REMARKS AND MARKET OBSERVATIONS																						
CAR																						
WEEK 1-JUNE 5-9, 2023																						
Supplies of fishes sold in the monitored markets were purchased from the dealers of Baguio City.																						
Price of fresh marine commodities varies every week due to the quality (i.e., freshness, size, and source area)																						
Nonetheless, supplies of "hito" were harvested from the backyard fish pond. Meanwhile, tilapia were reportedly derived from Ambukalo Dam and Magat Dam.																						
WEEK 2-JUNE 12-16, 2023																						
Supplies of fishery commodities were stable among the monitored markets.																						
Supplies of marine commodities in the market were bought from the traders/ middle man.																						
Price may be influenced by the varying quality (in terms of freshness and sizes) and source area.																						
WEEK 3-JUNE 19-23, 2023																						
Supplies of marine fishery commodities were obtained from nearby regions.																						
Price of bangus especially supplies obtained from region 1 were affected due to the celebration of "bangus festival" in said region wherein the demand were observed to increased.																						
Most of the tilapia of Cordillera are from Ambukalo Dam and Magat Dam.																						
WEEK 4-JUNE 26-30, 2023																						
Prices of some fishery commodities increased from ten to fifteen pesos due to the quality of fish (i.e., freshness), size and source of the origin.																						
The wide variation of the prices are because some of the fishery species being sold are left over.																						
Aquaculture commodities such as tilapia and hito harvested from backyard fishpond.																						
In addition, most production of tilapia of Cordillera are from Ambukalo and Magat Dam.																						
R1																						
WEEK 1-JUNE 5-9, 2023																						
Sufficient supplies of fishes were observed in the monitored markets this week.																						
In fact, total of two hundred thirty-nine (239) fish stalls were recorded during the conduct of price monitoring.																						
Most of the displayed fishes were bangus, tilapia, and galunggong.																						
Nonetheless, supplies of imported-frozen galunggong were still present at Php100.00/kg-Php180.00/kg. Difference in prices may be attributed to the varying sizes of supplies.																						
WEEK 2-JUNE 12-16, 2023																						
Supplies of fishery commodities remained adequate for the consuming public.																						
Majority of the displayed fishes were bangus, tilapia, and local galunggong.																						
Nonetheless, presence of imported-frozen galunggong was still recorded in Ilocos Norte, La Union and Pangasinan at Php70.00/kg-Php210.00/kg this week. Difference in price might be due to the varying sizes.																						
WEEK 3-JUNE 19-23, 2023																						
Majority of the aquaculture commodities available were bangus and tilapia.																						
Nonetheless, marine fishes such as local-fresh galunggong was also present.																						
Frozen galunggong was still available at La Union and Pangasinan with recorded price ranging from Php70.00/kg (small) -Php220.00/kg (large).																						
WEEK 4-JUNE 26-30, 2023																						
Supply is sufficient in the markets.																						
Frozen Galunggong were also observed in the wet markets of Ilocos Norte, La Union and Pangasinan with price range of Php 100.00-210.00 (small-large).																						
R2																						
WEEK 1-JUNE 5-9, 2023																						
More supplies of marine fishery commodities were observed this week.																						
The increase in supplies resulted to the decreased in the price of some fishery commodities.																						
No supply of imported commodity such as pompano and galunggong were noted.																						
WEEK 2-JUNE 12-16, 2023																						
Steady volume of supplies were observed in the monitored markets.																						
WEEK 3-JUNE 19-23, 2023																						
Supplies of fishes were steady among the monitored markets this week.																						
WEEK 4-JUNE 26-30, 2023																						
Prices of mackerel and shrimp decrease due to abundant supply in the market.																						
Price of mlkfish decreased due to lower price from the suppliers.																						
R4A																						
WEEK 1-JUNE 5-9, 2023																						
Ample volume of supplies were noted in the monitored markets this week.																						
Price fluctuation may be influenced by the number of factors such as commodity size, source area, and other natural phenomena like Typhoon.																						
WEEK 2-JUNE 12-16, 2023																						
Availability of fresh marine commodities remained adequate in all monitored markets this week.																						
Flctuation in the prices of fishery commodities is influenced by a number of factors such as the commodity's size, the volume of supply, source area and other natural phenomena like bad weather condition.																						
WEEK 3-JUNE 19-23, 2023																						
Availability of fresh marine commodities remained adequate in all monitored markets this week.																						
Flctuation in the prices may be influenced by a number of factors such as the commodity's size, the volume of supply, source area and other natural phenomena like bad weather condition.																						
WEEK 4-JUNE 26-30, 2023																						
Availability of fresh marine commodities remained adequate in all monitored markets this week.																						
Flctuation in the prices of fisher commodities is influenced by a number of factors such as the commodity's size, the volume of supply, source area and other natural phenomena like bad weather condition (Habagat).																						
R4B																						
WEEK 1-JUNE 5-9, 2023																						
Prices of fresh marine commodities monitored in all markets this week were high due to transportation expenses.																						
WEEK 2-JUNE 12-16, 2023																						
High price of fishery commodities were noted this week.																						
This might be caused by the logistic cost that add up in the price of commodities.																						
WEEK 3-JUNE 19-23, 2023																						
As observed this week, prices were higher which may be affected by the transportation cost wherein it add up to the price of commodity.																						
WEEK 4-JUNE 26-30, 2023																						
Price is high due to transportation expenses.

<b>R5</b> <b>WEEK 1-JUNE 5-9, 2023</b> Minimal supplies of marine fishery commodities were observed in the monitored retail markets this week. Nonetheless, supplies of aquaculture commodities (remained abundant for the consumers/ buyers. <b>WEEK 2-JUNE 12-16, 2023</b> Due to the inclement weather condition, minimal supply of marine fishery commodities were observed this week. Nonetheless, supplies of aquaculture commodities such as bangus and tilapia remained abundant. <b>WEEK 3-JUNE 19-23, 2023</b> Abundant supply of fishes were observed at the monitored markets. Also, supplies of bangus and tilapia were ample for the consumers/ buyers. <b>WEEK 4-JUNE 26-30, 2023</b> Some of the marine fisheries commodities are not available due to heavy rains in the province of Sorsogon. Nonetheless, abundant supply of bangus and tilapia. Present of other fishery commodities. High prices of marine fishes due to bad weather condition in Camarines Norte.																						
<b>R6</b> <b>WEEK 1-JUNE 5-9, 2023</b> Minimal supplies of marine fishery commodities were observed in some of the monitored markets. This may be due to the inclement weather condition brought about by the occurrence of Typhoon Chedeng. Meanwhile, for aquaculture commodities like bangus and tilapia, supplies continued to be sufficient to cater the demand of the buying public. Price difference might be influenced by the varying sizes and freshness of the commodity. <b>WEEK 2-JUNE 12-16, 2023</b> Ample and stable supplies of fishery commodities were observed in the monitored markets. Commodities recorded were skipjack tuna, yellowfin tuna, bullet tuna, round scad, and others. Low influx of buyer was observed in some monitored markets particularlyin Aklan. <b>WEEK 3-JUNE 19-23, 2023</b> Sufficient supply of fishery commodities were recorded among the monitored retail markets. Price may vary due to the varying quality (in terms of freshness and sizes) and volume of supplies. <b>WEEK 4-JUNE 26-30, 2023</b> For several weeks, milkfish supply is consistent as well as its price range. In addition, milkfish also is one of the top species observed to have high volume in the market,together with Skipjack Tuna, Yellowfin Tuna, bullet tuna and round scad. There were lot of buyers /consumers observed during the monitoring. (AKLAN) Price of milfish remained stable during the price monitoring this fourth week of June. Moreover, there was minimal changes in prices of fish and fishery commodities. (ANTIQUE) Sufficient supply of fish in the market; Stable prices of fish and fishery commodities this fourth week of June. (CAPIZ) Only the price of bisugo increased from 290.00/ kl. to 330/ kl. while the price of lapu-lapu decreased from 400.00/ kl. to 360.00/ kl and lukos from 325.00/ kl. to 305.00/ kl. (ILOILO) No price increase observed such as Bangus, Tilapia and Shrimps. This is compared to last week's Price Monitoring. (NEGROS OCC.)																						
<b>R7</b> <b>WEEK 1-JUNE 5-9, 2023</b> Due to the Southwest Monsoon (Habagat), minimal supplies of marine fishery commodities were observed in the monitored markets. <b>WEEK 2-JUNE 12-16, 2023</b> Sufficient supplies of fishery commodities were observed in the monitored markets this week. <b>WEEK 3-JUNE 19-23, 2023</b> Sufficient and affordable supplies of fishes were observed. <b>WEEK 4-JUNE 26-30, 2023</b> Sufficient supply of fishery commodities and affordable prices were observed in all provinces during the price moniotring.																						
<b>R8</b> <b>WEEK 1-JUNE 5-9, 2023</b> Sufficient supply of fishery commodities were noted during the conduct of price monitoring. Prices may vary depends on the commodity's size, source area, and quantity of supplies in the markets. <b>WEEK 2-JUNE 12-16, 2023</b> During the conduct of price monitoring, sufficient supplies of fishery commodities were noted. Prices may still vary depending on the size, freshness, source areas, and quantity of unloaded fish in the market. <b>WEEK 3-JUNE 19-23, 2023</b> Sufficient supply of fishes was observed in the monitored markets. Price difference may be attributed to the varying sizes, freshness, source areas, and volume of supplies. Also, weather conditon could affect the supplies wherein it hampers the fishing operations of the fishermen. <b>WEEK 4-JUNE 26-30, 2023</b> Sufficient supply of fish in the market is noted during monitoring. The price variations of the different fish species available in all markets monitored depends on the size of the fish, origin and the availability of quantity. Weather conditon also affects the price of fish.																						
<b>R9</b> <b>WEEK 1-JUNE 5-9, 2023</b> Due to the bad weather condition and presence of the bright moon, lesser volume of supplies were observed among the monitored markets. Price difference could still be due to the varying quality (in terms of sizes and freshness). <b>WEEK 2-JUNE 12-16, 2023</b> Still, minimal volume of supplies were still traded in the monitored markets this week. Nonetheless, price difference may be influence by the quality (in terms of size and freshness). <b>WEEK 3-JUNE 19-23, 2023</b> Sufficient supplies of marine fishery commodities were observed in the monitored markets. This may be due to the fair-weather condition. Another factor for the price difference is the quality (in terms of sizes and freshness). Generally, leftover supplies were cheaper as compared to new unloaded supplies. <b>WEEK 4-JUNE 26-30, 2023</b> High volume of fish catch/traded in the market resulting to low to moderate of fish due to goo weather condition in the fishing ground. Prices of fish retailed depends on its quality and size. People who are fully vaccinated with facemask can go to public places and in market.

However, some of the prices of fishes in the region were affected by the transportation cost which add up to the price.</div><div>WEEK 2-JUNE 12-16, 2023</div><div>Supplies of fishery commodities were stable in the monitored markets this week. Nonetheless, due to inclement weather condition supplies of marine commodities were lesser as compared to the previous supplies.</div><div>WEEK 3-JUNE 19-23, 2023</div><div>Supplies of fishery commodities remained sufficient and available in the monitored markets. However, some supplies observed were remaining stocks which resulted to low price of the commodity.</div><div>WEEK 4-JUNE 26-30, 2023</div><div>General Santos City - Low price due to lack of buyers and the supply remain stable. Koronadal City - Fishery products' prices and supplies are still constant. Tacurong City - Some of fish commodities price slightly increased due to unfavorable weather condition. However, the supply of fish are sufficient. Glan - The price and supply of fishery commodities are remain stable. Kidapawan City - Fish prices and stock are stable except for hito and dalag due to fewer of supply. General Santos Fish Port Complex - Adequate supply of fishery commodities, prices are similarly low due to a lack of demand.</div></div></div> <div><div>R13</div><div><div>WEEK 1-JUNE 5-9, 2023</div><div>Limited supplies were noted in the monitored markets. This may be due to the constant strong winds and currents which hampers the fishing operations of the fishermen.</div><div>WEEK 2-JUNE 12-16, 2023</div><div>More supplies of fishery commodities were observed in some of the monitored markets this week. However, low influx of buyers were still noted in the markets.</div><div>WEEK 3-JUNE 19-23, 2023</div><div>Supplies remained limited in the markets due to the strong waves hampering fishing operations. Low demand was still noted in the monitored markets this week.</div><div>WEEK 4-JUNE 26-30, 2023</div><div>The demand of supply of fishery commodities in some provinces in wet markets significantly declined. On the other hand, prices still increased due to bad weather conditions.</div></div></div>																						
<div><div>NCR</div><div><div>The following observations were gathered from market vendors and administrators for the month of June:</div><div><div>1. Generally, adequate availability of fresh marine commodities were recorded among the monitored retail market this month. On the other hand, lesser supply was noted on the first and fourth week of the month which might be attributed due to the following:<div><div>a.) The occurrence of full moon on June 4, 2023 which affect the catch of fishermen wherein fishes tend to scatter due to the light from full moon that shines on the sea surface making them hard to catch.</div><div>b.) Inclement weather condition brought about by typhoon "Betty" noted on the first week and low pressure area on the fourth week of the month resulting to hampered fishing operations.</div></div></div><div>2. Nonetheless, the supplies of local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>) remained ample in all monitored retail markets this month. There are also other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) recorded in some of the monitored retail markets this week.</div><div>3. Due to the ample supply of local-fresh galunggong this month, minimal display of imported frozen galunggong was observed. Other imported-frozen commodities like pampano, salmon mackarel, pusit kalawang, and tulingan were still present in the markets.</div><div>4. For alumahan, large-sized continued to be evident in most of the monitored wet markets this month. Also, available supply of other variant (i.e., Hasa-hasa) was present chiefly sourced from Malabon Fish Port.</div><div>5. Adequate availability of bangus and tilapia were still observed in the monitored retail markets throughout the month. Nonetheless, supply of medium-sized bangus remain limited as majority are still large size sourced from Bulacan and Dagupan.</div><div>6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:<div><div>a. Bangus - Bulacan</div><div>b. Tilapia - Batangas</div><div>c. Local Galunggong - Navotas Fish Ports</div><div>d. Imported Galunggong - Navotas Fish Port</div><div>e. Alumahan - Malabon Fish Port</div></div></div><div>7. Low influx of buyers were still observed among the monitored markets this month. As a result, fish vendors are coping by selling lower volume of supplies and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some fish vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.</div></div></div></div>

	Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low	
General Observation																							
Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.																							
1. <i>Scylla serrata</i> or Alimango (Male) (Php 500.00 & 700.00 /kg) - supplies with the lowest prevailing price of Php 500.00 /kg were recorded in Region 6, Region 9 and Region 10 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 700.00/kg were recorded in Region 3, CARAGA and NCR wherein the available supply were larger in size.																							
2. <i>Acanthurus</i> sp. or Labahita (Php 120.00-400.00 /kg) - supplies with the lowest prevailing price of Php 120.00 /kg were recorded in Region 9 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 400.00/kg were recorded in Region 3 wherein the available supply were larger in size.																							
3. <i>Alepes djedaba</i> or Salay batang (Php 150.00-340.00 /kg) - supplies with the lowest prevailing price of Php 150.00 /kg were recorded in Region 3 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 340.00/kg were recorded in Region 4A wherein the available supply were larger in size.																							
4. <i>Amblygaster sirm</i> or Turay (Php 100.00 & 240.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in NCR wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 240.00/kg were recorded in Region 11 wherein the available supply were larger in size.																							
5. <i>Amodontia edentula</i> or Imbao (Php 60.00-265.00 /kg) -both the lowest and highest prevailing prices of Php 60.00/kg and Php 265.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
6. <i>Carangoides fulvoguttatus</i> or Talakitok (Php 250.00-400.00/kg) - supplies with the lowest prevailing price of Php 250.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to Region 11.																							
7. <i>Caranx</i> sp. or Talakitok (Php 250.00-480.00/kg) - supplies with the lowest prevailing price of Php 250.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																							
8. <i>Caranx melampygus</i> or Talakitok (Php 180.00 & 350.00 /kg) - supplies with the lowest prevailing price of Php 180.00 /kg were recorded in Region 11 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 350.00/kg were recorded in Region 7 wherein the available supply were larger in size.																							
9. <i>Eleutheronema tetradactylum</i> or Bikaw (Php 140.00-280.00 /kg) -supplies with the lowest prevailing price of Php 140.00/kg were recorded in Region 12 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																							
10. <i>Elops hawaiiensis</i> or Bid-bid (Php 90.00 & 240.00 /kg) -both the lowest and highest prevailing prices of Php 90.00/kg and Php 240.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
11. <i>Gerrus</i> sp. or Latab (Php 150.00-300.00 /kg) -supplies with the lowest prevailing price of Php 150.00/kg were recorded in Region 9 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 300.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																							
12. <i>Gerrus oyena</i> or Latab (Php 160.00-280.00 /kg) -supplies with the lowest prevailing price of Php 160.00/kg were recorded in Region 8 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 280.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																							
13. <i>Gnathanodon speciosus</i> or Mamsa (Php 100.00-420.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in Region 11 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 420.00/kg were recorded in Region 7 wherein the available supply were larger in size.																							
14. <i>Hemiramphus</i> sp. or Salurasid (Php 130.00 & 480.00 /kg) - supplies with the lowest prevailing price of Php 130.00 /kg were recorded in Region 8 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 480.00/kg were recorded in Region 11 wherein the available supply were larger in size.																							
15. <i>Johnius amblycephalus</i> or Abu (Php 140.00-260.00 /kg)- both the lowest and highest prevailing prices of Php 140.00 /kg and Php 260.00 /kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
16. <i>Leiognathus splendens</i> or Sapsap (Php 100.00-380.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in Region 5 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 380.00 /kg were recorded in Region 6 wherein the available supply were larger in size.																							
17. <i>Macrobrachium rosenbergii</i> or Ulang (Php 160.00 & 400.00 /kg) - both the lowest and highest prevailing prices of Php 160.00/kg and Php 400.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
18. <i>Metapenaeus ensis</i> or Suwahe (Php 360.00-500.00 /kg) - both the lowest and highest prevailing prices of Php 360.00/kg and Php 500.00/kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
19. <i>Mullus surmuletus</i> or Salmonete (Php 240.00 & 440.00 /kg) - both the lowest and highest prevailing prices of Php 240.00/kg and Php 440.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
20. <i>Nemipterus bathybius</i> or Bisugo (Php 250.00-380.00 /kg) - supplies with the lowest prevailing price of Php 250.00/kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																							
21. <i>Nemipterus hexodon</i> or Saguisun (Php 200.00 & 340.00 /kg) -both the lowest and highest prevailing prices of Php 200.00/kg and Php 340.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
22. <i>Parupeneus</i> sp. or Saramulyete (Php 60.00-330.00 /kg) -both the lowest and highest prevailing prices of Php 60.00/kg and Php 330.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
23. <i>Priacanthus hamrur</i> or Bukawon (Php 120.00-320.00 /kg) -supplies with the lowest prevailing price of Php 120.00/kg were recorded in Region 5 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 320.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																							
24. <i>Priacanthus tayenus</i> or Siga (Php 300.00-450.00 /kg) -supplies with the lowest prevailing price of Php 300.00/kg were recorded in Region 4A wherein the said commodity was smaller in size, hence, price is lower compared to Region 8.																							
25. <i>Ranina ranina</i> or Curacha (Php 500.00 & 600.00 /kg) -both the lowest and highest prevailing prices of Php 500.00/kg and Php 600.00/kg, respectively, were recorded in Region 9. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
26. <i>Selar</i> sp. or Matambaka (Php 180.00-360.00 /kg) -both the lowest and highest prevailing prices of Php 180.00/kg and Php 360.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
27. <i>Siganus spinus</i> or Dangit (Php 200.00 & 350.00 /kg) -both the lowest and highest prevailing prices of Php 200.00/kg and Php 350.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
28. <i>Sphyrnaea obtusata</i> or Torsilyo (Php 160.00-340.00 /kg) - supplies with the lowest prevailing price of Php 160.00/kg were recorded in Region 11 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																							
29. <i>Sphyrnaea</i> sp. or Rumpi (Php 100.00-380.00 /kg) - supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to Region 8.																							
30. <i>Tegillarca granosa</i> or Litob (Php 100.00-280.00 /kg) -both the lowest and highest prevailing prices of Php 100.00/kg and Php 280.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																							
31. <i>Trachinotus</i> sp. or Pompano (White) (Php 300.00-440.00 /kg) - supplies with the lowest prevailing price of Php 300.00/kg were recorded in Region 6 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.
