Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Generally, limited display of fresh marine commodities were observed among the monitored retail markets this week. Relatively, majority of the fish stalls in Commonwealth market who sells marine fishes were noted closed on 28 July 2023 (Friday). This could be due to the hampered fishing operations brought about by the effect of Super Typhoon "Egay". Consequently, minimal availability of medium-sized local fresh galunggong lakasi was also recorded sourced from Farmers market (wholesale), Lucena (Quezon), Malabon, and Navotas Fish Port. As a result, display of medium-sized imported-frozen galunggong lakasi (<i>Decapterus macrosoma</i>) was recorded this week. Also, most of the supplies of imported galunggong was observed to have quality issues such as pale color, torn tail, and wrinkle skin in the monitored markets. Similarly, limited supply of alumahan (<i>Rastrelliger kangurta</i>) was observed among the monitored retail markets this week. However, supply of other variant (i.e., hasa-hasa) was still present. On the other hand, higher retail price of tilapia from Batangas was recorded this week. As a result, some vendors shifted on selling tilapia from Pampanga due to its lower wholesale price as compared to tilapia Batangas which supply might be affected by the fish kill in Taal Lake on 13 July. Meanwhile, there continues to have limited availability of medium-sized bangus was recorded among the monitored retail markets this week, wherein majority of the supplies were large-sized sourced from Bulacan and Pangasinan. Major source areas of the top fishery commodities in the monitored markets are as follows: <ul style="list-style-type: none"> Retail <ul style="list-style-type: none"> b.1. Bangus - Bulacan b.2. Tilapia - Batangas b.3. Local Galunggong - Malabon Fish Port b.4. Imported Galunggong - Navotas Fish Port b.5. Alumahan -Lucena (Quezon) Alongside, low demand among the monitored retail markets was still reported by the vendors this week. As a result, some displayed fishery commodities were noted low quality in terms of freshness as it is leftover from the previous market days. In connection to this, vendors offer the commodity in a bargain price to gain back their capital. 																								
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Glossogobius celebius</i> or Biya -medium (Php200.00 -500.00/kg)- lowest prevailing price of Php. 200.00/kg was recorded in Polo Public Market wherein supplies observed are low in quality (in terms of freshness) and noted be smaller size of the commodity, hence offer cheaper as compared to the supply recorded in Pasig Market which are reported to have better quality in terms of freshness and has larger size sourced from Lucena. <i>Lethrinus miniatus</i> or Bitilya- (Php260.00-430.00/kg)- Similarly, lowest prevailing price of Php260.00 noted in Marikina Public market was observed smaller in size as compared to the supplies recorded in Malabon Central market, hence the variation in price. <i>Mullus surmuletus</i> or Salmonete (Php200.00-440.00/kg)- Meanwhile, lowest prevailing price of Php200.00/kg was observed in Malabon central market wherein supply are noted to have low quality in terms of freshness hence offer in a cheaper price. Meanwhile, highest recorded price of Php440.00/kg noted in Marikina market was observed to have better quality in terms of freshness sourced from Lucena. 																								
	<p>(-) - Price Not Available During Price Monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p>
