.00-440.00/kg)- Meanwhile, lowest prevailing price of Php200.00/kg was observed in Pasig market wherein supply are noted to have low quality in terms of freshness hence offer in a cheaper price. Meanwhile, highest recorded price of Php440.00/kg noted in Marikina market was observed to have better quality in terms of freshness sourced from Lucena. 																														
	<p>(-) - Price Not Available During Price Monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p>
