Remarks/Market Observations:

The following observations were gathered from market personnel and vendors this week:

- Sufficient supply of fresh marine commodities were still observed among the monitored retail markets this week. Even so, minimal availability of local fresh galunggong lalaki (*Decapterus macrosoma*) was observed in selected markets. Availability of other variant (i.e., Balsa and Burot) was also recorded.
- For medium-sized imported-frozen galunggong, supply remained available in some of the monitored markets due to the continuous demand as it serves as substitute commodity for local galunggong.
- Supply of alumahan (*Rastrelliger kanagurta*) was also noted this week in the monitored retail markets. Majority of the available alumahan in the monitored markets were large obtained from Lucena, Malabon and Navotas Fish Port.
- Sufficient supply of tilapia was still noted in the monitored markets this week. However, fish vendors in Commonwealth market opted to offer their tilapia at a bargain price due to constant low demand from the consuming public.
- Lastly, supplies of medium-sized bangus remained minimal at the monitored markets this week as majority of the supplies were large-sized chiefly sourced from Bulacan and Pangasinan. In fact, no display of the medium-sized bangus were recorded in Trabajo, Quinta, and Tandang Sora markets.
- Major source areas of the top fishery commodities in the monitored markets are as follows:
 - Retail
 - Bangus - Bulacan
 - Tilapia - Batangas
 - Local Galunggong - Navotas Fish Port
 - Imported Galunggong - Navotas Fish Port
 - Alumahan - Navotas Fish Port
- Meanwhile, lower demand in the markets were still reported by the fish vendors this week. As a result, some displayed fish was observed to have low quality in terms of freshness which was noted to be the leftover from the previous market days. In connection, vendors opted to sell it in a lower price to ensure all were be sold and avoid further losses.

General Observations:

Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.

- Mene maculata* or Hiwas - (Php-240.00, 300.00, 360.00/kg)- Lowest prevailing price of Php240.00/kg were observed in both primary markets (i.e., Commonwealth and Pasig) wherein supplies were usually sourced directly from wholesale markets, hence lower price was recorded. On the other hand, highest prevailing price of Php360.00/kg was recorded only in secondary markets (i.e., Kamuning and Guadalupe) wherein supplies were sourced from primary markets, hence the higher price.
- Trichiurus* spp. or Espada-(Php3000.00, 320.00, 400.00/kg)- Lowest prevailing price of Php300.00/kg was observed in Malabon and Guadalupe market wherein supplies recorded are noted low quality in terms of freshness as compared to the highest recorded price of Php400.00/kg observed in Mandaluyong and Marikina markets both were sourced from Lucena.
- Venerupis* spp. or Halaan -(Php100.00, 120.00, 200.00/kg) - Lowest prevailing price Php100.00/kg recorded in Pasig and Caloocan markets were noted smaller as compared to the highest recorded price of Php200.00/kg noted in Marikina and Guadalupe markets wherein supplies recorded were larger in size sourced from Lucena and Paranaque.

(-) - Price Not Available During Price Monitoring
 (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.
 NA - Source Area not available during price monitoring
