Remarks/Market Observations: The following observations were gathered from market personnel and vendors this week: 1. Minimal display of fresh marine commodities were noted among the monitored retail markets this week. This may be attributed to the continuous rainy weather condition brought by Typhoon "EGAY" and Typhoon "FALCON" . As a result, an increased in the prevailing retail prices for marine commodities was recorded in the monitored retail markets. More specifically, limited availability of local-fresh galunggong (<i>Decapterus macrosoma</i>) was recorded sourced mainly from Malabon and Navotas Fish Port. 2. Relatively, display of imported-frozen galunggong lalaki was observed in the monitored retail markets this week as vendors used the commodity to substitute the demand for its local variant. 3. Similarly, limited supply of alumahan (<i>Rastrelliger kanagurta</i>) was noted this week among the monitored retail markets. However, availability of other variant (i.e., Hasa-hasa) was observed sourced from Lucena (Quezon), Farmers market (Wholesale), Malabon and Navotas Fish Port. 4. Nonetheless, sufficient and stable supplies of bangus and tilapia were still observed among the monitored retail markets this week. As a result, no major changes in price were recorded. Despite on this, most of the available supply for tilapia particularly in Muñoz and Commonwealth markets were sourced from Pampanga as higher wholesale price of tilapia from Batangas was reported. Additionally, there is a Php20-30/kg difference between live and fresh-chilled tilapia. 5. Major source areas of the top fishery commodities in the monitored markets are as follows: b. Retail b.1. Bangus - Bulacan b.2. Tilapia - Batangas b.3. Local Galunggong - Malabon Fish Port b.4. Imported Galunggong - Navotas Fish Port General Observations: Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Lates calcarifer</i> or Apahap- (Php160.00-300.00/kg)- Both prevailing price were recorded in Muñoz market wherein lowest prevailing price of Php160.00/kg was observed smaller size of the commodity as compared to the highest recorded price of Php300.00/kg which was noted to have better quality in terms of freshness and has larger size sourced from Malabon Fish Port. 2. <i>Mene maculata</i> or Hiwas- (Php150.00-300.00/kg)- Lowest prevailing retail price of Php150.00/kg was recorded in primary market (i.e., Malabon Central Market) wherein supplies are sourced directly from its nearby wholesale market or Fish Port. Hence, supplies are usually sold in a cheaper price. Meanwhile, highest recorded price of Php300.00/kg noted in Marikina market were reported sold in a delivered price, hence offer relatively higher. 3. <i>Mullus surmuletus</i> or Salmonete (Php200.00-440.00/kg)- Meanwhile, lowest prevailing price of Php200.00/kg was observed in Malabon Central market wherein supply are noted to have low quality in terms of freshness hence offer in a cheaper price. Meanwhile, highest recorded price of Php440.00/kg noted in Marikina market was observed to have better quality in terms of freshness sourced from Lucena.																											
			(-) - Price Not Available During Price Monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
