		Male	130	130	130	130	130	-	China
		Female	-	-	-	-	-	-	NA

Remarks/Market Observations:

The following observations were gathered from market personnel:

- Minimal but adequate availability of fresh marine commodities (i.e., loro, salay-batang, pusit bisaya, saramulyete, sapsap, gulyasan, pompano black, dorado, etc.) were recorded at Navotas Fish Port 3, 4, & 5 this week. This may be attributed to the Low-Pressure Area (LPA) in the east of Eastern Visayas resulting to hampered fishing operations from fisherfolk.
- There is still an abundant volume of supplies for local-fresh galunggong unloaded at the Navotas Fish Port (wholesale) this week. This resulted to a low wholesale price at Php100, 113, 140/kg this week. Other local galunggong variants like "Balsa" (*Decapterus macarellus*), "Burot" (*Decapterus kurroides*) and "Babae" (*Decapterus russelli*) were also noted.
- For imported-frozen galunggong, low demand were still noted for imported-frozen galunggong due to abundant supply of local-fresh galunggong at the fish port. According to vendors, buyers prefer local galunggong than imported galunggong. The prevailing wholesale price of the commodity was at Php130.00/kg imported from China.
- The prevailing wholesale prices of aquaculture commodities like bangus and tilapia remained stable and sufficient supplies at the Navotas Fish Port. Same Supplies were still sourced mainly from Bulacan and Batangas, respectively.
- Top fishery commodities in the monitored markets are sourced mainly from the following areas:
 - Bangus - Bulacan
 - Tilapia - Batangas
 - Local galunggong- Zambales, Northern Palawan
 - Alumahan- NA
 - Imported galunggong - China
- Market administrators continue to strictly implement precautionary safety measures in the monitored markets to ensure the consumers and vendors safety and avoid the further spread of highly infectious COVID-19 OMICRON variant in accordance with the General Community Quarantine- Alert Level 1 guidelines. Among these measures are the mandatory wearing of face masks, social distancing and regular schedule of cleaning and disinfection in the markets, and among others.

Note: Wholesale price data is as of June 25, 2023, as price data from PFDA was not provided within the internal cut off of the covering period of this report.

(-) - Price and Volume not available during price monitoring

(**) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

NA- Source Area not available during price monitoring
