**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- For fresh marine commodities, lesser but still ample volume of supplies were observed among the monitored retail markets this week. This may be attributed to the rainy weather condition brought by the low pressure area at east of Borongan city, Eastern Samar this week which hampered fishing operations of fisherfolks resulting to low unloaded supplies at different fishports.
- However, the supply of local-fresh galunggong lalaki (*Decapterus macrosoma*) remained sufficient and available in all monitored retail markets this week. As a result, same prevailing retail price at Php200-240/kg were noted this week. According to price enumerators, all sizes of the commodity was recorded and source mainly from Navotas and Malabon Fish Ports. Also, other local galunggong variants like "balsa" (*Decapterus macarellus*), "babae" (*Decapterus russelli*) and "burot" (*Decapterus kurroides*) were noted in some of the monitored retail markets this week.
- Due to the ample supply of local-fresh galunggong this week, only one (1) retail market namely Polo Public Market were observed to have available supplies. According to vendors, most of the buyers prefer local-fresh galunggong than imported-frozen galunggong. The prevailing retail price is at Php150.00/kg this week. Other imported-frozen commodities like pampano, salmon mackarel, pusit kalawang, and tulingan were still present in the market.
- Adequate supplies for medium-sized alumahan were still observed at the monitored retail market this week. The prevailing retail price is at Php240.00/kg this week. Supplies were mostly sourced from Malabon and Navotas Fis Ports.
- The prevailing retail price of bangus remained at Php160.00/kg and its been stable for the past few weeks. The stable price may be attributed to the sufficient supplies among the monitored retail markets. Most of the supplies were sourced from from Bulacan and Pangasinan. Higher demand for larger bangus was observed in some of the monitored retail markets (Galas, Muñoz Trabajo and Tandang Sora markets)
- For tilapia, most of the supplies noted were sourced mainly from Batangas. According to fish vendors, they opt to get supplies from Batangas as wholesale price of tilapia sourced from Pampanga is higher than tilapia from Batangas. Also, consumers prefer tilapia sourced from Batangas than Pampanga. As reported by region 3, the increase in the cost of feed mill resulted to fish farmers of tilapia from Pampanga opting to stop or reduce their operations until their profit margins are acceptable for them. There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas, Pampanga
  - Local Galunggong - Navotas & Malabon Fish Ports
  - Alumahan - Navotas & Malabon Fish Port
- According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday, Sunday) where there are more people noted in the retail markets.

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Scylla serrata* or Alimango - female - (Php650 & 950/kg) - lowest prevailing price of Php650.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php950.00/kg was noted at Farmers Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
- Decapterus russelli* or Galunggong (babae) - (Php100.00 & 280.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Pasig Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php280.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from Lucena, Quezon.
- Glossogobius giuris* or Bias - (Php200.00 & 420.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php420.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
- Leiopotherapon plumbeus* or Ayungin - (Php600-800/kg) - both the lowest and highest prevailing retail price were recorded in Marikina Market. The difference in the price were due to the quality of the commodity, wherein the supply of lowest prevailing price of 600.00/kg was stocks from previous market days and the highest prevailing price of Php800.00/kg was good in quality.
- Mullus surmuletus* or salmonete (Php240 & 440/kg) - lowest prevailing price of Php240.00/kg were recorded at Pasig Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php440.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
- Pseudorhombus sp.* or Dapa - (Php200.00/kg & 360.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php360.00/kg was noted at Mandaluyong Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.

(-) - Price and Volume not available during price monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring
