**Remarks/Market Observations:**

The following observations were gathered from market personnel and vendors this week:

- Adequate supplies of fresh marine commodities were recorded in all monitored retail markets despite the inclement weather season brought by Super Typhoon Season "Goring" this week. However, lesser volume of supplies were noted in later days of the week due to the hampered fishing operation brought by the continuous rainy weather throughout the whole country.
- For medium-sized local-fresh galunggong (*Decapterus macrossoma*), ample display were noted in all monitored retail markets this week. Supplies were mostly sourced from Navotas and Malabon Fish Ports. The prevailing retail price remained at Php200.00/kg this week. There were other local galunggong variants like "balsa" (*Decapterus macarellus*), "babae" (*Decapterus russelli*) and "burot" (*Decapterus kurroides*) were present in some of the monitored retail markets this week.
- Lesser supplies of imported-frozen galunggong were noted this week. More specifically, only one (1) market namely Polo Public Market have available supply. This may be attributed to the sufficient supply of local-fresh galunggong which is more preferred by buyers. As a result, the prevailing retail price decreased at Php150.00/kg. There are also other imported-frozen commodities like pompano, salmon mackarel, pusit kalawang, and tulingan noted in the market.
- Ample supply of medium-sized alumahan was also noted in the monitored retail markets this week. The prevailing retail price of medium-sized alumahan is at Php240-300/kg and were mainly sourced from Navotas and Malabon Fish Ports.
- The prevailing retail price of bangus is at Php160.00/kg due to the sufficient and stable supplies observed among the monitored retail markets this week. Supplies were still mainly sourced from Bulacan and Pangasinan.
- For tilapia, the prevailing retail price of tilapia was noted at Php140.00/kg this week. Most of the supplies in the some of the monitored were still sourced from Batangas. However, in Muñoz and Mega-Q Markets, most of the supply of tilapia were sourced from Pampanga due to higher wholesale price of tilapia sourced from Batangas (according to vendors). Most of the buyer still prefer tilapia from Batangas due to the commodity's quality (in terms of taste and appearance). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.
- Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas, Pampanga
  - Local Galunggong - Navotas & Malabon Fish Ports
  - Alumahan - Navotas & Malabon Fish Port
- According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets.

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Penaeus monodon* or Supgo - (Php600 & 1400/kg) - lowest prevailing price of Php600.00/kg were recorded at Polo Market where supplies were sourced directly from nearby Fish Port, hence, the lower price. Highest prevailing price of Php1400.00/kg was noted at Pasig Market where supplies recorded were in good quality, hence, the higher price.
- Scylla serrata* or Alimango - Female - (Php650.00/kg & 950.00/kg) - lowest prevailing price of Php650.00/kg were recorded at Marikina Market where supplies were not in good quality (supplies from previous days), hence, the lower price. Highest prevailing price of Php950.00/kg was noted at Farmers Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price.
- Decapterus macarellus* or Balsa - (Php160.00/kg & 280.00/kg) - lowest prevailing price of Php160.00/kg were recorded at primary markets (Balintawak, Navotas, Commonwealth) where supplies were sourced directly from different fish ports, hence, the lower price. Highest prevailing price of Php280.00/kg was noted at in secondary markets (Guadalupe, Kamuning and Galas Markets) where supplies recorded were in good quality and sourced from a primary market, hence, the higher price.
- Glossogobius giuris* or Bias - (Php200.00 & 500.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies recorded were not in good quality (supplies from previous days). Highest prevailing price of Php500.00/kg was noted at Pasig Market where supplies recorded were in good quality and sourced from Lucena, Quezon.

(-) - Price and Volume not available during price monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring
