(-) - Price and Volume not available during price monitoring  
(\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

**REMARKS AND MARKET OBSERVATIONS**  
**CAR**  
**WEEK 1-JULY 3-7, 2023 - WEEK 4- JULY 24-28, 2023**  
Supplies of marine fishes in the markets were sourced from nearby regions.  
Price may influenced by the quality (in terms of sizes and freshness) and layer of brokers before it reaches the market.  
For tilapia and hito, supplies were harvested from the backyard fishpond.  
Nonetheless, most of the supplies of tilapia were obtained from Ambukalo and Magat Dam.  
For bangus, supplies from Pangasinan commands good price as compared from the supplies from Bulacan.  
During the 4th week of the month, no price monitoring activity was conducted in the province of Benguet and Abra due to the Typhoon Egay.

**R1**  
**WEEK 1-JULY 3-7, 2023**  
Supply is sufficient in the markets.  
Frozen galunggong were also observed in the wet markets of Ilocos Norte, La Union and Pangasinan with price range of Php 80.00-210.00 (small-large).  
Buyers preferred galunggong from Pasuquin rather than from Dagupan due to its affordable price.

**WEEK 2- JULY 10-14, 2023**  
Inadequate supply of marine fishery commodities were noted in the monitored markets this week. This could be due to the inclement weather condition in the country.  
Relative to this, no supply of local galunggong was observed in Vigan City market.

**WEEK 3- JULY 17-21, 2023**  
Supplies of fishery commodities continued to be available in the monitored markets.  
In fact, fifty-seven (57) fish vendors were observed with supplies of bangus and nineteen (19) fish vendors with tilapia.  
For local-fresh galunggong, twenty (20) fish vendors were reported with supplies.  
Nonetheless, supplies of frozen galunggong were recorded at Php100.00/kg-Php210.00/kg. Difference in prices may be attributed to the varying sizes of supplies.

**WEEK 4- JULY 24-28, 2023**  
There were 160 stalls present in the wet markets during the monitoring, wherein 67 stalls sold bangus; 30 stalls sold tilapia, 20 stalls sold galunggong and 47 for other fresh marine commodities.  
Frozen galunggong were observed in all provinces with price range of Php 100.00/kg to Php 160.00/kg (small to large-sized).  
Inadequate supply of fishery commodities were noted in all provinces due to the Typhoon Egay.

**R2**  
**WEEK 1-JULY 3-7, 2023**  
Prices of mackerel and shrimp decrease due to abundant supply in the market.  
Price of mlkfish decreased due to lower price from the suppliers.

**WEEK 2- JULY 10-14, 2023**  
Supplies of fishery commodities were steady among the monitored markets this week.

**WEEK 3- JULY 17-21, 2023**  
Don Domingo Public Market: Only large sizes of tilapia (2-3 pcs per kilo) were available in the market. Fresh galunggong were available in smaller sizes. Prices of shrimp decreased due to lower demand and higher supply in the market.  
Solano Public Market: Stable price and supply of fish in the market.

**WEEK 4- JULY 24-28, 2023**  
Insufficient supply of fresh marine commodities were noted in all the monitored markets during the conduct of price monitoring due to the Typhoon Egay.

**R4A**  
**WEEK 1-JULY 3-7, 2023 - WEEK 2- JULY 10-14, 2023**  
Availability of fresh marine commodities remained adequate in all monitored markets this week.  
Fluctuation in the prices of fisher commodities is influenced by a number of factors such as the commodity's size, the volume of supply, source area and other natural phenomena like bad weather condition (Habagat).

**WEEK 3- JULY 17-21, 2023**  
Availability of fresh marine commodities remained adequate in all monitored markets this week.  
Fluctuation in the prices of fishery commodities may be influenced by a number of factors such as the commodity's size, volume of supply, source area and other natural phenomena like bad weather condition (Tropical Depression Egay).

TOP FISHERY COMMODITIES																NATIONAL						
	Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low
<b>WEEK 4- JULY 24-28, 2023</b> Ample supply of fresh marine commodities were observed in all monitored markets this week. Fluctuation in the prices of fishery commodities were influenced by a number of factors such as size, volume of supply, source area and the bad weather condition (Typhoons Egay & Falcon). <b>R4B</b> <b>WEEK 1-JULY 3-7, 2023 - WEEK 4- JULY 24-28, 2023</b> High price of fishes may be attributed to the increased in the transportation expenses which add to the price mark-up. <b>R5</b> <b>WEEK 1-JULY 3-7, 2023</b> Some of the fishery commodities were not available due to heavy rains in the province of Sorsogon. Nonetheless, abundant supply of bangus, tilapia and shrimps. Present of other fishery commodites were also recorded. High prices for marine fishes were recoded which might be due to bad weather condition hampering fishing operation. <b>WEEK 2- JULY 10-14, 2023</b> Minimal but sufficient supplies of marine fishery commodities were observed among the monitored markets this week. This may be due to the bad weather condition. Commodities recorded were green missels, indian mackerel, round scad, pickhandle barracuda, rainbow runner, and others. <b>WEEK 3- JULY 17-21, 2023</b> Due to the constant bad weather condition, few varities of marine fishery commodities were observed. Consequently, for aquaculture commodities (i.e., bangus, tilapia, and shrimp) minimal decrement in the supply was noted this week. Minimal increment was noted in the price of some fishes. Among the commodities recorded were pangasius/creamdory, bighead carp, oxeye scad, blue and gold Fusilier, red-tail scad, Indian mackerel, large head hair-tail, round-scad, banana shrimp, tigertooth croaker, vermiculated spinefoot, common ponyfish, christian crab, mantis shrimp, Oriental sillago, flat needlefish, false trevally and others. <b>WEEK 4- JULY 24-28, 2023</b> Insufficient supply of aquaculture commodities (i.e., bangus, tilapia and green mussel) and other fresh marine commodities due to heavy rains in the province of Sorsogon. As a result, prices of the said commodities has significantly increased. Nonetheless, sufficient supply of frozen fishery commodities (i.e., squid, round scad, island mackerel) were noted in all monitored markets. <b>R6</b> <b>WEEK 1-JULY 3-7, 2023</b> For several weeks, milkfish supply is consistent as well as its price range. In addition, milkfish also is one of the top species observed to have high volume in the market together with skipjack tuna, yellowfin tuna, bullet tuna and round scad. There were lot of buyers /consumers observed during the monitoring. (AKLAN). Sufficient supply of fish in the market; Stable prices of fish and fishery commodities. (CAPIZ) Price of fishery commodities remained stable this week; Price of bisugo decreased from Php235.00/kg to Php210/kg (ILOILO) Price of fishery commodities may vary due to the quality of fish (i.e., freshness, appearance) and the size. (GUIMARAS) <b>WEEK 2- JULY 10-14, 2023</b> Supplies of aquaculture commodities like bangus and tilapia were steady and sufficient for the consuming public. Price discrepancy could be affected by the varying sizes and freshness. <b>WEEK 3- JULY 17-21, 2023</b> During the conduct of the monitoring it was observed that milkfish, fusilier, whiteleg shrimp, roundscad, yellowstripe scad has the huge volume of fish supply in the market. Milkfish still has a consistent price ranging from Php160.00/kg - Php220.00 from small to large size. Tilapia supply mostly come from Manila (Byahe) according to the fish seller/vendor. Most of the supply of white leg shrimp comes from Bacolod, Negros Occidental. Pelagic species such as roundscad, yellowstripe scad, sardines mostly comes from other provinces such as Antique, Capiz and Iloilo, while most of the demersal fish such as spinefoot, snapper, grouper comes from Aklan. (AKLAN) Price retains in milkfish; Minimal Changes in price of fisheries commodities monitored. (ANTIQUE) During the conduct of price monitoring for the 3rd week of July 2023, low supply of fishery commodities was observed. This resulted to an increase in prices; Local fishermen has few landed catch due to the typhoon Dodong. (GUIMARAS) The unstable weather condition made an impact on the suppl of fishery commodities and a very minimal increase in the prices. (ILOILO) No price increase of tilapia and bangus. Presence of high value of vanamei was observed. Nonetheless, low supply of fish in the market due to bad weather condition and conflict of fish stall arrangement this week as compared to last week's price monitoring. (NEGROS OCCIDENTAL) <b>WEEK 4- JULY 24-28, 2023</b> Milkfish supply is still consistent as well as its price. Sufficient supply of pelagic species like the bullet tuna, skipjack tuna, slipmouth and round scad. Further, high value species (i.e., grouper and snapper) were sourced from New Washington, Aklan. (AKLAN) Sufficient supply of fishery commodities and prices remained stable. (CAPIZ) Price of fishery commodities mainly depends on the following factors (i.e., freshness, appearance & size). (GUIMARAS) Price of fishery commodities remained the same from last week's observation. Only the price of large bangus decreased from Php 235.00/ kg to Php 210.00/ kg. (ILOILO) Bangus price decreased from Php 200.00/ kg to Php 220.00/ kg while Shrimp from Php 300.00/ kg to Php 350.00/ kg. Presence of high-value fish species were noted like the lapu-lapu, tuna, and squid and prices stay the same. (NEGROS OCC.) <b>R7</b> <b>WEEK 1-JULY 3-7, 2023</b> Insufficient supply of fishery commodities and prices increased were observed in all provinces during the price moniotring due to the Southwest Monsoon. <b>WEEK 2- JULY 10-14, 2023</b> Due to the occurrence of Tropical Storm (Dodong), insufficient supply of marine fishery commodities were observed among the monitored markets this week. <b>WEEK 3- JULY 17-21, 2023</b> Due to unfavorable weather condition, fishery commodities are insufficient and expensive. <b>WEEK 4- JULY 24-28, 2023</b> Insufficient and overpriced fishery commodities in all provinces due to unfavorable weather condition. <b>R8</b> <b>WEEK 1-JULY 3-7, 2023 - WEEK 4- JULY 24-28, 2023</b> Sufficient supply of fish in the market is noted during monitoring. The price variations of the different fish species available in all the monitored markets may be influenced by difference in the size of the fish, source area, and the availability of quantity. <b>R9</b> <b>WEEK 1-JULY 3-7, 2023</b> High volume of fish catch/traded in the market resulting to low to moderate of fish due to goo weather condition in the fishing ground. Prices of fish retailed depends on its quality and size. People who are fully vaccinated with facemask can go to public places and in market. <b>WEEK 2- JULY 10-14, 2023</b> Less volume of fish catch/traded in the market resulting to moderate to high price of fish due to bad weather condition (i.e., low pressure area, strong winds and strong current) in the fishing ground. Difference in prices might be due to the varying quality (in terms of sizes and freshness). <b>WEEK 3- JULY 17-21, 2023</b> Less volume of fish catch/traded in the market resulting to moderate to high price of fish due to Super Typhoon Egay, strong winds and strong current in the fishing ground. Prices of fish retailed depends on its quality and size.

NCR																													
<p><b>The following observations were gathered from market vendors and administrators for the month of July:</b></p> <p>1. In general, ample supplies of fresh marine commodities were noted among the monitored retail markets for the 1st to 2nd week of this month. However, according to fish vendors, volume of supplies decreased during the 3rd and 4th week of the month due to the continuous rainy weather condition brought by Super Typhoon "Egay" on July 20-27, 2023 and Typhoon "Falcon" on July 29 to August 1, 2023 which hampers the fishing operations of fishermen on affected areas.</p> <p>2. In spite of that, the prevailing retail price of local-fresh galunggong (<i>Decapterus macrosoma</i>) remained at Php200.00/kg for this month but increased in the price was noted during the 3rd and 4th week due to the effects of Typhoons "Egay" and "Falcon". According to vendors, supplies for the said commodities were noted to have available display throughout the whole month but were limited during the last two weeks. There are also other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) recorded in some of the monitored retail markets this month.</p> <p>3. Higher demand were observed for imported-frozen galunggong lalaki during the last two (2) weeks due to the minimal supply of local-fresh galunggong. More specifically, nine (9) retail markets have display on the 4th week compared during the 1st week wherein only one (1) retail market have an available supply. The prevailing retail price have an increasing trend from 3rd to 4th week.</p> <p>Nonetheless, the prevailing price is at Php150.00/kg this month. There were other imported-frozen commodities like pampano, salmon mackarel, salmon head &amp; belly, pusit kalawang, and tulingan still present in the markets.</p> <p>4. For alumahan, the prevailing retail price remained at Php300.00/kg this month. Most of the available supplies were large-sized and were sourced mainly from Lucena and Malabon Fish Port.</p> <p>5. The prevailing retail prices for both bangus and tilapia remained stable at Php160.00/kg and Php140.00/kg this month. According to retail vendors, despite the effects of rainy weather, supplies remained stable and sufficient to cater the demand of the buying public. Majority of bangus reported are still large size sourced from Bulacan and Dagupan. Nonetheless, there is still a Php20-30/kg price difference between live and fresh-chilled tilapia.</p> <p>6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:</p> <ul style="list-style-type: none"><li>a. Bangus - Bulacan</li><li>b. Tilapia - Batangas</li><li>c. Local Galunggong - Navotas Fish Ports, Lucena Quezon</li><li>d. Imported Galunggong - Navotas Fish Port</li><li>e. Alumahan - Malabon Fish Port</li></ul> <p>7. Low influx of buyers were still observed among the monitored markets this month. As a result, fish vendors are coping by selling lower volume of supplies and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Meanwhile, some fish vendors are opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the monitored markets.</p>																													
General Observation																													
<p>Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.</p> <p>1. <i>Kappaphycus alvarezii</i> or Tamalang (Php 50.00-160.00 /kg) - supplies with the lowest prevailing price of Php 50.00 /kg were recorded in Region 9 wherein the said commodity was sourced within the locality hence, price is lower compared to NCR.</p> <p>2. <i>Scylla serrata</i> or Alimango (Male) (Php 450.00 &amp; 700.00 /kg) - supplies with the lowest prevailing price of Php 450.00/kg were recorded in Region 5, Region 6 and Region 10 wherein the said commodity was smaller in size, hence, price is lower compared to Region 3, Region 12 and CARAGA Region.</p> <p>3. <i>Scomberomorus commerson</i> or Tangigue (Sliced) (Php 200.00-700.00 /kg) -supplies with the lowest prevailing price of Php 200.00 /kg were recorded in Region 6 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 700.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</p> <p>4. <i>Acanthurus olivaceus</i> or Uring (Php 180.00 &amp; 450.00 /kg) -supplies with the lowest prevailing price of Php 180.00 /kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower compared to Region 2.</p> <p>5. <i>Alepes djedaba</i> or Salay batang (Php 250.00 &amp; 400.00 /kg) -supplies with the lowest prevailing price of Php 250.00/kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.</p> <p>6. <i>Canthidermis maculata</i> or Pakol (Php 50.00-160.00 /kg) -supplies with the lowest prevailing price of Php 50.00 /kg were recorded in Region 1 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 160.00 /kg were recorded in Region 10 wherein the available supply were larger in size.</p> <p>7. <i>Carangoides fulvoguttatus</i> or Talakitok (Php 250.00 &amp; 400.00 /kg) - supplies with the lowest prevailing price of Php 250.00 /kg were recorded in Region 8 and Region 9 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 400.00 /kg were recorded in Region 8 and Region 11 wherein the available supply were larger in size.</p> <p>8. <i>Carangoides</i> spp. or Talakitok (Php 250.00 &amp; 450.00 /kg)- supplies with the lowest prevailing price of Php 250.00 /kg were recorded in Region 12 wherein the said commodity was smaller in size, hence, price is lower compared to Region 10.</p> <p>9. <i>Coryphaena</i> sp. or Durado (Php 130.00-250.00 /kg) - supplies with the lowest prevailing price of Php 130.00 /kg were recorded in Region 11 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 250.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</p> <p>10. <i>Decapterus tabl</i> or Tabilos (Php 120.00-240.00 /kg)- both the lowest and highest prevailing prices of Php 120.00/kg and Php 240.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>11. <i>Glossogobius giuris</i> or Bias (Php180.00-420.00 /kg) - supplies with the lowest prevailing price of Php 180.00 /kg were recorded in CARAGA wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 420.00/kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</p> <p>12. <i>Glossogobius celebius</i> or Biya (Php 200.00-500.00 /kg) - both the lowest and highest prevailing prices of Php 200.00/kg and Php 500.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>13. <i>Hemiramphus</i> sp. or Bugiw (Php 120.00-300 .00 /kg) - both the lowest and highest prevailing prices of Php 120.00 /kg and Php 300.00 /kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>14. <i>Hypoaetherina temminckii</i> or Dilis (Php 100.00 &amp; 300.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in Region 5 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 300.00 /kg were recorded in Region 11 wherein the available supply were larger in size.</p> <p>15. <i>Leiognathus splendens</i> or Sapsap (Php 120.00-300.00 /kg) - supplies with the lowest prevailing price of Php 120.00 /kg were recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower compared to Region 6.</p> <p>16. <i>Leiopotherapon plumbeus</i> or Ayungin (Php 600.00 &amp; 800.00 /kg) -both the lowest and highest prevailing prices of Php 600.00/kg and Php 800.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>17. <i>Lethrinus miniatus</i> or Katambak (Php 260.00-430.00 /kg) -both the lowest and highest prevailing prices of Php 260.00 /kg and Php 430.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>18. <i>Lethrinus ornatus</i> or Kanuping (Php 260.00 &amp; 350.00 /kg) -supplies with the lowest prevailing price of Php 260.00 /kg were recorded in Region 4A and NCR wherein the said commodity was smaller in size, hence, price is lower compared to Region 9 and Region 12.</p> <p>19. <i>Metapenaeus ensis</i> or Suwahe (Php 400.00 &amp; 500.00 /kg) - supplies with the lowest prevailing price of Php 400.00 /kg were recorded in NCR wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 450.00 /kg were recorded in Region 4A wherein the available supply were larger in size.</p> <p>20. <i>Mullus surmuletus</i> or Salmonete (Php 300.00 &amp; 440.00 /kg) -both the lowest and highest prevailing prices of Php 300.00 /kg and Php 440.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>21. <i>Nemipterus furcosus</i> or Bisugo (Php 220.00-400.00 /kg) -supplies with the lowest prevailing price of Php 220.00 /kg were recorded in Region 5 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.</p> <p>22. <i>Nemipterus hexodon</i> or Olisi (Php140.00-380.00 /kg) -both the lowest and highest prevailing prices of Php 140.00 /kg and Php 380.00 /kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>23. <i>Pagellus centrodontus</i> or Bakoko (Php 230.00-400.00 /kg) - both the lowest and highest prevailing prices of Php 230.00 /kg and Php 400.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>24. <i>Panulirus longipes</i> or Banagan (Php 200.00 &amp; 600.00 /kg) - both the lowest and highest prevailing prices of Php 200.00 /kg and Php 600.00 /kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>25. <i>Panulirus</i> spp. or Banagan (Php 130.00-325.00 /kg) - both the lowest and highest prevailing prices of Php 130.00 /kg and Php 325.00 /kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>26. <i>Priacanthus macracanthus</i> or Dilat (Php 280.00-350.00 /kg) - both the lowest and highest prevailing prices of Php 280.00 /kg and Php 350.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>27. <i>Salmo salar</i> or Salmon (Meat sliced) (Php 400.00-900.00 /kg) - supplies with the lowest prevailing price of Php 400.00 /kg were recorded in Region 4A wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 900.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.</p> <p>28. <i>Scarus quoyi</i> or Momol (Php 250.00-350.00 /kg) - both the lowest and highest prevailing prices of Php 250.00 /kg and Php 350.00 /kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.</p> <p>29. <i>Siganus vermiculatus</i> or Malaga (Php 350.00 &amp; 450.00 /kg) -supplies with the lowest prevailing price of Php 350.00 /kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower compared to Region 2.</p> <p>30. <i>Spratelloides gracilis</i> or Dilis (Php 350.00 &amp; 450.00 /kg) -supplies with the lowest prevailing price of Php 350.00 /kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to CARAGA Region.</p> <p>31. <i>Thunnus obesus</i> or Barilis (Php 125.00-300.00 /kg) -supplies with the lowest prevailing price of Php 125.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to CARAGA Region.</p>
