		Female	100	**100 & 105	105	**90	100 & 105	105	**90	Vietnam, China

Remarks/Market Observations:

The following observations were gathered from market personnel and vendors for the month of September:

- Despite the occurrence of Typhoon "Hanna" and Tropical Depression "Ineng", sufficient unloading of fresh marine commodities were still observed at Navotas Fish Port. Commodities recorded were tulingan, chabeta, tambakol, dalagang bukid, hasa-hasa, and others. Consequently, supply of local fresh galunggong lalaki (*Decapterus macrosoma*) remained adequate at the fish port sourced from Zambales, Northern Palawan, and Quezon Province.
- Likewise, sufficient unloadings of imported-frozen galunggong lalaki was still noted at Navotas Fish Port this month. This may be attributed to the existing demand for the commodity wherein some vendors opted to purchased imported-frozen galunggong due to its uniform sizes and affordable price as compared with local-fresh galunggong. Also, imported-frozen galunggong babae continued to be available at the fish port this month.
- Minimal volume of supply of alumahan (*Rastrelliger kanagurta*) was observed at the fish port this month. In fact, only in the first week have recorded with supply of the commodity at an actual price of Php280.00/kg chiefly obtained from Batangas.
- Sufficient unloading of bangus and tilapia were also recorded at the fish port. Nonetheless, higher wholesale prices were recorded this month. This might be due to the following reasons:
  - \* Expensive aquaculture feeds and inputs;
  - \* Higher logistical cost brought by the increased in oil/fuel prices and among others;
- Top fishery commodities at Navotas Fish Port (wholesale) are sourced mainly from the following areas:
  - Bangus - Bulacan, Pangasinan
  - Tilapia - Batangas, Pampanga
  - Local-fresh galunggong - Palawan, Zambales, Quezon Province
  - Imported-frozen galunggong - Vietnam, China
  - Alumahan - Batangas

(-) - Price and Volume not available during price monitoring

(\*\*) - Actual Wholesale - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring

NA- Source Area not available during price monitoring

Note: No price monitoring data was recorded during the 3rd week of the month due to the conduct of National Training of Trainers on Community organizing
