Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Fish vendors in the monitored wet markets (Commonwealth, Tandang Sora, Mega-Q, Balintawak, and Muñoz) were reported with minimal supplies of fresh marine commodities this week. This may be due to the occurrence full moon on October 29, 2023, affecting fish behavior and making them more challenging to catch. Additionally, in Galas market, some stalls were closed as fish vendors took vacations during the holiday season. For medium-sized local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>), limited supply was noted in the monitored markets this week. This might possibly be due to the ongoing closed fishing season for galunggong in Northern Palawan, which started on November 1, 2023. For imported-frozen galunggong lalaki, supply continued to be present in selected markets, as some of the fish vendors opted to purchase the imported galunggong as an alternative commodity to meet the demand for galunggong in the markets from the consuming public. Meanwhile, display of medium-sized alumahan (<i>Rastrelliger kanagurta</i>) was recorded in most of the monitored markets this week. However, only large-sized of the commodity was observed in some markets like Tandang Sora. Nevertheless, there continues to have sufficient supplies of aquaculture commodities (i.e., bangus and tilapia) observed among the monitored retail markets this week. As a result, no major changes in prices of the commodities were recorded. Major source areas of the top fishery commodities in the monitored markets are as follows: <ol style="list-style-type: none"> Retail <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local Galunggong - Navotas Fish Port Imported Galunggong - Navotas Fish Port Alumahan - Navotas Fish Port 																									
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Penaeus monodon</i> or Sugpo (small) - (Php-380.00 & 900.00/kg)- both prevailing price were recorded in Malabon Central Market, wherein ample supply of the commodity was reported on 3 November 2023 hence offer in a low price. Meanwhile, the highest prevailing price Php900.00/kg is recorded on 31 October 2023 which supplies were noted to be minimal, hence the higher price. <i>Leptopotherapon plumbeus</i> or Ayungin-(Php260.00-360.00/kg)- Lowest prevailing price of Php260.00/kg was observed in Guadalupe market wherein supplies recorded are noted smaller as compared to the highest recorded price of Php360.00/kg observed in Mandaluyong market both were sourced from Lucena. 																									
	<p>(-) - Price Not Available During Price Monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring</p> <p>Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators</p>
